Personality Assessment

Personality tests are designed to measure a candidate's internal characteristics, such as feelings, attitudes, motives, and so on.

This may sound at first like a sophisticated test you cannot prepare for and whose results you are unable to affect, but, the truth is that you can.

The essence of these tests is that they supply the respondent with direct questions for which the respondent must provide an answer.

Personality tests use the ability possessed by all human beings to offer information about their life events and experiences as well as their otherwise unobserved thoughts and feelings.
