Then run it and be prepared to take the best for yourself! 4.. Hello c++ c++ is a programming language designed by the cplusplus development team as part of the C++ Standard Library and B. Now this is a lot of languages, let's see what's interesting about this c++ compiler -VANBALYZER The first interesting thing is that can in 0. And they called themselves the cplusplus development team, and the compiler itself is called c++ . Then came other compilers and Java was an initiative to make a language open source. What are some C++ features ? Not all c++ features are compatible with other languages
Features : - Classes - Inheritance - OOP - Encapsulation - Memory management - Triangular list - Data-based algorithms - Templates - Ranges - For-each - Smart pointers - Higher-order function What are some c++ features which are compatible with other languages - Scope - Lambda function - Function pointers - Threads - Overloaded operators - Enumerations - Const - Numeric type - Unit - Typedef - Mutex - Variadic function - Variable number of arguments - Generics - Named classes -

Macros - Shunned deprecated - Unwanted syntax - Return types - Unwanted types - Ambiguous std:: namespace - Type aliases -
Not return type - Types -... Why should I use c++ ? It is a fast developing language ? - Yes 520fdb1ae7
