An important note. Most Sharp TV models launched since August 2015 use the latest RF technology, unlike earlier models that use a previous technology called Infrared (IR). Currently Sky use the old 'IR' technology, so their Sky remotes (before and including Rev 10) may not work our new TV models that use the 'RF' remote control. (The same applies to the vast majority of models launched by most premium brands whose models have been released since January 2015). In the future, Sky should launch a remote control using 'RF' technology, which means you can use Sky Remote to operate the core features of any new Sharp TV. (like most other premium brands). Previously, Sharp Models (models launched on the market until March 2015). 3-Digit codes 064 065 081 121 122 185 322 Later Sharp models (models launched on the market after April 2015, see the comments on the model below). Once set up, when you press the Sky button on the remote control, the TV will also power (from standby mode). Please note that not all Sky-HD boxes have this feature. Set up your POWER TV with HDMI control on sharp TV, tap Menu on the remote control and scroll left in the Settings menu and click OK. Scroll down to the HDMI CEC option and click OK to choose. Highlight an option called HDMI CEC and turn on this feature by clicking OK on the remote control. Set up the Sky-HD box to power with HDMI with the Sky-HD remote control, tap the Service button and scroll to the Settings option. In the Picture menu, highlight an option called HDMI Control, turn this on by selecting the left or right arrows so that this option is enabled on. Universal Codes - These codes will only work in 'IR' remotes. If your TV uses a 'RF' remote control, you can't currently use a universal remote to operate it. One for all universal remote codes - 1106 or 2106 (for models with DVD Player built-in, code for the DVD section of remote control 2302) If the universal remote code in the list does not work, please contact the manufacturer of the universal remote control for help. Often the code will not work if the remote control was manufactured in front of the TV. We only have codes for one for all branded remotes, although from experience, many of them use the same codes.
