Role: Role: Full-Time

Title: Senior Associate Information Security

As a team lead you will contribute to improving Information governance and security maturity of the organization. The role is a mix of hands-on process, technical and risk management to ensure Information confidentiality, integrity, availability and privacy. You will play a key role in ensuring the organization, products and services remain compliant. The role will be hands-on in enforcing security, privacy and quality practices in a mobile and web-based software product and system environment.

Role & Responsibilities

- Responsible for leading and implementing Information security, privacy and compliance projects
- Independently lead a team of information security and compliance associates.
- Implement policies, standards, procedures, security controls, and guidelines
- Lead risk review and assurance activities across all functions.
- Perform compliance checks to enforce Information security, privacy and compliance controls
- Gather, analyze and assess organization and function threats and vulnerabilities.
- Provide company leadership with a realistic overview of risks and threats.
- Conduct the annual Information policy, document and risk reviews.
- Perform Vendor and supplier assessments and reviews
- Own information incident and breach management
- Manage Correction Action and Corrective Action Plans across functions
- Manage and monitor Anti-malware solutions.
- Lead continual training and awareness program on Infosec and compliance
- Work with auditors and subject matter experts during internal and external audit needs.
- Point of contact for all functions on Information security, privacy and compliance matters.
- Track Information Security and Compliance objectives and report metrics.
- Support the assessment and implementation of security and compliance tools and automation
- Work with business to respond to external Information security and compliance assessment
- Participate in client and vendor contract management and enforcement
- Scout, research and be aware of changing global regulatory landscape
- Maintain the Confidentiality, Integrity and Availability of all information or assets shared and assessed by you
- Adhere to Wysa's security, privacy and compliance policies and procedures
- Contribute to building continual improvement practices
- Ensuring compliance with the security and privacy requirements
- Knowledge of security and privacy best practises
- Integration of best practises with organization's processes

Knowledge, Qualifications & Skills

- 5-7 years of relevant experience in Information security and compliance.
- Minimum Bachelor's degree required, preferably combination of technology and security.
- Strong project management/organizational and planning skills
- Expertise in implementing ISMS/PIMS standards such as ISO 27001/27701 in a Product setting
- Knowledge and experience with ISO 27001, ISO27701, SOC2, OWASP, NIST, etc. frameworks
- Knowledge in cyber security and risk management practices
- Awareness of GDPR, HIPAA and other data protection regulations
- Good technical knowledge and experience working across software development life cycle.
- Ability to create compliance documents with minimal supervision
- Demonstrated proficiency in MS Office (Excel, Word, PowerPoint) is a must
- Ability to learn quickly, work independently, and maintain professional skepticism, critical thinking, strong analytical, and creative problem-solving attributes
- Ability to work in a fast paced or rapidly changing environment
- Ability to communicate at all levels and demonstrate high professionalism and integrity.
- Ability to multitask.
- Excellent people skills. Ability to motivate and encourage team play.
- Detail oriented and attention to accuracy.

- Strong writing/documentation skills required
- Strong verbal communication required
- Awareness and understanding of GRC tools is a plus
- Information Security and compliance certifications is a plus.
