

RegOpsDays 2021 partners' deck

26.1.2021, from 9 AM to 4 PM (EET)

Online

#RegOpsDays

WWW.REGOPSDAYS.ORG

What is RegOps Days?

DevOps has taken the software world by storm. It gives organizations practicing agile software development methodology the ability to deliver safely new features at high velocity due to a high degree of automation in their software delivery pipelines.

Regulation intensive industries have been traditionally slow at adopting agile methodologies due to complex procedures that have to be followed when developing software. However, we start to witness DevOps inspired automation making intakes into these areas.

Our event provides a venue where practitioners and researchers interact and exchange ideas from their industry or area of expertise, which will facilitate the development and adoption of Regulatory Operations (RegOps) best practices.

What is RegOps Days?

The first RegOps Days took its place in February 2020. The event was in Helsinki, and it collected over 50 attendees. The vivid conversation between the speakers and attendees pointed out the importance of this kind of event. There is still work to do to facilitate the adoption of regulatory operations.

The 2021 event will be online. Online event makes it possible to connect more globally the regops network, and we expect **more than 200 attendees** to join.
