The discipline of maxillofacial surgery covers a wide range of diseases, conditions, injuries and defects of the head, neck, face and jaw, as well as solid and soft tissues of the mouth. It is an internationally recognized surgical specialty, rapidly changing with evolving advances in technology. Specialists in this field care for patients with problems such as dental problems, facial pain, unsigned jaws, facial injuries, oral cancer, cysts, tumors, and patients in need of cosmetic facial surgery and dental implants. New texts are needed to keep practitioners informed, as progress is being made around the world on a daily basis. This book aims to present cutting-edge concepts on complex topics within this dynamic discipline. Read more often Order hardcopyOpen access peer-reviewed1.
