Download

Running on Microsoft Windows Operating System. Accepted files are from Final Draft 15. Final Draft 11 only accepts files that have a file extension of.fda, but Final Draft 15 will accept any type of file. Final Draft 11 will NOT install Final Draft 13 or Final Draft 12, just Final Draft 11. There is an additional requirement for Final Draft 15: The script will need to be run in a folder with no other programs installed. To do this, download and install AVG Security, as well as multiple other freeware programs such as ClamWin. There is a web page with information about running the script in safe mode. Downloading Final Draft 11 1. You can download Final Draft 11 from the following site: The file name is either FinalDraft11.exe or FinalDraft11.rar, depending on the country you live in. 2. If you plan to update to Final Draft 13, you will want to download Final Draft 13 using the following link: Final Draft 11 can be installed into a folder with no other programs installed. Final Draft 13, Final Draft 12, Final Draft 12 and Final Draft 13 can be installed to a folder that already has other Final Draft programs installed. 3. If you have Final Draft 11 and want to install Final Draft 13, follow these steps: 4. If you have Final Draft 11 and want to install Final Draft 12, follow these steps: 5. If you have Final Draft 11, but want to install Final Draft 13 or Final Draft 12, follow these steps: Open C:\FinalDraft11 and follow the steps below. (Please note: If you have a different drive letter, you will have to change the path to the folder.) Step 1. Open C:\FinalDraft11 and click Run. Click Yes if Windows asks you if you want to open the folder C:\FinalDraft11 in "Run as administrator". Step 2. In the confirmation dialog, click OK. Step 3. In the first dialog, click Next. Step 4. In the second dialog, select "Install the program to:". Step 5. In the folder that appears, click on "Program files". Step 6. If you wish, you can select "I don't have enough space on 520fdb1ae7
