Even if you don't belong to any of those programs, there are plenty of songs that you stream and download for free. At the time of writing, there were more than 6,000 toll-free songs available. As I scrolled through it, I mainly saw religious music, relaxing soundscapes, classical music and traditional holiday tunes. When you find a song you want to download, click Buy Song Free on the right side of the screen. At the time of writing there were more than 220 songs available for free download. Although you won't find a large selection of popular artists and albums on Last.fm, you'll find a great selection of independent music across all genres. Unfortunately, the Last.fm app for iOS and Android devices works a little differently than the website. Instead of letting users stream and download music, the app only monitors what you're listening to through other apps on your smartphone. This helps track the listening history of users who have created accounts, leading to more relevant music suggestions. You'll see free music highlights and all the free music releases, including new and remarkable work, all-time best-selling tracks and more. If the track is free, enter \$0.00 in the 'name of your price' box and 'download to your computer' Although you'll add tags to narrow down your search, you won't find many pregrouped genres and categories. While Bandcamp is a great resource source discovering, streaming and downloading new music, it's not necessarily the easiest website to browse. Pros Cons You don't need to create an account to stream music or download Wide range of genres and styles In addition to enjoying free music, Bandcamp also makes it easy to support the artists Not all music is available for free The website is a bit difficult to browse through YouTube Genres: All platforms: App (iOS and Android) and Website App Rating: 4.4 Stars YouTube has always been one of the first sources I check to stream free music. However, I didn't always know you'd find legal and free music downloads on YouTube as well. If you want to find free downloads, you can search YouTube for any type of music you want. The key is to click 'Filter' and then select 'Creative Commons' under 'Parts'. Lets you browse videos with audio that should be completely free and legal to download. In most cases, you'll see a download link in the description below the video. When I browsed through available free downloads, I came across the Audio Library channel that seemed to have a great selection of music. This channel, which has more than 3.3 million subscribers, shows videos and playlists full of popular copyright-safe music downloaded from the Audio Library website. In addition to music, NoiseTrade also offers books and comedy routines that stream or download you online. Unfortunately, NoiseTrade is not available in the App Store or Google Play. But the website is easy to use, and you'll find tons of free music that you download to your computer (and then add add to your smartphone as you Pros Cons You have the ability to direct a tip to artists if you enjoy their music You will see For Fans Or next to each artist with a list of popular bands/singers with similar sounds Not all songs are downloadable You will have to create an account to listen to full songs or download all files Tribe of Noise Genres: Pop, Rock, Electronica, Roots, Classic, Urban Platforms: Website App Rating: N/A Tribe of Noise is another great place to find free music downloads on your computer. Unfortunately, there is no app for iOS or Android. Although you can access music for free without creating an account, an account is free to create and unlocks various features of the website, including a larger selection of music. Once you've created an account, you'll be asked a little bit about your music taste and preferences before the site lets you search for songs and download them. You click Music or Artists at the top of the screen to browse featured music. Once you've found a song you want to listen to, just click on the title to see more information, stream the song, or download the track. Please note that not all songs are available for download, but many are. Tribe of Noise has acquired Free Music Archive in 2019, another website worth viewing for free music downloads. Although the website is no longer updated, you will still find thousands of free downloadable tracks there. Cons You search in different ways You don't need to create an account to download music Easy connect to music fans Not all music is downloadable There is no app for iOS or Android devices Final Thoughts Ultimately one of these websites/apps is worth checking if you are looking for free music downloads that are completely legal. If you're looking for a wide selection of free music downloads across genres, check out SoundCloud, ReverbNation, Jamendo or SoundClick. They are all available online or as apps on iOS and Android devices. If you're interested in emerging urban music, check out ThatPiff. For more classical and instrumental downloads, visit Musopen. In addition to gospel and Christmas tracks, Amazon Music also offers a selection of classical music downloads. For a wider selection of all genres, visit Last.fm, Bandcamp or YouTube. Finally, if you are planning on downloading music to your computer, NoiseTrade and Tribe of Noise are two websites worth visiting. It doesn't matter where you decide to download free music, but make sure you do it legally and safely. Although you need to turn off your adlocker online or enter your email to create a free account, you don't need to access free content.
