system which includes video tape recorders and video discs. One technique for reducing the time required for recording a video
signal in a video tape recorder is to employ a video disc. This technique does not, however, require the use of an existing video

disc. In fact, because of the greater recording density of video discs, this technique is more useful for reducing the recording time of the video signal than is the conventional technique which requires the use of a video tape recorder. Video tapes are more economical than video discs, however, and it is desirable to have an apparatus which can be used with video discs and video tape recorders. Q: Running Python through Eclipse - ImportError: No module named'scipy.sparse.linalg.cython_blas' As the question states, I'm trying to run Python code through Eclipse. As a part of my code, I have used SciPy to manipulate a matrix with SciPy LinearAlgebra. When I try to run the code, I get the following error: Traceback (most recent call last): File "/Users/joel/Documents/test.py", line 4, in import scipy.sparse.linalg.cython_blas as spblas ImportError: No module named'scipy.sparse.linalg.cython_blas' My Python version is 2.7. I tried to install scipy and other related modules, but I still get the same error. Does anyone know what I am doing wrong? A: You can install scipy 520fdb1ae7
