Select the installation folder in the Windows directory and click on the Finish button to start the installation. Windows 8, Windows 7 and Windows Vista Select the language from the list below and click on the Next button to start the installation. Safe Cyber Monday Staying safe online is easier than you might think. With the right setup, you don't have to give up your favourite social media site and stay offline. While it's easy to fall for cyber scams, there are things you can do to protect yourself. Stay Safe First, know your risks. There are several types of cyber scams. With some websites, it's difficult to tell if you're actually being scammed. If you think you've been scammed, don't respond to the scammer. You may be enticing the scammer to add more funds to your account. You can also use the steps below to lock your credit card account. Warn Others Second, talk to others. There are several ways to protect your personal information online. For example, you can use your mobile phone to check your bank account or credit card balance. You can also check up on your email address by confirming your email address. This way, you can get your hands on any new emails before your computer and internet provider does. Secure Your Device As far as your computer and mobile phone go, you can download and install antivirus and security software. You can also make sure your device is secure by downloading an anti-malware program, which will detect and remove any viruses or malware. Your computer and mobile phone are two of the biggest threats online. It's also possible to pay via smartphone apps. This means that you can pay without worrying about your personal information, like credit card information. To use your smartphone to pay, go to an app store on your mobile device. Once you're there, type in the store you want to use and find the "Pay with an App" tab. You'll see a list of apps that are safe to use. You can even use the Apple App store on your iPhone or Google Play store on Android. Depending on where you live, the laws will likely protect you from fraudulent acts, like theft of your personal information. You should contact the police in your area and the police should be able to help protect you. Contact your internet service provider to see if your 520fdb1ae7
