

Allieds' DPI® Clean Energy Risk Platform

START-UP and PROTECT Energy

The greatest problem that is holding back investment into projects and innovative technologies within the renewable/energy sectors is access in obtaining securities for project capital.

In a business model, it is critical to assess the installation and process risk. Process availability is identified by known maintenance regimes and plant closures and this availability is used to calculate the projects minimum level of revenues that can repay the debt and cover operational expenses – **Breakeven**.

If an unexpected catastrophic event happens, then normal business insurances can step in to help mitigate the loss, but what if the unexpected is a non-catastrophic availability event where the process simply underperforms but causes the project difficulties, creating a loss and the projects ability to repay the debt and cover the operational cost.

The risk of these events can be evaluated where the technology has a proven track record, enforced by other risk mitigation procedures but what if the technology is unproven with limited or no track record and how can these technologies complete and bring their benefits to market?

The heart of the Platform is supported by an international finance counterparty, to whom the risk of the plant underperforming is transferred.

Pre-Commercial Operation Date – **start-up** commissioning risk cover in form of repair cost and/or debt repayment.

Post-Commercial Operation Date – **protect** long-term investment with guarantee of project output and quality of end-product; operational and excessive maintenance risks.

Subject to acceptance of your project and the resulting due diligence carried out by Allied Project Services, you will be introduced to a broker to provide advice on the insurance product.

Other guarantees are available within the DPI® Platform for;

Solar Module Performance **PV Project/System Performance**

Fuel Cell System Performance **Energy Storage Performance**

FAST FACTS

STRENGTHENED EPC-M GUARANTEES DURING START-UP.

Designed to enhance the EPC(M) contractors performance guarantee terms on start-up when delivering a process using various technologies and battery limits.

PROTECTED DEBT SERVICE after COMMISSIONING

A 10-year guarantee that ensures that your debt repayment is protected against unexpected downtime that could result in the project not being able to meet the debt providers requirement.

RISK TRANSFER to a STRONG COUNTER-PARTY

This guarantee adds a third party to the funding table by transferring risk to a high worth finance counterparty that provides a level of financial support to the Start-up of the process and later, protects the projects' senior debt requirement.
