Red white and blue jordan 1 low

Since its debut in December, a new horror game called Granny 2 new part has become a hot trend. Its popularity is growing on the day and the recently renovated introduced new rooms in the house, extra weapons and notorious hard mode that challenges you to make an escape from the old ladies creepy mansion with even fewer chances of success. If you are playing this game for the first time, you may find it difficult to figure out where to look for the necessary items and how to perform tasks at hand until grandma learns about your location and comes to you with a baseball bat. If you're still trying to get free in the short five days that developers have given you, here are some tips that can be useful to you. Grandmother's manor consists of three levels: top, ground floor and basement. After a variety of stairs you will find yourself in different rooms. When moving around the house, it should be borne in mind that it is designed in a circular way, which means that you can usually move from one room to another using the interior door or connected external halls. Every day you start in the bedroom at the top. There is a wardrobe where you can hide if grandma is approaching and a closet where you will find items that you are going to need if you expect to unlock another door. Make a suer look for each drawer and cabinet at home if you discover something useful. Some furniture may also have hidden doors. For example, you can get into the gun room through what seems to be just a bookshelf. When examining the house, be careful not to smash any items. Grandma is very vigilant, if she hears any noise, she will appear on the doorstep and you have to restart again! The antagonist also remembers where she last saw you and sets the bear trap, so don't expect you to pull off the same trick twice. Try to surpass the cunning old lady and find your way out of this horror house before she finds you! Game information We are accustomed to the fact that old women have a cute weirdness. But this elderly lady surpassed all her nasty neighbors. She has no grandchildren, so she is very angry, so she breaks her unreleased tenderness and aggression against strangers, luring them into her house and locking them inside. Any attempt to escape will be extremely disapproving – you will get a bat on your head. Yes, the old lady is not a mistake. And she will not tolerate your reluctance to stay with her as a grandson for a long time. You only have five days to find a way to get out of this house. Which means – look in all rooms, pick up the right set of things and crack the front door with it. And, of course, do not catch the eye of our unbalanced old woman who watches everything that happens in her house! Description Do you have a grandmother? Probably, you have even more than one, and I hope they are tender and take care Very. But not all grandmothers are beautiful and loving. If you want to get acquainted with a crazy grandmother, you can do it in a game that has the appropriate name. This horror game has many followers, and since the last update their number has been steadily increasing. If you want to be a trend, you should try the game, especially since the developers have a lot of interesting things to show you. Join a large audience to see if you are able to survive in this horror. There are two main characters. The first is you, and the other is Grandma Part 2, which is not very hospitable. Your main goal other than surviving is to find a way out of this terrible home, but this is a very challenging mission. You have five days to do this, and if you finish the task of completing the photo, you will be given another day. The game starts when you kneel and you find yourself in Grandma's house. It is petrifying and very quiet, and every step of you will be repeated and can lead to your death. The owner of the house is very heavy, and it will defeat you for every sound. You need to visit every room, and only in such circumstances can you find a way out. When entering each room, you will find certain objects, and you need to take them. These would be various keys, hammer, pliers and fun. They will be scattered throughout the house, and you have to look for them carefully. Each tool will be useful, but you need to know the right time. If you take a certain instrument and do not need it at this time, be prepared to drop it. But you have to admit that when you lower something, a loud sound is heard, and in this way grandma will know where you are. There are currently sixteen rooms, and you should visit them all and discover every secret. There are several modes where you can change the difficulties. In easy and normal mode you can get a bonus day to complete the grandma picture, and here your enemy is slow and you have more options to stay alive. Also, the floor is not creaky, and it saves your life too. In difficult and extreme modes, the grandmother moves faster and on the main door there are additional locks. But the story becomes a little different when you change the mode, and objects will never fall in their places. Come who can, but as soon as possible leave this house, revealing all the secrets of a crazy grandmother. Don't you have enough fear and adrenaline to stimulate the grandmother in the first part? Well, chances are you can never get a good enough scare, especially if you're a fan of horror games. If so, then you are lucky enough to find this page because we have something really exclusive to you. This is the second part of one of the most popular and widely recognized horror games in the world. It's hard to imagine something creepier than locked inside an old boring mansion. However, what about a really cool twist? You are one here, together, is something else. And it's a monster from hell. Her name is Grandma. In the game, you will have to do everything and determine the strange situation you are in. Grandma don't let you leave her house. It's hard to explain why, maybe she doesn't have a reason for it. She does not look and behave like a person, so it is really difficult to understand her motives. Is she a real woman who has a terrible fate and now wants revenge to kill innocent children? Or is it an evil spirit that finds pleasure in torturing people? Or have you been locked inside this place because your life was far from perfect and it is something like punishment for your sins? You won't know anything about it. And what is more - you do not have time for that. There are a couple of days for you to find your way out of this place. If you can do this - congratulations, you will survive. If you can not - well, very bad, but grandma really tears you pieces. You need to invent some ideas that will help you get out. The door is locked and you need to get a key to open them. Sounds simple, but you can't do it so easily. The rooms here are endless and you will have to check each of them, open each closet and shelf before you find the savings key. Grandma will try to catch you wherever you go. You need to avoid it, because its appearance in the same room means that in a second you will be dead and the game will end. You don't have too many chances, nor do you have too much time - it is limited and if you can't do everything quickly and correctly, you die. Success. Welcome to Granny.Granny keeps you locked in your home. You wake up in a dark room, the only thing that lights up in the room is your flashlight lying on the table, you have a headache and feel that someone has hit you in the head. Now you have to try to get out of your house, but be careful and quiet. She hears everything. If you drop something on the floor, she'll hear it and run. You can hide in closets or under beds, but be careful that she does not see where you are hiding. You can protect yourself from grandmother using weapons that you can find at home. But it only stops it at certain intervals. But it's worth it. There are five different levels of complexity. Extreme, severe, normal, mild and practicing. If you play in practice mode, you are at home without a grandmother and you have the opportunity to try different things without much difficulty. You have 5 days. If you failed to escape after the last day ... well, probably you can figure out what's going on then. Good luck and have fun with grandma! How to playPlayed with mouse and W-A-S-D keys.
