Teach yourself books english universities press

Teach yourself english book pdf. How can i teach myself english. Teach yourself books. Teach yourself language. Teach yourself publications.

Teach Yourself is a self-instruction book publishing imprint that specializes in language education books. Founded in 1938, it has become one of the most famous series of its kind, with titles covering mathematics, algebra, and calculus as well as other subjects. The series was initially published under the English Universities Press imprint, but is now owned by Hodder Education. Its most notable feature is the use of a common design for all books, which has remained largely unchanged over the years. The series gained popularity during World War II, with titles such as "Teach Yourself to Fly" and "Teach Yourself Radio Communication" becoming essential reading for prospective RAF pilots. The demand for these books was high due to wartime paper shortages, and by 1941, nearly 50,000 copies of each title had been sold. By the time of its 50th anniversary in 1988, the series had sold over 40 million copies worldwide. The iconic self-help book series "Teach Yourself" has undergone significant visual transformations since its inception. Initially published in the 1930s with a modest cover design, the series evolved by incorporating larger front covers adorned with black stripes and titles, which later adapted to modern times with a yellow rounded rectangle logo. The first five books were adaptations of earlier works but eventually shifted towards newly commissioned content, reaching over 700 volumes. Notable early publications included "Teach Yourself About the Greeks" by J.C. Stobart, "Teach Yourself Amateur Acting" by John Bourne, and "Teach Yourself Arabic" written by Arthur Stanley Tritton. The series also featured titles like "Teach Yourself Astronomy," "Teach Yourself Embroidery" by Mary Thomas, and "Teach Yourself Irish." The subjects covered in the series ranged from vocational training to practical home help, hobbyist activities, language learning, technical subjects, and even arts-related topics such as composing music. Jet Engines and Rocket Propulsion by Patrick Joseph McMahon, released in 1964. Initially, A Concise Guide to Teach Yourself published its list of available titles in 1958, but the official numbering only began in 1949, so earlier publications received numbers posthumously. Since 1966, Hodder & Stoughton has been publishing Teach Yourself series books, shifting formats from hardcover to trade paperbacks in 1973. By 2010, the books underwent a total redesign and were printed in color for the first time. Today, they're available worldwide, covering various subjects like language education, computers, games, and hobbies. The company now focuses on self-instruction courses through books, audio, and multimedia, with an emphasis on languages. The Teach Yourself Languages range covers over 65 languages at four different levels, matching the Common European Framework of Reference for Languages (CEFR). In 2012, they introduced the Discovery Method, providing further explanations by focusing on usage and practice rather than traditional inductive methods. Get Talking and Get Started Series: These strands cater to absolute beginners and those who haven't learned a language since school. Get Talking is an all-audio course for basic speaking, while Get Started tackles all four skills (reading, writing, listening, and speaking). Complete... Series: The third strand targets absolute beginners, covering a broader range of material than the previous strands. The Complete range offers the widest selection of products, covering all 65 languages available from Teach Yourself, including Afrikaans, Arabic, Babylonian, Bengali, Brazilian Portuguese, Bulgarian, Cantonese, Catalan, Croatian, Czech, Danish, Dutch, English as a Foreign Language, and many more. The Teach Yourself series is a collection of language learning and self-study programs that cover various subjects, including languages and other interests. The series has been published by Hodder & Stoughton Limited since its inception. The books in this series aim to provide readers with a comprehensive understanding of their chosen subject, allowing them to "quickly discover all that matters about" it. Some notable titles within the All That Matters series include Ancient Egypt, Animal Rights, Archaeology, and Astronomy, among others. This series is designed to give readers a brief yet insightful introduction to various subjects, making complex topics more accessible. The Teach Yourself series has undergone changes over the years, with its initial branding as the "Perfect your..." series eventually being replaced by its current title. The series has been featured in publications such as The Times and The Guardian, showcasing its significance in the field of self-study and language learning. The Teach Yourself book series has undergone changes in cover design over the years. The following are seven covers from German language books published between 1946 and 2003. Series Checklist: 1. Lastly, the catalog includes volumes on logic, mountain climbing, a short history of Russia, ABC of garden flowers, ABC of herbaceous border, ABC of cacti and succulents, ABC of roses, and a range of Teach Yourself German books covering various aspects of the language. A comprehensive German language learning book was first published in 1938 under the title "Teach Yourself German" by Sir John Adams. The book was later revised and expanded by Sydney W. Wells and further updated by E.S. Jenkins, resulting in a hardcover edition with a blue and yellow dust jacket in 1963. Over the years, this popular language learning guide underwent numerous revisions and editions. In 1971, it was re-published as "German" by John Adams, Sydney W. Wells, and E.S. Jenkins, featuring a revised and reset edition. This edition was simultaneously published in London by Teach Yourself Books and in New York by David McKay Company Inc. In the following years, the book continued to evolve, with new editions released in 1973, 1975, and 1991-1992. The most recent revision was published in 2003, featuring a fourth revised edition written by Paul Coggle and Heiner Schenke. This iconic language learning resource has been widely recognized for its effectiveness in teaching German to beginners and advanced learners alike.
