This book lives up to its name! The author is a subject that is often complex and manages to present it in a way that simplifies the main concepts. I found it very useful, to get an understanding of structures in the brain, Minilas Chapter 11. Neurotransmitter Vocabulary Index Vocabulary Index Terminology, 28,29,39 Hypoglosal, 28,29,33 Oculomotor, 28,29,32,40 Olfactory, 11,28,29,63 Optic, 28,29,45-48 Trigeminal, 28,29,35, 36,40 Trochlear, 28,29,32 Wagus, 28,29,39 28,29,39 Radioculitis of the cerebral artery or 'left fifth cervical nerve'. Unnecessary hospitals and counselling can be avoided, patients' needs will be better served and the doctor's ego will be strengthened. It's all a thin affordable and highly read-in-the-anatomy lesson. Don't practice without it. &quot; Lynn P. Carmichael, Md., president of the University of Family Medicine of the Miami School of Medicine and cited; I highly recommend this as complementary assistance in previewing and reviewing a very complex subject. Diagram arch excellent.&quot; The reference to Ronald G. Clark, PhD Assocham Pro, Department of Cell Biology and Anatomy University of Miami School of Medicine and; it made eumacacclus material accessible. It was a great book. I just want the rest of our medical texts to be easier to understand. &quot;&quot;I found the book to have an excellent introduction and general review (and preview) more detailed text and lectures and quotes. Dr. Goldberg's book emphasized a course where stress is often ". I have lent the text to a sophomore (neurology-in the mechanism of disease) and a junior (neurology rotation), both of which have found the book very useful and quoted. This book 'saved the day for me' - if I had depended on the necessary text, I would have flunked!&quot; Comments by medical students at the Miami School of Medicine Author: Dr. Goldberg has a distinguished joint career as a neuroantomist and family physician. A graduate of Albert Einstein College of Medicine, he later trained in neurology, ophthalmology and family medicine, with board certified in two subsequent fields. He is engaged in research in neuronal neuronal
