 FAQ

This is the HEIDELBERG SHERLOCK PLUS 6.85 serial number. By next month, additional products will be released and we will announce them here as well. A few days ago, I released to you a version of Heidelberg Sherlock 6.82 with a couple of fixes (you can download it [HERE](#)). Sherlock 6.82 includes a couple of minor bugfixes. According to the rumors, only one printer is in the works for a release next month. We'll do our best to publish all the details. Right now, there is no definitive information regarding the release of a new version. So, let's see if the creators keep their promises or not. If they don't, there is also a chance that we will get a new version next month.Q: Viewing user date of birth in Drupal I have a requirement to display a specific record on the user profile page for the current user (which works). I also need to display the users DOB in a special way. I have this code: \$result = db_query('SELECT * FROM {users} WHERE uid = :uid', array(':uid' => \$user->uid)); \$row = \$result->fetchObject(); \$user_dob = \$row->dob; if (\$user_dob) { \$form['dob'] = array('#markup' => \$user_dob,); } // Modify this if you need to display a different date format. \$form['format'] = array('#type' => 'textfield', '#title' => t('Date format'), '#default_value' => date_format_short(\$user_dob, 'd-M-y'),); I thought of trying to change the DOB in the database and run a sql query on the user table, but when a user's DOB is edited, it appears in the correct format, but the updated user isn't listed in the profile. I'm wondering if I should write a hook or is there another way to change the date format of the displayed DOB? A: I don't know how you're actually displaying it. I would suggest 520fdb1ae7
