In the last few months, basic income guarantee has ceased to be a simple idea and has become something that governments are willing to test in the real world. Finland has announced a big pilot. Four Dutch cities followed suit. And now two Canadian provinces are discussing their own trials. The concept of paying everyone so no one is poor to catch on to. Ontario's 2016 budget contains few practical details, but discusses the need for consistent and predictable support for working people in today's dynamic labor market. He notes that basic income is attracting attention in Canada and abroad, and that most new jobs these days are unsustainable. In Canada, temporary and part-time work grew twice as fast as full-time work between 1997 and 2015. The pilot project will test whether basic income will provide a more efficient way to support income, strengthen attachment to the workforce, and achieve savings in other areas such as health and housing, the budget document said. Meanwhile, the government in Quebec recently appointed Francois Blais, a longtime advocate for basic income, as Minister for Employment and Social Solidarity, leading to speculation that a political proposal might be imminent there. Philippe Couillard, the prime minister of the city, says basic income can simplify the social security system and encourage benefit claimants to work. Most of the new jobs these days are unsustainable. The case for basic income lies on the two main pillars. First, the work does not pay as it used to: the increase in non-standard employment leads to increased instability among workers, for which it is necessary to compensate. Secondly, the current system of public assistance is too complex, costly to manage and overly coercive. Basic income will allow people to spend their money, rather than being forced to accept benefits as cash services (e.g. health subsidies). Changing the economy means that, especially in Canada, but some people are not eligible. The basic income guarantee gives everyone that foot to make a better life for The Liberal Party, currently in Ottawa, mentioned the main income in its election manifesto (albeit in the most confusing way). In the past, the federal Minister for Family, Children and Social Development, Ian-Yves Duclos, appears to have studied basic income options. Ontario and Quebec will probably have to cooperate with the federal government if it goes ahead with the basic income of pilots. If you take all the revenue support programs in the provinces, dump them together and cut administrative costs, you probably have enough money to pay for the program, says Culbert (although exact payment amounts haven't been discussed so far). Canada has a history with basic income. In the 1970s, the town of Dauphin in Manitoba conducted a five-year Munko test, a basic income option. About a third of residents received monthly checks. (For two-person families, the annual amount in 2014 was about \$20,400). Although the city has never published a report on the impact of the experiment, subsequent studies show that the payouts had a positive effect. Among recipients, hospitalization rates have declined and secondary school completion rates have increased. This experiment was a long time ago, however. The new pilots should give us a better idea if the basic income can work today. If you are thinking about buying a new car, it is important to take it for a test drive, so you know that it is a really good fit. But a worth-of-test drive involves more than just taking one to do and model on your back around the parking lot. To do it right, you need a little research and a lot of patience. Do your research. In order to properly test drive the car, you want to do your research in advance. Find out how much you can afford to spend and then choose a few vehicles that fit into your price range and have the convenience you need. If you have a hard time of choice, it can help to read some online reviews and hear what others are saying. Pay attention to the specifications that are important to you, which may include vehicle size, specific technical features, and towing capacity. Once you've done that, narrow the list down to three or four options available. Having scheduled a few meetings. This will give you a great excuse to quickly move from one dealer to the next, so you can think about your options before making purchases. It will also show the dealership you are a serious buyer rather than a browser and they are more likely to have your car built up and ready to drive as soon as you arrive. To make sure that all the vehicles that you test driving remain fresh in your mind, it is a good idea to try to test drive all the vehicles that you are considering on the same day. way you'll be able to make direct comparisons. Bring a friend. It is important to have a second opinion that is not trying to sell you anything. A A You don't need them to get behind the wheel, ask them to pay attention to how smoothly the car drives from the passenger's point of view. Too much noise? Acceleration jerky? These are all things you may miss if you are just focused on handling a new vehicle. Bring your usual accessories. Do you head to the slopes every weekend, play bass in a jazz band, or a hefty car seat? Bring these items together and make sure they fit into the vehicle you are driving. Pay attention to the entrance and exit. Is it easy to crash into and exit the driver's seat? Notice the driver's seat. Are you comfortable behind the wheel? If you have a much taller or shorter partner, will they be comfortable behind the wheel? Can you easily get to the pedals? Is there enough support for the back, head and neck? Do you see all the mirrors? Can you easily achieve climate control and stereo? Are the preparations conveniently placed and deep enough to avoid a morning coffee spill? Check out the technology. Does the backup camera provide a useful view? Can you figure out the infotainment system and GPS? Can your phone mate via Bluetooth? Is steering and audio intuitive and easy to use? Is the trunk and rear doors easy to open? Take it on a realistic drive. If you frequent commute on the highway, make sure your test drive includes a spin on the freeway. You should see how the car handles on situations that you will encounter often, not just around the parking lot. Notice what you hear and feel: Is there a lot of noise when you accelerate? Does the car accelerate and rise smoothly to the hills? Do breaks work well? Is the steering smooth and responsive? For a while to think about it. Buying a new car is expensive and it is not a decision you should rush into. Take a night to view your notes and sleep on it before making a final decision. There is nothing worse than allowing a little momentary excitement to push you to make a financial decision that you will regret. The province of Ontario is one of 10 provinces and three territories that Canada has entered. The word Ontario occurs the Iroquois word meaning a beautiful lake, beautiful water, or a large body of water, although experts are still unsure of the exact translation of the word. The water origin of the Ontario name is appropriate given there are more than 250,000 lakes in the province that make up about a fifth of the world's fresh water. Naturally, the name first refers to Lake Ontario, the easternmost of the five Great Lakes. It is also the smallest Great Lake by in addition, all five Great Lakes have a border with the province. Originally called Upper Canada, Ontario has become the provincial name it and Quebec separated in 1867. Ontario is by far the most populous province or territory, with more than 13 million people living there, and is the second largest province by area (the fourth largest if you include the Northwest Territories and Nunavut). Ontario contains both the nation's capital, Ottawa, and its largest city, Toronto. One of Canada's 13 provinces and territories, Ontario is home to more than a third of all Canadians, as well as the financial capital of Toronto and the national capital, Ottawa. Ontario is much more than just a hub for stock brokers and politicians though. This luxurious slice of Canada has a wide range of geography that includes thousands of protected lakes and forests, charming small towns, historic sites, and bustling, multicultural centers. Canada's second-largest province after Quebec, Ontario is about the size of California, Nevada and Arizona combined. Its population is highly centralized in the Golden Horseshoe region, which wraps the western end of Lake Ontario. This region is particularly popular with visitors because it has a convenient one-two whammy attraction that is Niagara Falls and Toronto, just 1.5 hours away from each other. Once you head north to the Golden Horseshoe, the population thins sharply, with the northern region consisting of about half of Ontario being essentially uninhabited. When you plan your Ontario travel itinerary, don't forget the size of Ontario and how you'll get from place to place. Bypassing the entire province takes more than 24 hours, and the roads can be mighty sturdy in places, not to mention what it wanted to get around in winter. When you visit, here are some of the areas and activities that don't miss out. 01 of the 10 DenisTangneyJr/Getty Images In many ways, the capital of Canada, Ottawa, is like the country itself and the people who live there: not too flashy, a little low-key, but storied and cultural. Located in the northeastern part of central Ontario, about five hours from Toronto (but only two from Montreal, Canada), Ottawa is slightly separated from the more populous region of southern Ontario. Rewards for the effort to visit this part of the province, though enough. The striking and rigorous Gothic architecture of the revival of the houses of Parliament and Chateau Laurier swaddled Ottawa in history and formality, but a well-laid out urban plan that is human in scale and pedestrian friendly brings the city to earth. Many of the best things to do in Ottawa are affordable or even Parliament tour, skating on the famous Rydo Canal (UN World Heritage Site) or wander around the charming Byward market are just some of the inexpensive options in Ottawa. The city is full of interesting museums and galleries such as the National Gallery of Canada, the Air and Space Museum and the Royal Canadian Mint. Head close to the city limits and you have a mile and a mile Gatineau Park in which you can hike, camp or just breathe fresh air. 02 out of 10 Niagara Falls is particularly impressive given that it is plopped into the heart of Canada's most populous region in southern Ontario, rather than in some deep, remote brush or canyon. Easily a 1.5 hour drive from Toronto and 30 minutes from Buffalo, Niagara Falls is both an Ontario city and what three waterfalls (two on the American side and one on the Canadian side) have become known collectively. The largest waterfall, the onion-shaped waterfall of the forged, is Canada's contribution to the aquatic trio; millions of visitors a year come to not only look at the power and wonder of the waterfall, but to take part in the bustle of the whole city, which is chock full of tourist attractions, hotels and restaurants. 03 of the 10 TripSavvy/Kristjan Vaski congested, noisy and multicultural. Toronto is a constant buzz of excitement involving heaps of big city attractions like malls, theaters, museums and more. Located along the shores of Lake Ontario, Toronto is a city rich in Canadian heritage but has grown to include diverse, ethnic regions that thrive downtown. The contrasting patchwork of neighborhoods, from Little Italy to Greektown to the funky and eclectic Kensington Market, is one of Toronto's most compelling features. Toronto splashy, big-ticket attractions include CN Tower, Eaton Center, Ripley Aquarium, Royal Ontario Museum, and Wonderland Canada. If you're planning to visit a few attractions, consider getting a Toronto City Pass that gets you half the admission price and VIP entry makes it easy to save money on some of the city's main attractions. 04 out of 10 Wine tasting is more than just consuming delicious nectar; it's an all-time transition from winery to winery in a divine setting, chatting with friendly, informed sommeliers and walking away with not only some beautiful vintages, but more complete appreciation and love of the region. So, what better way to get to know Ontario than to drink its wine? Ontario has several wine regions, the most notable of which is the Niagara region, just a grape sucker from the brush and bustle of Niagara Falls. Sitting at about the same latitude as the famous wine regions like Languedoc and Provence in France, the Niagara region grows many of the same grape varieties with great success. In addition to the traditional such as pinot noir and Riesling, Niagara is famous for its sweet iced wines and late-harvest wines, which are made from grapes of grapes frozen on the vine. Aside from the Niagara region, Prince Edward County - halfway between Toronto and Montreal - and Pelley Island, on Lake Erie, produce enough wine that the tourist industry has sprouted around them, making both delicious little getaways. Although the height never gets too high as the famously mountainous western Canada, the Ontario landscape features thousands of lakes, rocky or sandy coastlines, rocky cliffs, meadows, ancient forests, and more. Even city centers offer tourist opportunities, because nature is never far away. Even in Toronto, anyone who wants to enjoy the big street can do so without leaving the city in Rouge National City Park offers everything from hiking trails to campsites. Some of Ontario's most famous hikes include along the Bruce Trail, Canada's oldest and longest marked footpath, and the Waterfront Trail, which stretches along Lake Ontario connecting cities and communities. Government initiatives, such as national and provincial parks programs, regulate a huge network of routes that make them clear and visible. 06 of 10 Basia Asztabska/Getty Images Camping is one of the most popular summer events in Ontario and even in the capital Toronto, camping is never far away. Some of the most famous camping awaits in the northern part of the province, where urban sprawl gives way to the rugged, forested landscape of the Canadian Shield. There are far beyond the 300 national and provincial parks in Ontario, many of which support campsites that are open to the public. Some of the most popular include Algonquin and Killarney Provincial Parks. A simple online booking system allows you to book a camping trip five months ahead of time. Popular campsites go fast, but you can always check online for last minute orders or just show up. Ontario Parks is committed to all to develop a love of camping and offers a learning camp program in which beginners can participate in a guided night camping experience. Further camping in Ontario is easy and accessible parkbus, an express bus connecting major cities with campsites, canoe access points, lodges, and hiking trails. 07 out of 10 Ontario is home to a cultural group of people, and almost any of its cities will have a live theater in the registry of things to do, including Toronto, which is almost on par with New York and London for its first-year theatrical productions. Even more distinct though are two relatively small town festivals that have a great deal not only for locals but theatricals around the world, Shaw and the Stratford Festival. Shaw puts productions of Bernard Shaw and his contemporaries from April December in the picturesque city of Niagara-on-the-Lake. The Stratford Festival includes the best theatrical works in the classical and contemporary repertoire, with a special emphasis on works by William Shakespeare, in Stratford. In both cases, the cities are compelling as theatrical productions, full of artsy shops, boutiques and restaurants in delightful locations on the beach. 08 out of 10 dotted across the province is a wide range of resorts, from basic to chic, allowing visitors to immerse themselves in Ontario outdoors without having to pitch a tent. Many of these resorts are close to the water, ski hills, golf clubs, and hiking/mountain cycling trails and are open all year round, offering seasonal entertainment and entertainment. Some resorts will have separate cabins in place, perhaps with kitchens, for more private accommodation. Rooms can also be located in the main or adjoining cottage. All guests have access to the resort's activities and amenities, which usually include swimming pools, ping pong or pool tables, games, boats, snowshoes and more. Some of Ontario's most popular resorts include Deerhurst in the exclusive Muskoka area, known for its wealthy cottage owners and abundant small lakes, Elmhirst, further east and closer to Toronto and Blue Mountain, best known as the province's best ski destination. Continue to 9 out of 10 below. 09 of the 10 Barrett and Mackay/Getty Images Ontario and Niagara Falls are Ontario's biggest attractions for their brush and splash, but you won't regret putting small towns on your travel itinerary. Ontario's most charming small towns convey unique aspects of the country's history and character, providing visitors to the region with a more complete Canadian experience. They also have more intimate rooms, often in picturesque and historic buildings such as the Millcroft Inn, a former cereal factory in the Hills of Caledon, or the Prince of Wales, a vintage hotel in Niagara-on-the-Lake. Elora, for example, is located next to the fast-paced Grand River and is located above the Elora Gorge; it features beautiful masonry dating back to the 1800s and many of the original buildings have been converted into boutiques and restaurants. Dundas, this delightful village located in a deep valley, the geographical positioning that saved it from urban sprawl suffers so many other cities. His main resistance is to wander through galleries, shops and local dishes. 10 out of 10 Derek Coffey/FOAP/Getty Images Ontario is a large province, about twice the size of France. If you are in Toronto and want to drive west to the next province (Manitoba), prepare yourself for about 24 hours in the car. Getting to northern Ontario is time consuming, but the rewards are a lot. As you move further from commerce and Toronto, notice how the population is thinner and the pace of life slows. Slows down. exciting cities for sure, but unique adventures that are more about finding the world in nature and less about being and buying things, making Northern Ontario such a compelling destination.
