Link A Summary of The Riveting, a deeply personal account of history in the establishment-from-the-president who inspired us to believe in the power of democracy in the stirring, long-awaited first volume of his presidential memoir, Barack Obama tells the story of his incredible odyssey from a young man, seeking his identity to the leader of the free world, describing strikingly personal detail as his political education and the iconic moments of his historic presidency. Obama takes readers on a compelling journey from his early political aspirations to a key Iowa caucus victory that demonstrated the power of grassroots activism in a watershed night on November 4, 2008, when he was elected the 44th president of the United States, becoming the first African-American to hold the nation's highest office. Reflecting on the presidency, he offers a unique and thoughtful study of both the stunning reach and limits of presidential power, as well as a special understanding of the dynamics of U.S. party politics and international diplomacy. Obama brings readers to the Oval Office and the White House situation room, as well as to Moscow, Cairo, Beijing, and the dots beyond. We are familiar with his thoughts as he assembles his cabinet, grapples with the global financial crisis, takes action by Vladimir Putin, overcomes the seemingly insurmountable chances of securing the passage of the Affordable Care Act, clashing with generals about U.S. strategy in Afghanistan, tackling Wall Street reform, responding to the devastating Deepwater Horizon blowout, and authorizing the Neptune Spear operation that leads to Osama's death. The promised land is extraordinarily intimate and introspective - the story of one man's stake with history, faith orphaned tested on the world stage. Obama is outspoken about balancing the act of running for the post of a black American, in paining the expectations of a generation fueled by messages of hope and change, and the satisfaction of moral issues of high-stakes decision-making. He speaks candidly about the forces that confronted him in his family and abroad, spoke openly about how life in the White House affected his wife and daughters, and was not afraid to reveal doubts of himself and frustration. However, he never wavers from his belief that within the great, ongoing American experiment progress is always possible. This beautifully written and powerful book reflects Barack Obama's belief that democracy is not a gift of high, but something based on empathy and understanding and built together day in and day out. #BarackObama 254 PDFFace of Death (zoe premier Mystery-Book 1) Blake Pierce Release Date: 2019-11-29 Genre: Female Sleuth Size: 2.58 MB Nate Kokonaan... The book is called Gratefulf American, and I promise you after reading you will be grateful for what Gary has achieved and contributed to our country. - Clint Eastwood as a kid in the Chicago suburbs, Gary Sinise was more interested in sports and rock 'n' roll than reading or schooling. But when he impulsively auditioned for a school production of West Side Story, he found his purpose - or so it seemed. Within a few years, Gary and a handful of friends created what became one of the most exciting and important new theater companies in America. From its humble beginnings in the suburban basement of a Chicago church and the final move to the city, the Steppenwolf Theatre Company has launched a series of groundbreaking productions, igniting Gary's career along with those of John Malkovich, Joan Allen, Gary Cole, Laurie Metcalf, Jeff Perry, John Mahoney, and others. Television and film came calling soon after, and Gary starred in Mice and Men (which he also directed) and Stand, before taking on a role that will change his life in unexpected ways: Lieutenant Dan at the Forrest Gump Academy Award-winning Forrest. The embrace of the military community of the character of a disabled veteran was only a matter of depth to Gary's awareness that American defenders did not receive the honor, respect and gratitude that their victims deserve. After the 9/11 attacks, it became Gary's mission. While starting in his like Apollo 13, Ransom, Truman, George Wallace, CSI: NY, and Criminal Minds: Beyond borders, Gary worked tirelessly on behalf of those who serve this country, entertaining more than half a million service members around the world, playing bass with his lieutenant Dan, a band raising funds on behalf of veterans, and ultimately founding the Gary Sinise Foundation with a mission to serve and honor the defenders of America, those who need it. More than half a century ago, humanity first threw objects into space, and almost 50 years ago astronauts first went to the moon. Since then, we have explored Earth orbit through shuttles, capsules and space stations; sent robots to Mars, Venus, Mercury, Jupiter, Saturn and Uranus; Samples of the comet; Telescopes have been put into orbit; and mapped out most of our own planet. What will happen in the future? In Space 2.0, space historian Rod Pyle, in collaboration with the National Space Agency, will give you an inside look at the next few decades of spaceflight and long-term plans for exploration, use and settlement. No longer an exclusive area of government agencies such as NASA and other national agencies, space exploration is quickly privatized, with entrepreneurial startups building huge rocket boosters, satellites, rocket engines, asteroid probes, search ships, and even commercial lunar cargo landing craft to open this new frontier. Research into increasingly complex propulsion systems and life support systems will soon allow travel to Mars and destination deeper into our solar system. As these technologies continue to move forward, there are virtually no restrictions on human spaceflight and robotic research. While the world has been waiting since the Apollo lunar program for the next giant leap, these critical innovations, most of which are within
