UX designer with 5+ years experience in design and research across disciplines. With an MS in Human Factors and former career as a librarian and educator, I combine expertise in the organization of information, human-computer interaction, and user-centered design methods for an informed, holistic, and flexible approach to UX. I most enjoy the challenge of designing for complex domains and navigating the intersection of user, engineering, and business needs in enterprise software.

PROFESSIONAL EXPERIENCE

2019 - **UX Designer**
PRESENT | Veracode | Burlington, MA

- Embedded designer supporting 3 Agile scrum teams dedicated to a B2B software security SaaS product
- Lead UX for new features and enhancements from ideation into production
- Work to integrate an acquired product into an existing platform to unify the look and feel and improve usability while managing change
- Participate in research activities to uncover user needs and validate designs, including usability testing, user interviews, and journey mapping

2019 | **Contract UX Designer**
3Derm | Boston, MA

- Provided usability evaluation and UX design services for a medical imaging start-up as they launched a mobile version of their software

2018 | **UX Design Intern**
L.L.Bean | Freeport, ME

- Collaborated across and interdisciplinary team to conduct competitive analysis, build high fidelity interactive prototypes for usability testing, and produce production-ready designs for new and improved features for an e-commerce website

2012 - **Instructional Designer**
2019 | Touro College Libraries | New York, NY

- Led the 2016 redesign of the library website, from a content audit, through iterative design and testing, to implementation and assessment
- Created online learning content, training workshops, and marketing materials
- Developed and taught 4 new courses in research & writing
- Chief editor & administrator for Wordpress-hosted blog

EDUCATION

2019 | **MS Human Factors in Information Design**
Bentley University

Selected Projects:

Data Visualization & Interface Design

Client: MA Department of Local Services

Redesigned the interface and optimized data visualizations for the Municipal Finance Dashboard website and presented to the Commissioner

Product Development & Design

Client: Watertown Public Schools

Collaborated with design and marketing teams to develop a business plan and MVP prototype for a new solution, which we pitched to the Superintendent

Heuristic Review & Usability Testing

Client: The MathWorks

Worked with a team to provide a heuristic expert review and subsequent remote moderated usability testing of a companion website for MATLAB

2012 | **Master of Library & Information Science**
Bentley University

Selected Coursework: Structures for Organizing Information | Digital Information Retrieval | Information Literacy | Information Technology | Research Methods

2010 | **Bachelor of Arts**
University of Rochester
