cubex® specialist architectural security

MARINE Steel Doorsets

Marine Steel Doorsets

Who uses Cosmos™ MARINE Steel Doors?

As specialists we have been manufacturing for the Marine sector for many projects. Our ability to provide Marine Doors and Barrier systems, yet maintain quality product aesthetics has given us leadership in the construction of projects in Marine environments. Our experience in the Marine sector is largely on projects such a Coastal Defence, Utilities, Food Manufacturing, Sea Freight & Shipping, Oil & Gas Industry, and also projects such as Leisure Centres and Hotels. Our brand is centred on 'Whole Life Cost'.

Do Cosmos™ MARINE Steel Doors have a Warranty?

Every door has a 10 Year Warranty from the date of installation as standard, giving you peace of mind in your investment. All Warranty validations are in accordance with Cubex Terms & Conditions, and Extended Warranty arrangements are available by application.

What security features will my door come with?

We build products to the specification of the Client, and according to security standards. We also work closely with the Client Architects and with Technical consultants to ensure the suited product is delivered for the right aspects and purposes, and ensure the security rating required is delivered. All doors are manufactured to BS EN Standards, and can be finished in Marine or Coastal grade finishes for added longevity affecting 'Whole Life Cost'.

Are the Cosmos[™] MARINE Steel Doors thermally efficient?

Yes we have worked hard to constantly improve the U-values of our doors. The U-value signifies the thermal efficiency of the door, and we have achieved some of the lowest values in the marketplace meaning that your Client can rest in a warmer and more economical environment. Thermal efficiency can be affected by the door composition, for example – If your door has a Vision Panel as part of the door composition, in most cases this would weaken the Thermal efficiency of the door. Cosmos[™] will provide your answer to complete Thermal efficiency in a Marine Steel Door.

What hardware is available on Cosmos™ MARINE Steel Doors?

We are able to supply a full range of hardware to suit your chosen door design. We offer a suited approach which means that all hardware matches whatever you order. Popular architectural finishes are Stainless Steel and Satin Stainless Steel (SSS) in the marine industry. We also have different hinge designs and door restraints to cope with the harsh nature of the Marine Environment.

What Paint finishes can we have on Cosmos™ MARINE Steel Doors?

We operate a Polyester Powder Coating plant, and have a reputation for our finishing that we are proud to tell you about! Your client can have any colour of their choice, and we hold a broad range of stock RAL finishes for you to choose from. Cubex are also recognised for their capability with specialist and bespoke finishes across a huge cross section of Industry demand. We also have a market leading finishing plant where our coatings are applied – Cubex are recognised by Finishing Consultants working across Europe, not only for our quality but capability with specialist coatings - Marine and Coastal Grade finishes included.

Cosmos™ Fire Rating (FR)

Fire Rating may be key to your project in addition to Bullet Proof requirements - Cosmos™ can incorporate Fire resistance up to 240 Minutes (FR240) in your door composition.
