You can set the exact static level for your Perfect for all dog sizes (15 pounds 100 pounds) Wireless control range up to 330 yards here are a short post instructions for dog grooming a training collar. If you find this post useful, we ask you to share our site. jacobsonkennel.com, on social networks. Also be sure to rate our jacobsonkennel.com/leave-a-review/ With that, let's get started. Dog Care Dog Training Collar Instructions 1. Full charge for 2 hours. Offer only one wire in the package. Step 2. Collar installation: Adjust to a comfortable size: Make sure the receiver's contact points are tightly positioned against your pet's skin. Step 3. Turn on the transmitter. Step 4. Lock the security keyboard: Switch it down to unlock. Step 5. Vibration Command: Press the vibration button briefly and the receiver vibrates once. Step 6. Command: Press the beep button briefly and beep the receiver once. Static Intensity Adjustment: Tap and hold the LEVEL button when you rotate the remote control to adjust the impact intensity. Static Command: Click on the static button briefly and the receiver shocks once. Switching channel: The ability to train 9 dogs at the same time. Click the channel button briefly to select a dog for training. Pairing: Contact Page 10 for more information. You can find this information on this blog in a section called Dog Care Training Collar Guide. Look for Section VI. That's for a quick dog care training collar instruction section of the blog. Now let's move on to the manual section of theDog Care Training Collar Manual!!! Set upStep 1. Charge devices for 2 hours or more, respectively. Remote Control: Charge the device until the red LED turns green. The display on the remote will indicate full vars as well. Step 2. Set up static levels: Press and hold the static level control activation button while slowly rotating the static level controller until the screen figure reaches the right force. The recommended strength of the static level starts at 10. This is the minimum feeling your dog may feel. The correct static level comes down to a case-by-case basis, which you should learn from your dog's answers. Sensitivity to static depends on the size and weight of your dog, the amount of fur, and even the condition of the skin.IV. Wearing the CollarPicture receiver 1. Thread the collar through Receiver.Picture 2. If your dog has thick fur, please separate the fur from the electrodes with the comb to allow them to reach the skin. Figure 3. When wearing a collar, tightness is most appropriate if one finger can be inserted underneath. Figure 4. Silicone caps can dull the static sensations you have to decide if you need to wear them. Soft caps also protect your dog from direct contact with metal electrodes, which in some cases will cause discomfort in some dogs. Vibration mode: The press vibration button and the receiver will vibrate once: Button and vibration is saved. Sound mode: The beep button and the receiver will beep: Hold the button and the beep sound is saved.3. Static Stimulation Mode: Click on the static button, and the recipient is the recipient Encouraging the owner. Don't hold the button as it is not advisable to have a prolonged shock to your dog. Static, however, will be cut off in 4 seconds automatically to prevent unintended harm to your pet. Switch channel: Click the channel switch button to choose which receiver you want to control if you match more than Receiver.VI. Match remote control at receiver: If you have a new model receiver to look on and turn off the button, then steps to match the receiver placed below. If your receiver doesn't have a button on and off, skip this step and keep reading below. How to match receivers with buttons Turn on and off the receiver. (Turn off) Press the turn on/off button for 5 seconds until the receiver's green LED light is ready. Then hold the channel switch for 8 seconds, the receiver will vibrate and beep, which means that the match is complete. Check out this YouTube video if you have any questions. Old receivers (NO On / Off Button). Connect the receiver to the power source via a USB cable, and the appropriate mode can only be activated while charging. Tap and hold the channel switch /match button for 5 seconds. The receiver will vibrate and beep, which indicates the match is complete. You'll see 1 (or subsequent number) in the channel display if the match is successful. Add multiple receivers: Connect an extra receiver to the power source. Press and hold the channel/match switch button for 5 seconds (repeated steps 2.1 and 2.2). The channel display will show the next number of the new receiver. Note: Connect only 1 receiver at a time, don't connect all at once, or the remote control will fit all the recipients in one channel. Removing all the receivers: Press and hold the static level activation button and the beep button at the same time for 8 seconds. The channel display will be the default 0. Note: Make sure that all receivers you want to remove have power and an effective range so that recipients can get a removal command. Always remember that these collars are only for educational purposes. Never use them to abuse or abuse your dog. Vizsla Baby Puppies The rest of the guide is quite a lot of text. Instead of writing it all. Instead, we'll dilute photos of the text. IMAGE EPSON MFP
