Download

First, you need to tell the program that you are making a video. Open Camtasia and click the settings button on the top right corner. Click the File button and then click "New Video." Click "Start a new video." Click the "File" button and then click "New." Click "Start a new project." You can name the video project whatever you want. Click the stopwatch icon to the right of the button bar. Click the Edit button to open the timeline. Click on the "Insert an Audio Channel" button. Click the drop-down menu and choose "From the Timeline." Click the Stopwatch button to the right of the button bar. In the new window, click "Start a new video" and then click "Start a new project." Name the video project whatever you want. Click on the "Insert a Video Clip" button. Click the drop-down menu and choose "From the Media Library." Click the video clip and then click "OK." Click the "Start a new video" and then click "Start a new project." Click the audio channel button to the right of the button bar. Click the 520fdb1ae7
