home; home: It is a service pack that comes along with Windows 7 Home Premium and Windows 7 Home Basic. It not only fixes the problems that might have arisen in Windows 7 Home Premium. As the name suggests, Windows 7 SP1 also has a highly compressed edition for home users only. It has some of the same features of the full version, but it is restricted to the home edition of Windows 7. The consumer version of Windows 7 SP1, Windows 7 Enterprise, also comes with four editions, though they are only available in the S, E and K editions. The M edition, however, is only released in volume licensing for those who already have the fully functional M edition. Windows 7 SP1 was released on July 1, 2009. Windows 7 SP2 Windows 7 SP2 (Windows Server 2008 R2) adds three additional versions: The S, E and K editions are restricted to the standard, enterprise and professional versions of Windows Server 2008 R2, respectively. The M edition is only available through volume licensing for Windows Server 2008 R2. Windows 7 SP2 was released on July 7, 2009. Windows 7 SP3 Windows 7 SP3 was released on August 1, 2009. Windows 7 SP3 Release 2 was released on October 15, 2010. Windows 8 Windows 8 (also called Windows Server 2012) is a version of Microsoft's Windows operating system that runs on the x86 and ARM architectures. It was first released on October 26, 2012, and is the successor to Windows 7 and Windows Server 2008. Windows 8 features a user interface that's entirely touch-based and is designed to be used with a touchscreen. Windows 8 also includes a Start Screen, a combination of a desktop and a wallpaper. Windows 8 is available in 32-bit and 64-bit versions. Microsoft's previous version of Windows, Windows 7, is also available in both 32-bit and 64-bit versions, though its key difference from Windows 8 is that Windows 7 lacks the touchscreen-based interface. Windows 8 has been criticized for its start screen, which is similar to the Windows Phone interface. According to a Bloomberg Businessweek article, "Microsoft knew it was on thin ice with Windows users 520fdb1ae7
