To start the new decade, Perodua has rolled out a substantially updated range of its popular Bezza. Armed with an updated front and rear design, as well as some very important safety additions, the new 4-door sedan is designed to improve its already rampant presence on Malaysian roads. The most obvious visual diesel between the 1.0-liter and 1.3-liter variant are the front fog lights, which are halogens, like daytime running lights. The main lights, however, are standard LED headlights. Second, 1.3 gets more than 15-inch two-heavy alloys by 1.0 in 14-inch. Perodua's Advanced Safety Assist (ASA) 2.0 is the headline of this 2020 revision and completes its availability throughout the current brand portfolio, although limited to the highest version of AV. The suite debuted in the third generation of Myvi and its inclusion here makes potentially life-saving active safety features such as autonomous emergency braking even more affordable for Malaysians. All new Perodua Bezza models are equipped with a 5-year/150,000 km warranty (depending on what comes first). More info:2017 Perodua Bezza Updated, Price UnchangedPerodua Bezza, Perodua Axia, Proton Iriz - Higher Value for Budget-ConsciousPerodua Bezza Officially launched - 1.0L and 1.3L from RM37k and further Perodua Bezza gets a new version in the form of GX Gtra, which replaces 1.0 Standard G in the Gtra range. Customers are offered Bezza GXtra at an introductory price of RM35,500 for one with a manual transmission and RM37,500 if you prefer automatic. These prices are on the road without insurance, and includes a five year/150,000 km warranty. The GXtra comes with an extended list of kits where side skirts and chrome door handles were added to the exterior. There's also a new Ocean Blue outer color available - an option that was previously reserved for 1.3L bezza variants. Inside, the piano black finish was applied to the dashboard and panel around the multimedia system, which itself has been improved with Bluetooth connectivity. In other areas, air conditioning air vent surrounds, steering pins and lever gear bases now get satin trim. Rounding things off chrome door handles to mimic those on the outside. The rest of the equipment is much like the 1.0 Standard G, including 14-inch alloy wheels, fabric seats, polyurethane steering wheel, hand side mirrors, 60:40 split-fold rear seats, rear sensors, power windows, dual airbags and ABS with EBD and brake. If you want VSC, you'll have to go for a higher specification of 1.3 Advance. Under the hood is a 1KR-VE 1.0-liter three-cylinder petrol engine that continues to service up to 67 hp and 91 nm. Mill soybean mated a five-speed manual transmission or four-speed automatic transmission, with the drive going on the front wheels. Wheels, again, the Bezza GXtra is priced at RM35,500 (manual) and RM37,500 (automatic), with both less than their 1.0 Standard G equivalents - RM36,035 (manual) and RM37,980 (automatic). In some ways, you'll get more for a little less with the new option. Interested?
