Our priority: Education & Healthcare

Ngiti, which means smile in Filipino, promotes access to education and health for children in Bogo, Philippines.

Our main project in 2025 was the purchase and full customization of a medical van designed to reach children in the most remote villages around Bogo City. This mobile clinic allows the doctors from the Department of Education to perform essential health check-ups and dental interventions directly in the communities that need them most, removing the barriers of distance and transportation costs for families. We also built a new kindergarten classroom in the Dakit school, providing young learners with a safer, more spacious, and more supportive environment to begin their education.

In 2025, the region was hit by a series of strong earthquakes and typhoons. We quickly provided emergency funds to help repair damaged classrooms so that classes could resume as quickly as possible. The classrooms we previously built were designed to withstand such natural disasters, and thanks to their reinforced structure, they suffered only minor damage. Thanks to the huge generosity of our donors, we managed to raise in a few weeks enough funds to repair the classrooms that were built by Ngiti. The remaining funds will be channeled towards other schools that unfortunately do not have enough money for the repairs.

Next year, in 2026, our main goals are to ensure that all classrooms are properly and promptly repaired, and set up and further improve the use of our mobile clinic, probably including the purchase of additional equipment.

A message from our members

Recto Y. Toring

Responsible for Ngiti's projects in the Philippines

On behalf of the schools and the entire Division of City of Bogo, Bogo City, Cebu, we would like to express our deepest gratitude to the NGITI Association for your unwavering support and continuous commitment to improving education and community welfare.

We sincerely thank you for the successful construction of classrooms in five schools within the Division of City of Bogo. These projects have significantly contributed to providing our learners with safe, comfortable, and conducive learning environments.

Moreover, we are truly grateful for your immediate response in repairing damaged classrooms caused by natural calamities, particularly the magnitude 6.9 earthquake and its numerous aftershocks, as well as the devastation brought by Typhoon Tino and Typhoon Uwan. Your prompt assistance helped ensure the continuity of classes and restored hope to both learners and teachers during challenging times.

We also extend our heartfelt appreciation for the mobile medical and dental clinics you conducted. These initiatives greatly benefited our learners by addressing their health needs, which are essential to their well-being and academic performance. Your efforts have truly helped create a healthier and more conducive learning environment for our children.

Your generosity, compassion, and dedication to service have made a lasting impact on our schools and community. The NGITI Association stands as a true partner in nation-building and in shaping a better future for our learners.

Once again, thank you very much for your invaluable support. May your organization continue to be blessed with success in all your endeavors.

Arnaud Delamare

Member of the collegial delegation

This year marked a major milestone for NGITI with the successful realization of our medical vehicle project. Thanks to the trust and commitment of our supporters, we were able to secure the necessary funding through a diverse range of sources, including private donations, fundraising initiatives linked to sporting events, and continued support from traditional foundations. This achievement highlights not only the relevance of the project, but also the growing engagement of our community around innovative and concrete actions.

We now look forward with great hope to seeing the medical vehicle in action in the coming months. Its deployment will significantly improve access to preventive healthcare for children living in rural villages around Bogo City, contributing to better long-term health outcomes and earlier detection of medical issues.

This project would not have been possible without the exceptional collaboration between dedicated individuals in Europe and our partners on the ground in the Philippines. The close cooperation, shared values, and mutual trust across continents have been a true driving force behind its success.

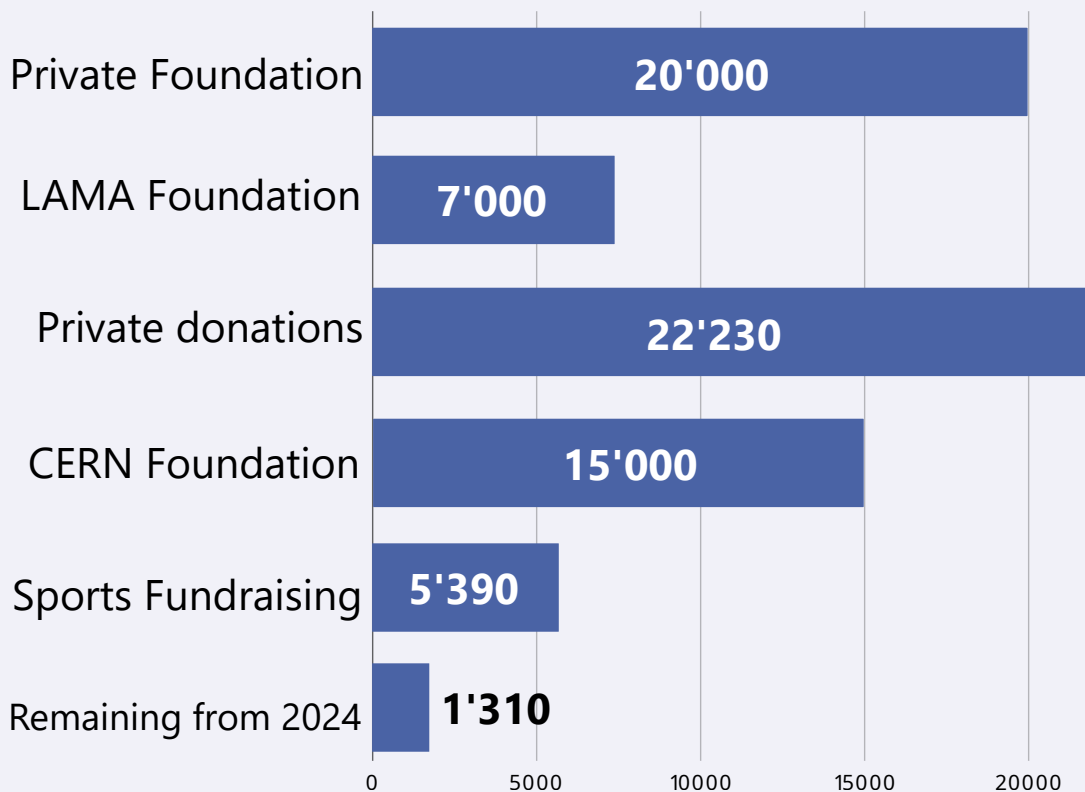

At the same time, the year was marked by hardship. We were deeply saddened by the earthquake and successive typhoons that struck Bogo City in October, causing severe damage within just a few weeks. In the face of this tragedy, we were profoundly moved by the generosity and solidarity shown by so many people, which enabled us to support the rebuilding of damaged classrooms and help restore safe learning environments for children.

FINANCIAL REPORT

2025 Donations

We are very grateful to all the donors. Without them none of the projects would have been possible.

A total of **69'690 €** got donated in 2025.

REPAIRING THE EARTHQUAKE DAMAGE

Thank you!

We hope to continue support the education and health of the children in Bogo in the future and need your help!

In 2026, we want to further improve our medical van by adding more equipment for children check ups. Any donations on ngiti.org makes a difference!

We appreciate the support of everyone!
