

## 2026 CORPORATE CAPABILITY STATEMENT

# Critical Infrastructure. Reliable Execution.

Electrical reliability, infrared thermography, mission-critical operations, engineering support, and technical workforce solutions for government and commercial clients.

ESTABLISHED  
2014

INDUSTRY EXPERIENCE  
25+ Years

CAGE CODE  
7QA50

UEI  
Y6H3MGGBJMB6

## CORE CAPABILITIES

### Electrical Reliability & Infrared Thermography

- Infrared inspections of energized switchgear, switchboards, transformers, panelboards, MCCs, connections/terminations, and critical electrical equipment.
- Thermal and visual documentation, equipment identification, temperature information, findings, and practical follow-up to support maintenance decisions.

### Mission-Critical Operations & Facilities Support

- Preventive and condition-based maintenance support, CMMS documentation, vendor/OEM coordination, maintenance planning, and operational readiness.
- Support for client-approved SOPs, MOPs, EOPs, change documentation, and specialized technical personnel.

### Engineering, Construction & Project Support

- Civil, mechanical, and electrical engineering; construction management; project/program management; facilities modernization and maintenance.
- Data and business analysis, strategic planning, customized consulting, technical writing, and training support.

### Technical Workforce Solutions

- Technical recruiting, placement, temporary staffing, professional/administrative support, subject-matter expertise, and project-based personnel.
- Scalable workforce support aligned to client-defined qualifications, schedules, operating environments, and project requirements.

## REPRESENTATIVE PAST PERFORMANCE

- The Whiting-Turner Contracting Co.
- Virginia Department of Transportation (VDOT)
- Colorado Springs Utilities
- Kiewit Corp
- Johnson & Johnson
- Balfour Beatty US
- U.S. Army Pueblo Chemical Depot (PCD)
- Denver Public Schools
- ExxonMobil
- Materna IPS

### OUR OPERATING PRINCIPLE

*"Stakeholders Are the Mission."*

Responsive service, disciplined execution, and practical results built around the client's operational priorities.

## WHY PERSEVERANCE

- Integrated service model across electrical reliability, facilities, mission-critical operations, and workforce solutions.
- Clear documentation, quality control, stakeholder communication, and disciplined field execution.
- Responsive, scalable technical personnel for project, maintenance, and operational requirements.
- Experience supporting government, commercial, institutional, utility, construction, and industrial environments.

## WHO WE SERVE

- Data centers & mission-critical facilities
- Government & public-sector facilities
- Commercial & institutional facilities
- Utilities, industrial & technical operations
- Prime contractors, owners & facility operators

## FEDERAL CONTRACTING
