Shell International Petroleum Co Ltd, Shell Sidewalk Design Guide: Asphalt Pavement and Road Linings, London, 1978. (Call no: TE251. S544, TE251. S544 ADDENDUM) Shell's sidewalk design method is used in many countries to design new asphalt roads. When designing structural roads, the main considerations consist of soil parameters, parameters (thickness and stiffness) for other materials of the road foundation, as well as the expected number of times when the standard load will pass. The solution is the thickness of the asphalt layer. Cm.
