## Zf 8hp45 repair manual

The 8HP45 (8HP70) automatic transmission has been released as an advanced version of previous versions of 6HP21 and 6HP32. This gearbox was designed as a bestseller, which was to surpass all predecessors. As a 6-staged predecessor 6HP21-26 and Japanese - Aisin TR60-80 in profitability and dynamic characteristics. And, of course, he had to surpass in the comfort of the main competitor: Getrag with its pre-selected gearboxes. And it really is, the zF8HP began to be delivered at auto plants with the same price as the 6-staged predecessors, having to fit in the same weight and volume, and surpassing them in all characteristics as each new iPhone surpassed the previous version. Fluid change capacity: 8 litre Type: 4-50 deg C transmission fluid check between 40 - 50 deg C. The Teardown Video Automatic transmission 8HP45/70 Transmission was put into production in 2008 and after a short launch on BMW, the 7th Series of the F8HP began to be widely installed on cars with a maximum torque of 450 nanometers for gasoline engines (8HP45) and up to 700 nanometers on 87HP for BMW diesel engines. Apparently, from this ratio, the numbers 45 and 70 in the name of the gearbox is the index of maximum torque. In the coming years, the FCA has expanded the range of automatic transmissions of this stirpes from 8HP23 to the class mini with engines of 1.6 liters to 8HP90 for cars with 6-liter engines. The success of these transmissions exceeded all expectations and generated many enthusiastic responses. And children's diseases were very quickly corrected by the sellers of automatic transmission. Mixing 8-st automatic transmission installed 8HP45 - on BMW 1st, 3rd, 5th series, with gasoline engines (also analogue 845RE - on some Chrysler cars). On The Volkswagen Amarok - under the name: AL450 (serial transmission number - OSM) Version 8HP55AF for quattro Audi A7, A8, No5, etc. was launched in 2011. The 8HP70 - sometimes presents on BMW 3rd, 5 series diesel engines, American X3, X5, X6 and other cars.
