With How to Make Millions, the problem is gone for one simple reason: Tim is not the one who does most of the teaching. In this DVD, Tim has brought together half a dozen traders who have made over \$1 million, including my personal favorite, Superman. That means that you don't have to listen to Team Drones with all its marketing BS. You could hear from some elite, one-of-a-kind traders about how they did it. This includes his two millionaire students, as well as several other Teachers. Best View this Youtube comment on one of Tim's videos. I wonder if Tim will disclose the huge amount of money he made from students. This is the part that most people are fixated on. Tim Sykes How to Make Millions Of Free Downloads For Books PcTim SykesTim charges a huge fee to teach you the strategy he used to be successful in the stock market. I see some big problems with that argument. 1) This is America, and it is everyone's right to pursue wealth. No one complains that McDonalds charges you money for food, but they expect Tim to give you his Big Mac recipe for free. 2) People willingly pay to go to college to study the same material. Torrent file or magnet file. Turning lead into gold used to be an alchemy business, but today the Internet is awash with 'proven' techniques that allow anyone to go from rags to riches, if only they had the right knowledge. One man ready to share his skills with the world is Timothy Sykes. In 1999, while still at school, Sykes reportedly took more than \$12,000 in Bar Mitzvah money and began trading a dime share, turning his investment into \$1.65m before he reached 21. With dozens of articles documenting his fame and fortune, in 2011 Sykes launched his own website, TimothySykes.com. This is where others who want to emulate its success are brought on board with tempting offers like the one below. Of course, the kind of knowledge that allows people to get super rich quickly doesn't come cheap. Some early 'lessons' aside, Sykes sells DVD titles like TIMfundamentals for \$397+ shipping. TIMTactics weighs in on a few dollars shy of \$500, as do others. Sykes promises that by following his technique the money invested can be recouped with a good single trade, but there are people out there who prefer to make money without an initial outlay. These people find happiness in The Pirate Bay where all of Sykes's content can be found simply by searching for his name. But money people aren't happy with people getting rich without appropriate investments so he cooked up his own new money-making scheme in response. In a series of lawsuits filed in Northern Illinois District Court, Sykes' Millionaire Media, LLC is now suing eleven BitTorrent users who allegedly downloaded and shared his works without permission. Currently, all targets appear to be Comcast users. One of the lawsuits revealed that an individual was tracked down by german anti-piracy company Excipio. He was accused of copyright infringement in the most aggressive terms. Defendant is a terrible online infringement of Plaintiff's copyright. Indeed, the IP address of the Defendant... used without authorization to distribute seven different copyrighted works owned by Plaintiffs, the court filing reads. Seven files - PennyStocking, PennyStocking Part Deux, ShortStocking, TIMFundamentals Part Deux, TIMRaw and TIMTactics - all wrapped in a torrent. Court papers do not provide evidence of distribution of all such titles but note that the defendant distributed a small bit of the entire package in some offences Through each transaction, the Defendant shares 'a little' the Breach File. PCAP shows the Defendant's IP address, and the distributed 'bits'. Excipio verifies that the distributed 'bits' belong to the Infringing File by calculating its hash value, the paper reads. Interestingly the hash file - 4f7fa6edd6bb1e13b5af478fbae4daafab968f51 - revealed errors in evidence presented to the court. The Infringing File is a zip file containing various text and video files owned by Plaintiff, adding Excipio further downloads a full copy of the Infringing File, unzipped it, and reviews each of the seven works contained therein. However, a cursory view of the hash in question reveals no ZIP files whatsoever inside the torrent, only regular video, audio and documents. Aside from the technicalities, it seems pretty clear what will happen next. Sykes's preferred law - Schulz's Law - is well known among copyright trolling. In fact, Mary Schulz's lawyers were sanctioned by the court in the Malibu Media case, something she is now required to report to the court where she is admitted to practicing. For any work violated, Sykes' Millionaire Media, LLC demands legal damages, attorney's fees, and fees. While the company is demanding a trial by jury on all such triable issues it looks like they will actually seek a settlement from the 11 individuals they have targeted so far. Another way to turn small investments into big money, then. Then.
