GE produces many small appliances, including digital coffee makers. These coffee makers have an automatic cleaning cycle, built-in charcoal water filter and timer, so you can prepare the coffee in advance and let the coffee maker brew it at a given time. GE Digital Coffee allows you to brew up to 12 cups of coffee at a time.Plug the coffee machine into a power outlet. Press the hr button for 2 seconds to activate it, then press repeatedly to advance the clock one hour at a time until you need it. Press and hold the min button for 2 seconds to activate it, then press repeatedly to advance the clock every 1 minute. Press and hold the button to go faster. Open the lid on the top of the coffee maker. Place the filter basket in the coffee maker and place the arrow markers with the coffee maker arrows. Insert a paper filter or permanent filter into the filter basket. Filter one small scoop per cup of brewed coffee you need. For stronger coffee, use a large end of the scoop instead of a smaller end. Take the caraf out of the coffee maker and add the desired amount of water to it. Use the marker on the side of the kalaf to measure the amount of water required. Open the lid of the water tank and pour water from the kalaf into the water tank. Now return the empty caraf to the coffee maker's heating plate. Press the power button at the top left of the control panel to start the manual brewing cycle. Press the Prog button once. Press the hr and minutes buttons to set the time you want to drink coffee. To start the program, press auto. The Automatic button lights up for 2 seconds and the program time is displayed on the LCD display. Remove the charcoal filter from the water tank. Fill half of the water tank with a mixture of 50% vinegar and 50% water. Press and hold the Clean button for 2 seconds. When the cleaning cycle is complete, dispose of the mixture of vinegar and water from the rough. Fill the water tank with clean water and press the power button to run the normal brewing cycle. When you have finished dripping into the kalaf, dispose of the water. Replace the charcoal filter in the aquarium.
