

# The Proper Way To Tie A **Red Bag**

## STEP 1

While wearing gloves, gather the four edges of the red bag from the sides of the container. Twist the top of the bag to seal its contents.

## STEP 2

Secure the seal with a strong, hand-tied single or gooseneck knot to prevent any leakage if inverted.

## STEP 3

You can also use a zip tie or tape to secure the knot. Ensure that the bag is completely closed.
