

# curaco Carebidet

Curaco means 'the care company'. The Carebidet, an attached personal hygiene device, reflects both the name and the mission of the company dedicated to being a trustworthy provider of health-care solutions to the ageing. This is a segment of society with a shortage of caregivers that is a significant challenge. The Curaco Carebidet is an automatic toileting aid system for the bedridden. This ergonomically designed bidet was created for people with limited mobility such as the elderly, disabled or patients restricted to bed and those with incontinence.

When the Carebidet's advanced, built-in sensors detect urine or feces, it automatically flushes the waste away. It rinses and air-dries the person's body, ensuring cleanliness and comfort eliminating the need for disposable diapers. The device adds comfort to its user and presents an improved way to manage the disposal of waste.

**A Smart Shift**  
from paper diaper to **Carebidet**

No-mess connection  
to waste tank

The Curaco is registered and Carebidet is listed as a device with the FDA.

**Its advantages:** Personal hygiene, comfort, less stress, human dignity, cost-effectiveness, ease of use, environmentally friendly

**What will be decreased:** The burden to caregivers, healthcare costs, CO2, waste, paper diapers, odor, worries, delay.

**Who is it for?** Hospitals, hospices, long-term care facilities, senior-care centers, assisted-living facilities, nursing homes – anyone caring for bedridden patients.

## About Curaco

Curaco, Inc., is committed to improving people's quality of life and promoting an overall sense of wellbeing. The company is becoming a global leader in the senior-care and home healthcare industry by providing compelling solutions to an ageing society.

Development of the Carebidet has been driven towards satisfying the needs of patients and caregivers with optimal functionality and an easy-to-use design. Curaco has reached customers in many countries and now makes the Carebidet available in the USA.
