Caltrans design information bulletin 82-06

The Division of Design provides policies, procedures, guidance, technical assistance, training and equipment needed to develop and maintain a safe, sustainable, integrated and efficient transportation system. The Design Program innovates design solutions by: Ensuring the adoption of "Best Practices" and design information to promote safety, statewide consistency, efficiency and quality. Assisting in the application of design standards and practices to facilitate the resolution of project development issues. Providing technical support and design expertise on highway design issues related to motor vehicles, bicycles, and pedestrians. Establishing flexibility in Caltrans highway design standards and procedures, especially in the context of urban environments and multi-modal design. Providing technical support, training and guidance to District personnel for CADD roadway design software, drafting software, and engineering GIS applications. Providing Capital Outlay Support staff with computers, laptops, monitors, printers, plotters and other necessary tools. Providing and maintaining information technology servers and data storage to meet the needs of the Districts. Contact Design Project Facts This project proposes to construct a sidewalk from the San Lorenzo Valley High School toward the intersection of Route 9 and Graham Hill Road on the southbound side of Route 9. As part of this improvement, shoulder widening will be constructed so that a minimum 4-foot wide shoulder is provided on the southbound side of the highway at all locations where the sidewalk is constructed at the highway grade. In locations where the new sidewalk alignment is above the highway and behind existing retaining walls, no shoulder widening is proposed. Signage and/or rapid flashing pedestrian beacon improvements will be evaluated for the project between postmiles 6.3 and 6.45 (South of Graham Hill Road). Detailed proposals for this location will be developed during the Project Approval and Environmental Document phase. If the sidewalk cannot be constructed all the way to Graham Hill Road, the sidewalk and shoulder improvements will be carried to a logical stopping point. A signalized flashing beacon pedestrian crossing will be added at or near the terminus of the sidewalk improvements if they are stopped prior to Graham Hill Road / Felton Empire Road. These design details will be further evaluated during the (PAED) Project Approval and Environmental Document phase of the project. At spot locations, the sidewalk will be reduced in width to 32 inches per the allowable standards in the current Caltrans Design Information Bulletin (DIB) 82-06 Pedestrian Accessibility Guidelines for Highway Projects. Additionally, non-standard sidewalk widths of 4 feet will be used in severely constrained locations, such as above retaining walls and in front of environmentally sensitive areas or adjacent residences. Where possible throughout the project, a sidewalk width of 6 feet will be constructed. In the Project Approval and Environmental Document phase, when design surveys are received, potential wider path or sidewalk improvements can additionally be investigated for the northern area of the project from postmiles 6.8 to 7.2. Project PowerPoint Presentation Project Benefits Purpose: The purpose of this project is to improve pedestrian access and safety along the corridor. Need: Deficiencies in pedestrian access and facilities exist between Graham Hill Road and the San Lorenzo Valley High School. Multiple pedestrian-related collisions have occurred within the most recent 5 years, including 2 fatal collisions. Funding This project is being funded in the State Highway Operations and Protection Program (SHOPP) with a total programmed capital cost of \$8,494,000 dollars. Preliminary Project Schedule Final Environmental document to be completed: Fall 2022 Right of way acquisition to be completed: Spring 2024 Design to be completed: Spring 2024 Advertise: Summer 2024 Construction to begin: Spring 2025 Construction to be completed: Winter 2027 Project Contact Info Doug Hessing, Project Manager Phone: (805) 549-3386 Email: doug.hessing@dot.ca.gov Public Information Office: Kevin Drabinski Phone: (805) 549-3138 Email: kevin.drabinski@dot.ca.gov Virtual Public Meeting A virtual public meeting will be held on December 16, from 5:30 – 7:00p.m. The meeting will be accessible on the WebEx platform and recorded. See details below on how to join. Meeting Format: From 5:15 p.m. to 5:30 p.m., participants will be allowed time to join the meeting, welcome, and introductions There will be time for community questions to be answered. During the questions and comments portion of the meeting, use the 'raise hand' and 'chat' features to ask your question. Your questions and comments will be given full consideration in preparation of the final environmental document. The meeting will be adjourned at 7:00 pm. To Join the Meeting: You may join the meeting by mobile device or by phone. On your computer or mobile device, click on the following link: Enter your name and email address to join the event. During the questions and comments portion of the meeting, use the 'raise hand' and 'chat' features to ask your question. By phone: +1-408-418-9388, access code: 146 349 2250 Phone participants will not be able to provide comments or ask questions during the meeting. It is a critical part of the California Department of Transportation's mission to ensure that projects are designed to comply with ADA standards. The following resources should be utilized to ensure the Department complies with applicable ADA standards for both temporary and permanent pedestrian facilities.
