Receiving phone notifications on a smart watch There is nothing more annoying than missing an important call or answering a basic SMS too late because you missed your phone notification signal. However, it is difficult to keep your mobile device while you wait for your message. Fortunately, there are ways to get a warning even if your phone is not on your hands. Thanks to the latest technological innovations, mobile phone users can now receive notifications over the phone without even holding the phone in their hands. BT Notifier is a utilitarian software that allows you to receive notifications through a smartwatch. This app uses Bluetooth technology to connect your phone to a smart watch. With this notification, you can receive notifications when someone calls you or sends you text every time. However, while this can be a big sub-volume, installing a phone and a smart watch can be difficult because connecting both devices takes time. Allows you to receive notifications over the phone in smartwatchesLight free download on your phone's resourcesConnect and the smartwatch takes years Not working most of the time BT does not allow you to scan and connect to any nearby Bluetooth Low Energy (BLE) device. Connect and communicate 2 or more iOS devices to send/receive notifications via Bluetooth BT Notifier Pro Features: - Connect to all BLE devices. - Scan all BLE devices within reach. - Smart watches can connect to the iPhone and the original phone together. - We do supported actions with a smartwatch. A simple user interface. Subscription to Premium Features: If you want to receive an unlimited number of watch notifications from your device, you need this subscription. The name of publications or services: Smart Notice Premium. Subscription duration: Smart Notice Premium is 7 days free, then \$0.99 per week.
