

## TheWorldSpeaking NGO

**TheWorldSpeaking (TheWS)** is Swiss NGO licensed in Geneva, Switzerland with **Dr. Gery Maes - Van de Vorst** as its **Founder and President**. TheWS is the first and only “Global Political Body”. It also functions as a peaceful “Global Union” founded on the principles of honesty and transparency. TWS uses blockchain technology in ensuring fairness and transparency through its voting platform designed to gather the collective voice of people regardless of race, gender, nationality or religion and then uses that collective voice to endeavour to make change according to the will of its members.

The overall goal of TheWorldSpeaking is to give people a collective voice as a political

body and a mechanism to help them bring changes they desire in a way that is transparent and uninfluenced by governments, businesses, people of power or industries. TheWorldSpeaking programs are split into five initiatives, with the Global Voting Platform as its first and foremost central function:

- Global Union Voting Platform Initiative
- Crypto Currencies Initiative
- Micro Satellite Cellular Network Initiative
- Blockchain Initiatives
- Global Banking Initiative

**TheWS**, recently appointed and voted **Courage Tekpa** as their **Country Advisor & Representative/Manager in charge of Education & Eco-friendly Engineering Construction** for Ghana.

Courage Tekpa is also the founder of **Tekchills Foundation**, a licensed NGO in Ghana aimed to empower marginalised communities across Ghana in breaking the cycle of entrenched poverty, inferiority complex, and illiteracy.

To achieve this, the foundation intends to work in partnership with local communities to;

- Meet their identified needs and priorities.
- Develop the skills they need to make long-term positive changes.
- Empower local change-makers to break the cycle of poverty in their respective communities by undertaking activities that address the needs and interests identified.

### EDUCATIONAL PROJECT

As part of our committed mission of ensuring deprived communities' benefit from infrastructural growth, the TheWorldSpeaking deemed it fit to undertake an educational project of modernizing the learning centre for the kindergarten school pupils of **Salom D/A Basic School**, a school located in **Ada West District** of the **Greater Accra Region** of the **Republic of Ghana** to provide a conducive learning environment for the children.

Per the visit made by the Country Advisor & Representative of **TheWS - GHANA**, he realised the devastating nature of the kindergarten school block. The block is nothing but a death trap. The following key issues and complaints were keenly lodged by the Headmistress and teachers;

- In the events of persistent rainfall, academic work for this school pupils comes to a standstill as they can't access their study

room due to flooding and leakage of the roof of the building.

- The presence of termites causing damages to books and other learning materials.
- In the event of high temperatures, these kids had to come out and stay under a nearby tree to take their lessons just to move away from the heat that is been produced by the current structure serving as their learning centre.

Below are some images depicting the deplorable state of the learning centre;

**TheWS will be responsible for the overall management of the project in the following perspectives;**

- Crowdfunding and financing for the project
- Construction management

- Creation of an Eco- Village for the school by planting fruit trees.

#### **OBJECTIVES OF PROJECT**

- To provide conducive environment for effective teaching and learning.
- To make education attractive to the school pupils.
- To achieve United Nation's Sustainable Development Goal Number 4 – Quality Education.
