PORTAFOLIO PREMIUM DE EXPORTACIÓN

OPERATIONS, SCALE & COMMERCIAL RELIABILITY

The Capability Behind Every Cigar

Behind every cigar is an operation built on consistency, reliability, and a long-term commitment to growth. Our production infrastructure combines the rich tradition of Honduran cigar craftsmanship with the operational capacity required to serve international markets consistently and competitively.

Production Capacity

Our manufacturing facility currently produces more than **50,000 premium cigars per month**, crafted under strict standards for tobacco selection, construction, and quality control. Every cigar is produced with meticulous attention to detail, ensuring consistent quality from one production lot to the next while maintaining the capacity to support sustained commercial growth.

We understand that demanding markets such as Texas and the United States require more than an exceptional cigar—they require dependable supply, on-time fulfillment, and a trusted business partner.

To meet those expectations, we have established an export-focused operation that integrates production, export documentation, international logistics, and dedicated commercial support throughout the entire process.

To further strengthen our partnerships, we work with a highly respected customs brokerage firm that provides professional guidance in export procedures, regulatory compliance, customs documentation, and shipment traceability, ensuring smooth and efficient international transactions.

Our Commercial Strengths

- Production capacity exceeding **50,000 premium cigars per month**.
- Handcrafted manufacturing with consistent premium-quality standards.
- Production planning designed to support recurring orders and scalable growth.
- Reliable international logistics coordination and shipment tracking.
- Complete export documentation and specialized customs support.
- Responsive service tailored to the needs of wholesale and B2B customers.
- Flexible packaging options and customized wholesale programs.
- We export to USA, Brazil, Belgium, Kuwait, Taiwan

A Commitment Beyond Every Shipment

Every shipment represents more than an export—it reflects our commitment to delivering authentic Honduran premium cigars backed by operational excellence, consistent quality, and a business partner prepared to grow alongside its distributors, importers, and retail partners.

HERENCIA & TRADICIÓN

El Alma de Honduras en Cada Bocanada

Welcome to the world of Honduras' finest premium tobacco.

From the rich, fertile soils and unique microclimates of Honduras' renowned tobacco valleys emerges a cigar unlike any other. Combined with generations of time-honored craftsmanship, these exceptional natural advantages produce cigars recognized for their character, complexity, and uncompromising quality.

Meticulously crafted to satisfy the refined palate of the most discerning Texas cigar enthusiasts, this catalog presents a distinguished portfolio of authentic Honduran premium cigars. Honest in their origin, exceptional in their construction, and unforgettable in their flavor, our cigars are perfectly suited for the finest cigar lounges, premium tobacconists, private clubs, and upscale retailers throughout Texas.

- Technical innovation: our signature cigar with a clear-cap-finish (File: 02.jpg).

The heart of the process: the large aging hall and tobacco piles (File: 05.jpg). 1.

1. **ORIGIN, SOIL, AND THE ART OF AGING**

Our history and identity are firmly rooted in the richest, most privileged lands of Honduras. In these regions, a perfect microclimate combines with the mineral composition of volcanic soil to produce tobacco of ideal strength, superior elasticity, and captivating aromas. Yet, the secret to an unmistakable flavor profile lies not merely in the harvest, but in patience and absolute respect for nature's own timing.

Rigorous Selection and Manual Sorting

Each harvested green leaf is monitored to ensure it is at its peak of maturity. Subsequently, at our sorting tables, expert sorters meticulously classify every leaf based on texture, size, color, and elasticity. This rigorous, artisanal approach ensures that only the finest raw material is allocated to our premium production lines.

Premium Tobacco Leaf Grading & Rigorous Quality Control

Curing and Fermentation in Traditional Bales

Once sorted, the leaves undergo an extensive, controlled resting period in our aging warehouses. Arranged in large piles and wrapped in natural jute cloth, the leaves experience a slow fermentation process that purifies impurities, reduces the bitterness associated with nicotine, and concentrates the tobacco's essential oils and natural sugars. This prolonged "slumber" imparts the characteristic roundness, balance, and smoothness to our cigars.

"A great cigar is never mass-produced—it is patiently crafted, shaped by the richness of Honduran soil and perfected through the measured passage of time."

2. ARTISAN CRAFTSMANSHIP & HUMAN PRECISION

We believe flawless consistency and traditional craftsmanship are not opposing ideals—they work together in perfect harmony. Texas cigar enthusiasts are known for their refined taste and high expectations. They demand an effortless draw, an even burn, and a balanced flavor profile that remains consistent from the first puff to the last.

To deliver that experience every time, each of our premium cigars undergoes rigorous quality control while benefiting from the skill, dedication, and passion of experienced artisans. The result is a cigar that reflects not only technical excellence but also the timeless tradition of handcrafted Honduran cigar making.

Maestros torcedores aplican la técnica de entubado tradicional (Archivo: 04.jpg).

Expert Hands, Unmatched Pride

Within our rolling rooms, tradition is a living legacy passed down from one generation to the next. Our master cigar rollers (see [04.jpg](#)), proudly representing Honduras' rich cigar-making heritage, carefully hand-select and expertly roll the precise blend of filler, binder, and wrapper leaves. This meticulous hand placement of every leaf creates optimal airflow channels throughout the cigar, ensuring exceptional construction and a superior smoking experience.

Premium Consistency Through Advanced Draw Testing

To safeguard the smoking experience from any imperfection, every cigar undergoes a rigorous quality control process before its final finishing. Each production batch is inspected using state-of-the-art draw-testing machines (see [11.jpg](#)), which digitally measure airflow resistance with scientific precision through the bunch before the cigar is completed.

Any cigar found to be rolled too tightly or too loosely is immediately removed from production. This uncompromising quality control process guarantees a smooth draw, an even burn, and consistent performance—ensuring that every premium cigar we export to Texas delivers the same exceptional smoking experience our customers expect.

3. OUR COLLECTION: EXCLUSIVE VITOLAS & DISTINCTIVE WRAPPERS

Our collection reflects a modern, innovative approach to premium cigar craftsmanship. We proudly offer distinctive vitolas and exclusive wrapper presentations that capture attention while delivering layers of flavor and complexity—perfectly suited for pairing with fine whiskeys, bourbons, and the sophisticated Texas cigar lifestyle.

The Innovator (Barber Pole Wrapper)

A visually stunning cigar that masterfully intertwines two wrapper leaves of contrasting color and character: a lighter wrapper that imparts creamy, subtle sweetness and a darker, fully matured wrapper rich with notes of cocoa, espresso, and spice (see the lower cigar in **03.jpg**).

As the cigar burns, both wrappers work together in perfect harmony, creating a dynamic progression of sweet, spicy, and earthy flavors that evolves throughout the smoke, delivering a rich, multidimensional experience.

The Royal Contrast (Candela Foot or Cap Accent)

A technical achievement reserved for our most accomplished master rollers, this cigar features a contrasting light-colored wrapper accent at either the foot or the cap (see **02.jpg** and the cigar on the left in **03.jpg**).

This unique presentation allows the smoker to first experience the delicate aromas and smooth character of the lighter wrapper before seamlessly transitioning into the richer, fuller-bodied profile of the primary blend. The result is a refined evolution of flavor that highlights both the complexity of the blend and the artistry of handcrafted Honduran cigar making.

Our exclusive lineup of premium vitolas includes the iconic **Barber Pole** along with distinctive two-tone wrapper designs (see **03.jpg**). Every cigar is finished with a flawless traditional triple cap (see **01.jpg**) and a precisely cut foot with uniform bunch density to ensure an effortless light, an even burn, and exceptional performance from beginning to end (see **13.jpg**).

Detalle de la perilla: acabado perfecto de triple capa tradicional (Archivo: 01.jpg).

Detalle del pie: corte limpio y densidad homogénea que asegura el encendido (Archivo: 13.jpg).

THE BARBER POLE (DUAL WRAPPER)

The market places tremendous value on authenticity, craftsmanship, and exclusivity. That's why the story behind our cigars sets them apart:

"Handcrafted Honduran premium cigars, produced in limited batches and finished with distinctive, one-of-a-kind details." This commitment to small-batch production, traditional craftsmanship, and unique presentation is what makes our **Barber Pole** the flagship cigar of the Herencia & Tradición Signature Collection and a truly distinctive offering in today's premium cigar market.
