## Dynasty warriors 9 weapons

Dynasty Warriors 9 is a game that brings more of what fans enjoy about previous games in the series. However, the formula has also undergone some significant changes, including a new system of open peace and some changes in the combat system. This is a game where you have to use some amount of strategy when deciding how to go against enemies. It is also a game where your officer will be able to send hundreds of enemies flying with a single attack. This is a game that revels in fantastic and also requires you as a player to pay attention to what you are doing. While some fights in the game can feel pretty easy, there are quite a few boss fights in the game that can be very challenging. Whether you are a veteran of the series or a beginner, this guide certainly has some things that have an application for you. If you're ready, let's get started! TIPS

AND TRICKS Use special attack wisely Every officer in the game has their own unique special attacks that do a lot of damage and also makes the officer invincible for a short period of time. However, these attacks have a cool fall so make sure you use these attacks wisely as it can be the difference between life and death in some situations. Try different languages English voice-over can seem very cartoonish to some. Given the historical surroundings of the game, the Chinese language immediately seems more authentic and fits perfectly into the atmosphere. Before you settle in any one language, make sure you try different options. This can significantly change your experience of the game. Unlock officers In the game, you start with only three officers available to play. Now, it can be a bit daunting to consider that there are a total of 90 officers to unlock. Don't worry, because all you have to do is unlock all the officers to fully play through all 13 chapters in the game's history mode. Notice where crafting materials spawn the open world in a game filled with craft materials to collect which can help you craft better items. Make sure you collect a lot of these craft materials as you wander around the map. However, also make sure you notice where some rare craft materials can be found, so you can go back to that location in case you're in a sudden need for these materials. Experiment with various gems and weapons Gems can be used in the game to customize the weapon a certain way. These gems can be manufactured if you have the necessary craft scroll. Make sure you experiment with different weapons and gemstone combinations on the officers to find out what works best for you. Find out how Trigger Attack Trigger Attacks allow you to send enemies flying in the air while stunning them or change their status in some other way. These attacks also increase the damage that you are dealing with, so it's a big attack to use when you want to uncover the uncover deadly combo against enemies. To use this attack, simply hold the R1 button and then, when asked, click the button shown on the screen. HOW FARM GOLD AND XP Killing Bandits One of the easiest ways to farm both money and XP in this game is tracking down packages of gangster chiefs and gangster leaders. These particular types of gangster enemies offer far more rewards than the random unnamed thugs you see around in the game. Bandits usually travel in groups, so if you notice a few of them, it's likely that you'll soon see more of them coming their way. Just attack them with your usual attack, get all the goods you can find to sell them to suppliers and then wait for more bandits to come your way. One very effective way to shoot bandits is to use explosive arrows, but it is quite expensive. However, the costs will be more than covered from the big profits you will make by killing the bandits. Fishing You can do quite a bit of gold in this just fishing some rare fish and items and then selling them. Just go to ports such as Guangling and you will be able to catch quite a few Golden Yibigian. In addition, you can catch the Golden Booby along with the circles on the waterway near Guangling North Camp. Some items can only be caught with Ultimate Bait, so make sure to use it in the Luoyang moat to get some really expensive items that you can sell. Hunting You can hunt animals easily from afar using bows and arrows. Since WILDLIFE AI is not very good in the game right now, you can easily kill high-level animals such as tiger just by firing arrows from a decent range. This will net you a significant amount of XP, so it's a great way to align your officers. CHEATS AND CHEAT CODES (UNLIMITED HEALTH, MUSOU, STAMINA) Please use the following cheats on your own. Using cheats online will result in an immediate ban. You can get cheats by referring here. Below is a list of cheats you can include. Endless Health Unlimited Stamina No Krafing Requirement Unlimited Gold Endless Musu One Hit Kill Update Points Special Skills... and more. FORM REINFORCEMENTS One of the side quests in the game is called Reinforcement Formation and requires you to select the appropriate officer for that position. You can try different officers on your own, just by keeping that in mind. For a captain, to go with someone with a high skill leader, to an aide, to go with someone with supreme political influence, for Surveyor you need an officer with high intelligence, and for observation, to go with an officer with high leadership and a strong military. With this in mind, the following officers will be better Suitable for this position: adjutant: Yuan Han, because of his high political influence. Inspector: Wang Kang, because of the high intelligence. Captain: Tsai Mao, Mao, to high leadership and good political influence. Lookout: Wen Ping, because of the high leadership and strong military. TENDING WOUNDED SOLDIERS In this mission known as The Care of Wounded Soldiers, Cai Wenji of Jianlin asks you to collect 10 cat tails for her. This may be puzzling to you, but what you actually need to get is 10 Reedtails. Once you are ready, just head east of the gate and go into the forest to the south. You end up finding all the reedtails you need, and once you do, just head back and pass them to Cai Wenji. CLONE WEAPON TYPES LIST DYNASTY Warriors 9 has 36 different types of weapons, and each of them handles completely different from the others.
