ONLY TO **SATISFY GLOBAL**  
CUSTOMERS AND PROVIDE  
**BETTER QUALITY**

只为满意全球客户，只为提供更优品质

[www.mirsew.com](http://www.mirsew.com)

宁波美之缝机械有限公司位于中国浙江省宁波市，是一家为集产品研发、设计、试制、生产、检测、销售以及售后服务为一体的现代化企业。

公司专业生产各种缝纫机。产品主要应用于服装制造、皮革工业、帆布、室内装饰、汽车、制鞋、箱包工业等领域。产品远销欧美、中东、东南亚等100多个国家和地区。公司在行业内较早的通过了ISO9001：2008质量管理体系，产品实施全球化的营销策略，并以其信服的质量和优良的服务赢得了消费者的信赖。

一直以来，公司始终坚持“永不满足，实现理想”的主题理念，致力于创造缝纫机经典。

**我们的宗旨：“精心打造完美品质”；**

**我们的发展目标：“一丝不苟、精益求精，不断满足客户需求”；**

**我们的精神：“奋斗不息”；**

随着中国服务行业快速向国际化接轨，我们充分发挥MIRSEW人勤于思考、善于创新的特长，发挥自身优势，携手客户共同探索未来，携手共创辉煌。

NINGBO MIRSEW MACHINERY CO.LTD. is located in Ningbo, Zhejiang Province, China. It is a modern enterprise that integrates product research and development, design, trial production, production, testing, sales, and after-sales service.

The company specializes in producing various sewing machines.

The product is mainly used in the fields of clothing manufacturing, leather industry, canvas, interior decoration, automobiles, shoemaking, luggage industry, etc. Our products are exported to over 100 countries and regions including Europe, America, the Middle East, and Southeast Asia. The company has passed the ISO9001:2008 quality management system earlier in the industry, and implements a global marketing strategy for its products, And it has won the trust of consumers with its convincing quality and excellent service. Throughout, the company has always adhered to the theme of "never satisfied, realizing ideals" and is committed to creating classic sewing machines.

Our aim is to "meticulously create perfect quality";

Our development goal is to be meticulous, strive for excellence, and continuously meet customer needs;

Our spirit: "Striving endlessly";

With the rapid internationalization of China's service industry, we fully leverage the strengths of MIRSEW people who are diligent in thinking and good at innovation, leverage our own advantages, and work together with customers to explore the future and create brilliance.

# COMPANY PROFILE

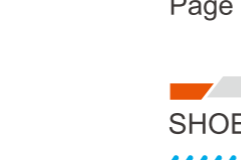

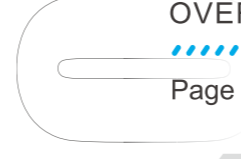

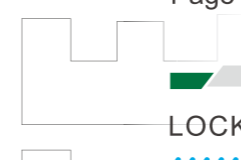

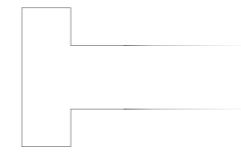

产品远销于欧美，东南亚等 **60+** 个新兴国家

Products are exported to more than 60 countries such as Europe and America and Southeast Asia.

# SYMBOLS

					
Flat bed	No. of threads	Top and bottom feed	Light-weight material	Roller presser foot	Width of edge cutting
					
Flat bed	Style	Unison feed	Medium-weight material	Straight line bartacking	Thickness of cloth cutting
					
Box type	Needle	On the differential travel	Heavy-weight material	Thread wiper	Mode of adjustment in sewing space
					
Post bed	Needle gauge	No. of needles	Thin thread	Thread trimmer	Button type adjustment
					
Cylinder type	Stainless steel	Sewing speed	Medium thread	Button diameter	Needle gauge
					
Cutter scissors	Function	Sewing speed (with controller)	Heavy thread	Attaching form	Amplitude of needle fluctuation
					
Horizontal hook (standard)	Stitch length	Lift of the presser foot	Special heavy thread	Reverse stitching	Diagram conversion
					
Horizontal hook (large)	Stitch length	Main feed amount	Extra heavy-weight material	Alternation range	Bar-tacking length
					
Vertical hook (standard)	Stitch width	Differential ratio	Motor	Looper	Bar-tacking width
					
Vertical hook (large)	Bottom feed	Differential feed amount	Split needle bar	Catcher	Twin needle gauge
					
Shuttle hook	Differential feed	Differential ratio	Needle stroke	Sewing mode	Packing
					
Electronic thread tension	Needle feed	Cutter	Wheel feed	Cloth blade	Net/gross weight

全自动折缝下摆机  
Automatic Coverstitch Bottom Hemmer

1. With high sewing speed, which is 4000 rpm;
2. And one machine can produce 180-240 pieces per hour;
3. One worker can operate two machines simultaneously, which improves the production efficiency and saves labor costs;
4. This production quality qualification rate of this machine is about 97% and the product downtime rate of about 1%.

**MS-BAF**

自动折袖口&下摆缝切装置  
Auto Folding Cuff&hem Sewing Device

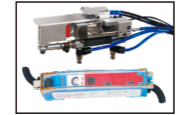

Automatic folding cuff & hem sewing device: automatic control, that novices can use as simple operation, uniform high quality and efficiency several times.

M3:DD servo motor controller box P

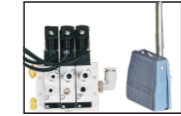

TD20:Auto thread trimmer device (Optional)

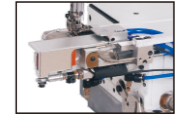

BAF:Auto folding cuff & hem sewing device Correlation sensor

P:Foot lifter F:Air reaulator (Filter)

S3:Solenoid valves Knee Switch

MINI-BAF:For super finehead coverstitch M/C Auto folding cuff & hem sewing device (Optional)

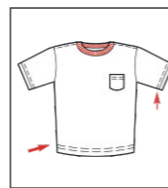

**MS-G201**

自动折缝(片式)下摆机  
Automatic Folding (Plane Type)  
Hem Sewing Machine

Product introduction:

1. Suitable for T-shirt single-piece automatic folding and swinging sewing;
2. Synchronized sewing of patented vice-hangers;
3. Operation of the first undercut sewing process;
4. Automatic folding pendulum device to control folding distance;
5. The starting and ending stitches are exactly the same;
6. Automatic Induction Blowing Auxiliary Device;
7. Visual Intelligent Operating Panel Control.

Power	AC220V
Rotation speed	3600-5000RPM
Capacity	400PCS/hour

**MS-SAF**

自动折缝(片式)下摆&堆栈机  
Automatic Folding (Plane Type) Hem Sewing & Stack Machine

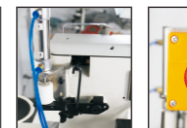

1. Hemming flat garments of T-shirts, polo shirts and similar garments;
2. This machine is economic and does not need much operation skills, realizing the folding sewing work that needed complex automatic equipment. This machine simplifies the complicated sewing process, smarter, easier to operate;
3. The operator simply places the fabric. Then the sewing unit automatically performs the hemming operations, providing uniform and quality products. The operator then prepares the next fabric in sequence, and production is greatly increased;
4. The sewing unit is equipped with a variable top feed, and the top feed can help feed the fabrics stably, so the twist in hemming operations can be avoided;
5. Hemming width:20-30mm.

High sensitive photoelectric equipment

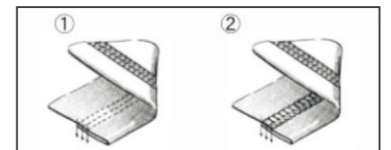

Rear puller device

Automatic presser foot lifting device

Emergency start/stop button

**MS-G1601**

自动T恤上圆领包缝机  
Automatic T-shirt Neck Joining Machine

**Advantages:**  
Circular rib elastic band for sewing T-shirt round neck and waistband. Sewing t-shirts, belts and other woven products of the circular rib elastic belt, as long as the collar set in the sewing machine on the guide rail, adjust the front and rear tightness and the corresponding width, just focus on the control of body seam material can be ribbed width sewing uniform, improve the efficiency of collar and product quality.

Air pressure	0.6MPa
Rotation speed	4500RPM
L*W*H	1.38*0.78*1.36m
Sewn collar width	1-4CM
Sewn collar size	20-100CM
Collar tightness	2-9CM
Accuracy rating	±2mm
Waistband size	35-140CM
Capacity	145PCS/ hour

**MS-AC1501**

自动上罗纹袖口机  
Automatic Rib Cuff Sewing Machine

**Advantages:**  
1. Equipped with a puller to keep the fabric stable during operation;  
2. Electronic control system automatically adjusts size, pneumatic/ electric automatic size control;  
3. Equipped with automatic material collecting device, automatic expansion device, automatic thread trimming, etc;  
4. Suitable for sewing the cuffs of sweatshirts, sports pants, etc.

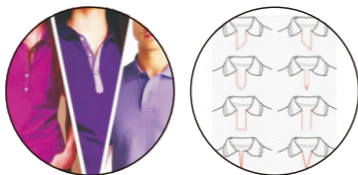

**MS-MJ02**

电脑门襟缝纫机  
Automatic Placket Setting Machine

1. Intelligent control improves production efficiency and is easy to operate, workers can learn simple operations in 20 minutes;  
2. Apply famous brand elements;  
3. Independent cutter device: apply dual shaft structure, assure stable movement and less wearing for cutter;  
4. Intelligent touch screen: Micro computer control, there are 2 standard modes: single / bilateral placket solution;  
5. The slotless moving needle plate ensures smooth movement of the fabric during sewing and keeps the fabric flat.

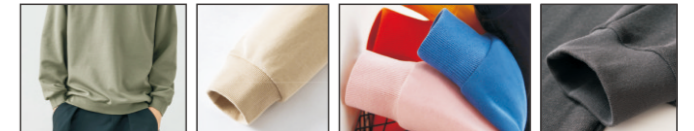

Model	MS-MJ02
Air Pressure	0.5-0.6Mpa
Needle	DBX1(10#,11#,12#)
Sewing Precision	±0.02mm
Sewing Needle Pitch	1.00-5.00mm
Sewing Speed	400-4000rpm
Sewing Width	1.00-50.00mm
Sewing Length	1.00-320.00mm
Packing Dimensions	1680Lx950Wx1450H mm
Gross Weight	373kg

**MS-G997**

高速自动翻切螺纹袖口机  
Automatic Rib Cuff Sewing Machine

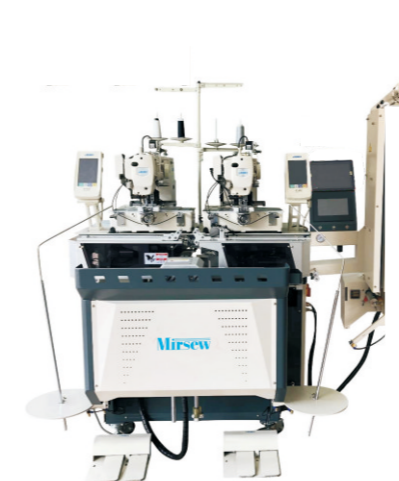

Applicable to thread sewing of various cuffs and cuffs

This equipment can be used to flip and cut various rib cuff, and the maximum speed is about 60pcs per minute.

1. It can be matched with various brands sewing machine;
2. Self-compiled control program can change various cutting methods according to customer requirements;
3. Multi-group memory storage, quick and convenient for switching and calling at any time;
4. The ingenious and coherent mechanical structure design makes the turn-over and material collection complete at one time, thus achieving high efficiency.

Flipping half size	4-12.5cm
Flipping width	4-11cm
Efficiency(minutes)	60
Voltage	AC110/220v
Air pressure	>0.8kpa

高速模板机  
High Speed Template Machine

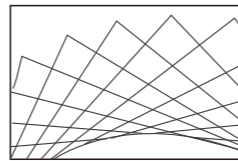

**High Efficiency, Energy saving and environmental protection**

1. Dry-head, oil free, without stains on materials;
2. Maximum speed 3300RPM, intelligent and efficient;
3. Intelligent winder for hook winding quantity;
4. Servo-actuator drive performance is more superior, higher precision;
5. New auxiliary presser foot, convenient for height adjustment;
6. Automatic hook-changing;
7. Intelligent medium pressure foot, suit for high and low stitching, down proof, avoid start sewing stitch loose;
8. Intelligent electronic tension devices, the tension of forward and back stitches and the tension of light and heavy material line changes automatically.

高速厚料智能模板机 (机头360度旋转)  
360° Head Rotation Template Machine

1. The machine head can rotate 360° freely, which can achieve perfect stitches in all sewing areas and ultra-thick materials;
2. X and Y direction screw feeding and synchronous belt feeding to choose;
3. The automatic refueling system of the rotary hook uses a double-capacity hook to reduce the frequency of replacement and improve work efficiency;
4. Presser foot fine-adjustment structure. The height of the presser foot is finely adjusted by the motor;
6. With code scanning function;
7. Standard configuration of upper thread breakage detection device, in case of thread breakage or no bottom thread during sewing.

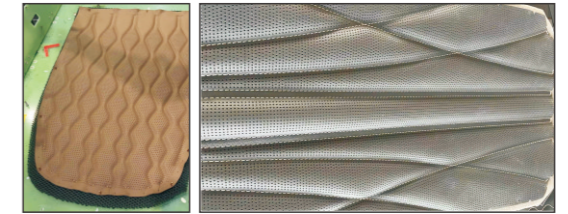

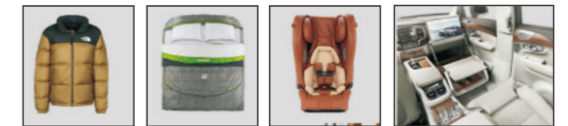

Model	MS-1391H-360
Sewing Space	1230x910mm
Sewing Speed	2200rpm
Stitch Length	0.5-12.7mm
Working Stroke	21.5mm
Presser Foot Lift	4mm
Needle	DPX17 18-21#
Number of stored patterns	999
Power	800W

**MS-1290H-360T**

伸臂旋转式独立驱动花样机 (升降机头)  
Programmable Independent Drives Pattern Machine With Rotary Lifiable Head

1. The machine head can freely rotate 360° and lift up and down, suitable for sewing ultra-thick materials;
2. It adopts a 15-inch wave crystal screen, which can realize WIFI networking. It comes standard with a CF card slot and USB interface;
3. Precision operation control of the machine head and machine tool, rotation angle control unit: 0.05°;
- 4 Presser foot fine adjustment structure, finely adjust the presser foot height through the motor;
5. It has chip scanning and sensing function;
6. Adopt a double-capacity hook and rotary hook automatic refueling system;
- 7 Standard surface thread breakage detection device.

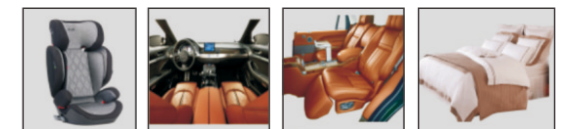

**MS-2225H-360TT**

龙门旋转式独立驱动花样机 (升级机头)  
Independent Drives Rotary And Lifiable Head Quilting Machine

1. The machine head can rotate freely 360° to perfectly sew stitches in any working range. The machine head can be raised and lowered, suitable for sewing ultra-thick materials;
2. Sewing range 2200mm\*2500mm. Can be customized according to customer needs, the maximum sewing range can reach 3200mm\*5000mm;
3. Precise operation control of the machine head and machine tool. Rotation angle control unit: 0.05° Independently driven machine tools and machine heads reduce rotation amount errors;
4. It adopts a 15-inch LCD screen and can realize WIFI networking. It comes standard with a CF card slot and USB interface. By using a U disk or card reader, data can be imported and output from various memories (storage: FD, SM, CF, SD card, etc.);
5. Automatic tool switching device can be equipped according to process requirements;
6. Hook automatic refueling system, using a double-capacity hook to reduce replacement frequency and improve work efficiency;
7. It is equipped with a standard upper thread breakage detection device. If the thread is broken or there is no bottom thread during sewing, the sewing operation can be stopped automatically.

**MS-530A**

全自动小型线上模板机  
Automatic Template Sewing Machine

It can be used for automatic sewing of small and medium-sized sewing process templates of various clothing, easily integrated into the clothing production line. Does not affect the layout of the production line, high efficiency, beautiful stitches no skilled workers.

**Anti-bird nest function:**

Grab type anti-bird's nest structure, sewing wireless head, easy to achieve the bottom line surface line exchange.

**Professional press foot design:**

1. Single-force guide press foot, effectively improve the template flattening effect not easy to misposition, not easy to clamp, compared with ordinary press foot.
2. With the press foot, it can be programmed according to the thickness of the sewing fabric. The height of the press foot changes with the sewing, which makes the pass more stable and the stitch more beautiful.

**MS-530AQ**

全自动小型线上带刀模板机  
Automatic Template Sewing Machine With Blade

- Intelligent
- Energy Saving
- Efficient

- Automatic piece-counting function.
- Automatic thread-broken alarm function.
- Bobbin thread running out alarm function.
- Electronic pressure foot function.
- All functions of the pattern-sewing machine(optional).

Down Jacket Process Decomposition

① 袖口拉松紧

② 上袖口

③ 上拉链

④ 合缝

⑤ 门襟止口

⑥ 上袖

① 袖口拉松紧 **MS-S5490-SX**

1. It is convenient for sewing small-diameter round materials, and can be equipped with an auxiliary device to achieve elastic sewing of cuffs.
2. Stepping motor controls of stitch length and backstitch

② 上袖口 **MS-S5490-SX**

1. Cylinder bed is perfectly suitable for sewing the cuffs.
2. Integrating the main servo system and auxiliary programming system into one
3. Using servo motors to control the capacity of each segment, it can be divided into up to 9 segments
4. Suitable for various fabrics

③ 上拉链 **MS-5493-K**

1. With upper and lower differential feeding function.
2. Application for various step of sewing.
3. The zipper is sewn to even fit with the clothing.

④ 合缝 **MS-5490A-D4**

1. The sewing stitches is more beautiful on elastic ultra-thin fabrics, and the material feeding is more smoother on thick materials.
2. For sewing fabrics with unequal lengths, perfect stitching can be completed through differential programming.

⑤ 门襟止口 **MS-5490A-D4**

1. The sewing stitches is more beautiful on elastic ultra-thin fabrics, and the material feeding is more smoother on thick materials.
2. For sewing fabrics with unequal lengths, perfect stitching can be completed through differential programming.

⑥ 上袖 **MS-S5490-A/SX**

1. Integrating the main servo system and auxiliary programming system into one.
2. Using servo motors to control the capacity of each segment, it can be divided into up to 9 segments.
3. Adapt to the sewing needs of various fabrics (general fabrics/iron-free fabrics/chiffon/velvet fabrics, etc.).

1. The powerful feeding system with bottom feed, needle feed and alternating top feed guarantees trouble-free and displacement-free material feed;
2. The lifting height of presser foot up to 20 mm which facilitates the feeding and removing of heavy weight materials;
3. The high top feed stroke up to 9 mm allows a safe climbing over differently high material plies;
4. Large working space (335mm width and 295mm height) which is easier for sewing large area materials.

**MS-EX5102**  
双针杆床垫包缝机  
Mattress Overlock Sewing Machine (2 Needle-Bar)

- 1.Synchronous feeding structure with excellent feeding performance, even very thick fabrics can go through easily while it often failed in other types of sewing machines;
- 2.Both thick and thin fabric can be easily processed;
- 3.Automatic cooling and lubrication system;
- 4.Lubricate system did optimization more durable, high speed reach to 3500rpm;
- 5.Pneumatic pressure foot lifter,needle gauge can choose from 16mm/27mm/35mm or customization.

**MS-MO6904**  
双针杆床垫包缝机  
Mattress Overlock Sewing Machine (2 Needle-Bar)

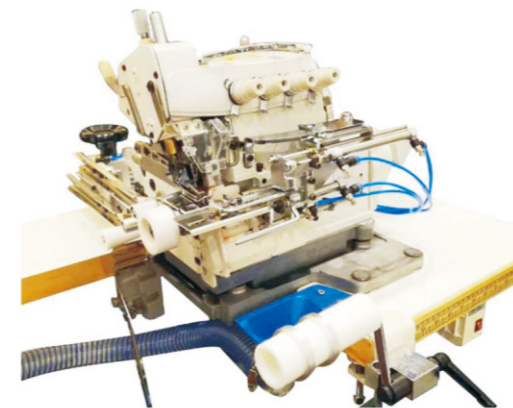

It is used for mattress and over-thick fabrics flanging. It can also sew the non-woven fabric with mattress edge.

- 1.JUKI sewing head with double-bolts straight needle design;
- 2.Head with automatic oil supply system, lubricating each part easily;
- 3.Double-needle five-thread synchronous structure, strong gear cloth-feeding system, ensuring feeding precision and perfect seam;
- 4.Both thick and thin fabric can be easily processed;
- 5.Taiwan servo motor.

### MS-VC2700

2, 3针筒式绷缝机  
2 Needle, 3 Needle Cylinder Interlock Sewing Machine

1. By using new materials with small friction coefficients and special processing methods, which have successfully achieved a significant reduction in the necessary oil supply for the needle bar mechanism;
2. Use oil seals on the needle bar, presser foot bar, and upper decorative line looper, and only supply the necessary minimum amount of oil to the necessary parts to recover excess oil and ensure that the oil will never leak;
3. A special oil pump is used to force oil supply from the inside of the upper shaft and the inside of the connecting rod, and because an oil film is often formed, the machine is quiet and has outstanding durability.

超高速系列  
Super High Speed Series

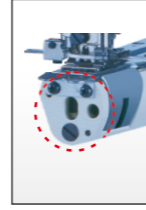

- 1.High precision cutting system, fast and efficient (optional device);
- 2.Strong suction device (optional);
- 3.All ceramic wire runner, more smoothly;
- 4.Elastic silicone "heart protection" pad, loving, more comfortable;
- 5.Integrated structure design to prevent oil seepage;
- 6.Intelligent anti-breaking device, without winding of the hitting CAM (optional);
- 7.New fully sealed tool rest design, prevent oil leakage.

**MS-S600** 双差动系列  
Double Differential Series

The micro-adjustment of dual differential feed ratio can receive a higher quality of sewn product.

**MS-62GX** 超细嘴系列  
Super Small cylinder bed Series

**MS-740H-UT**

直驱曲臂式四针六线拼缝机  
Direct Drive 4-Needle 6-Thread Feed-Off-The-Arm Flatseamer

Special shoes  
This machine improves the sewing technology for the knitted fabric of footwear, and the stitching of the knitted upper is more stable and smooth.

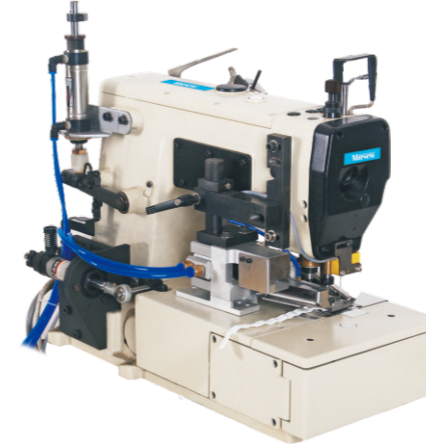

**MS-460D**

直驱立柱型四针六线拼缝机  
Direct Drive 4-Needle 6-Thread Postbed Flatseamer

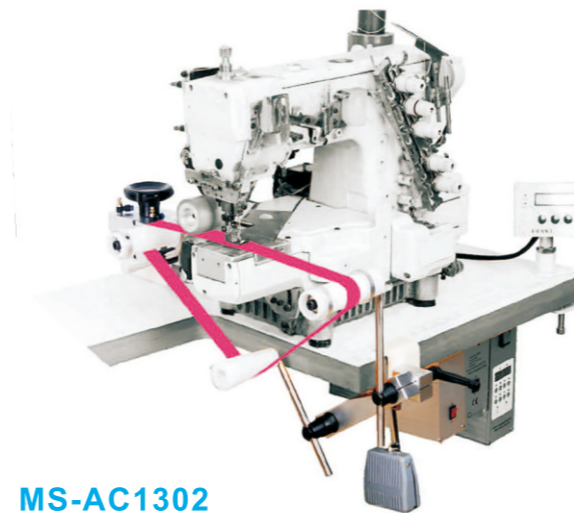

1. Automatic presser foot lifter.
- 2.Postbed interlock type is easy to operate and can complete Highly difficult sewing.
- 3.Can be applied to different kinds of sewing process with different parts.
- 4.The feeding method of DU is more powerful than ordinary ways. and easier to repair and adjust.

# Zigzag Machine Series

## 曲折缝系列

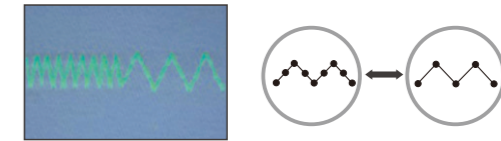

### MS-2280D/2284D

单直驱高速曲折缝  
Direct Drive ZigZag Sewing Machine

High-technique, beautiful stitch, easy operation, long durability. It is an ideal sewing machine for decoration. It has different stitch designs by changing the optional cams. Suitable for sewing light and medium-heavy material of underwear, knitting, bra, trousers, gloves, shoes, caps and so on.

### MS-2284-7

自动剪线高速圆筒台式单针锁缝式曲折缝机  
(具有标准/3步曲折缝图案转换功能)  
Automatic Thread High Speed Cylinder Table Type Single Needle Lockstitch Zigzag Sewing Machine (With Standard/3-Step Zigzag Stitch Pattern Conversion Function)

The cylinder table zigzagging sewing machine is most suitable for the circular sewing process of tubular products such as tights, shorts and swimsuits.

### MS-2290A-SR

直驱高速电子曲折缝 (花型设计功能)  
Direct Drive High Speed Zigzag Sewing Machine (Pattern Design Function)

1. Directly driven by computer stepper motor, automatic reverse sewing function;
2. Sewing more, more complex and more beautiful patterns, increased bird's nest specifications;
3. All specifications are set to "minimum refueling type";
4. With 8 types - 14 Basic patterns, more than 300 ROM patterns, 500 stitches/1 pattern;
5. Patterns can be edited and transferred through PC (optional)/999 patterns. You can also design and make new patterns directly on the touch screen.

Name of pattern	Straight stitch	Basic zigzag	2 step zigzag	3 step zigzag	Scalloping(left)				Scalloping(right)				Blind stitch (left)	Blind stitch (right)	Custom pattern							
					Standard	Crescent	Equal-width	Equal-width	Standard	Crescent	Equal-width	Equal-width										
Stitch patterns																						
Number of stitch	1	2	4	6	24				12				24				12				2+*	maximum 500

1. This machine adopts a self-developed tangent mechanism
2. Energy-saving servo motor directly connect to the main shaft, start fast and stop accurately, reducing the response time.
3. Simple and integrated system control, the display screen is simple and generous, easy to operate
4. Equipped with automatic functions such as thread trimming, back tacking and foot lifting
5. Switch for add stitches, LED light, easier to operate /Product features

自动加油一体直驱曲折缝 (240种花样, 可自编花样, 大梭)  
Direct Drive Auto-Oil ZigZag Sewing Machine (With 240 Patterns, External Display, Large Hook)

1. This is our independent research machine, have auto thread trimmer, auto reverse-feed and auto presser foot lifter;
2. The machine body heavier than normal machine, more stability when sewing higher speed;
3. Auto-oil makes the spare parts more durable;
4. Large hook, opening body cover easy for repairing.

MS-5530DZ: Single direct drive, without stepper motor  
MS-5530-A4: Single stepper motor with computer operation screen, 190 patterns to choose from  
MS-5530-B4: Double step, 240 patterns to choose from  
MS-5530-D4: Equipped with automatic foot lifting, automatic reverse sewing, and automatic thread cutting functions

**MS-430DH**

高速电子竖款套结机  
Electronic High Speed Bartacking Machine (Vertical)

1. Lower noise, lower vibration;
2. Adopts best quality precision parts and customized parts, the performance is more stable;
3. Adopts computer digital control system, various sewing data and parameters can be adjusted freely;
4. 430D bartacking sewing range Y<30mm, 469D bartacking sewing range Y≤60mm.

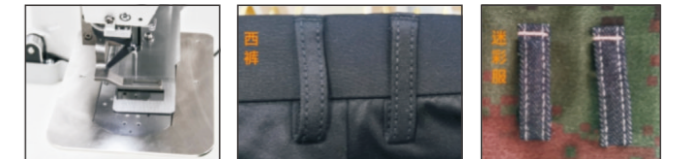

**MS-430DPE**

高速电子裤耳套结机  
Electronic High Speed Bartacking Machine For Belt Loop

1. Standard configuration with 6 different modes;
2. The most suitable number of stitches can be selected according to the size of the belt loops;
3. With unique large curved presser foot arm and presser foot structure, easier to place the fabrics;
4. The large working space is conducive to improving the production efficiency of the belt loops shaping process;
5. Application for jeans, camouflage pants, suit pants and casual pants etc.

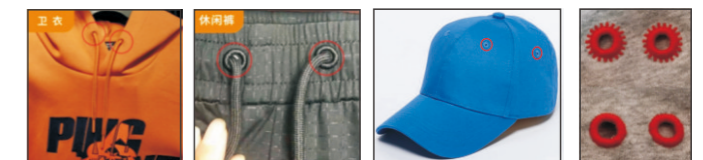

**MS-430DMO**

冲缝一体菊花眼套结机  
Electronic Punching And Bartacking Sewing Machine

1. Before sewing it, it can automatically make the hole;
2. The machine can automatically sew after checking the center of the hole;
3. Punching and sewing round eye hole can be complete in one machine, which improve the quality of sewing products and sewing production efficiency greatly;
4. This machine is application for sports garments, casual wear and all kinds of caps.

Model	Max. speed	Stitch Length	Max.No. Of Stitches	Pressure Foot Lift	Motor	Weight

**MS-ZHT-15KW**

自动滑台高周波机  
Automatic Sliding Table High-frequency Machine

1. The machine adopts relay operation control, and the left and right automatic sliding tables continuously push the mold back and forth, with precise positioning;
2. High frequency spark protection system with extremely high sensitivity to prevent damage to high frequency molds;
3. Adopting low loss European standard coaxial high-frequency resonators, the high-frequency output power is strong, which can quickly fuse the products and effectively increase production volume.

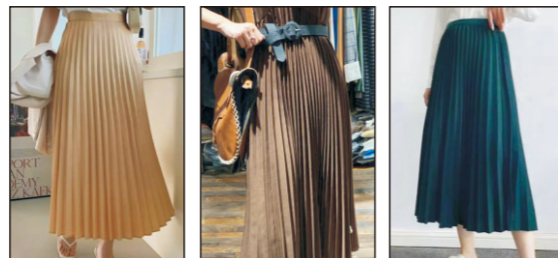

**MS-516**

打褶机  
Automatic Fabric Pleating Machine(Top Smaller Bottom Bigger)

- Computer controlled MS-516 difference.
1. It is equipped with two servo motors.
  2. Transmission by screw rod.
  3. Pleat height at two sides are regulated at random.
  4. Applicable to pleat accordion.
  5. Applicable to pleat a combination pattern of high and low.

**MS-TSY64/94**

电脑高速有梭多针衍缝机  
Mechanical Multi-needle Quilting Machine

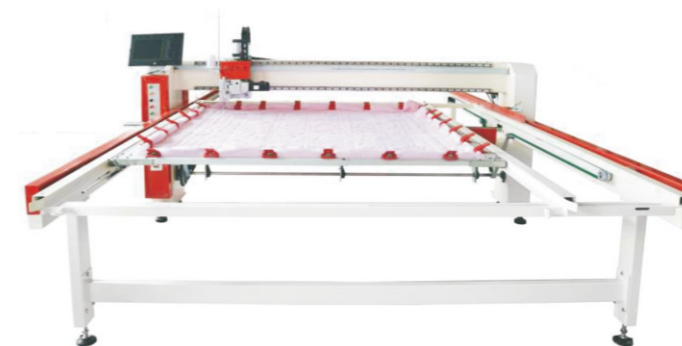

1. Computer layout in both Chinese and English, easy to operate.
2. The needle speed, needle pitch, pattern, etc. can be adjusted freely;
3. Adopting functions such as wire breakage detection, automatic return, and automatic repair;
4. Computer screen working status tracking and color changing display, automatic cumulative production, etc;
5. Suitable for various high-end textiles such as clothing, bedding, mattresses, sofas, sleeping bags, etc., with a wide range of uses. 360° pattern can be sewn freely.

Model	MS-TSY-64	MS-TSY-94

**MS-DF9-2628**

最高速度自动单针衍缝机  
Highest Speed Automatic Single Needle Quilting Machine

1. Direct drive high speed refueling head;
2. Head lifting and dropping down with 8cm;
3. Small noise, much quietly;
4. Windows system less problem, around 400 different design, also programmable;
5. With auto trimmer function;
6. Auto lubrication more stable and durable.

Model	MS-DF9-2426	MS-DF9-2628	MS-DF9-2830

**MS-CS380**  
智能穿绳机  
Automatic String Thrusting Machine

Suitable for pullover, casual pants, zipper style sweater and other flat lock Eye hole, chrysanthemum eye hole, metal roundeye rope.

**MS-004**  
打号机  
Fully Automatic Number Printing Machine

1. Applicable fabrics: Fabrics with less or no lint on the surface of the cloth; Fabric that does not adhere to adjacent pieces of fabric; Fabrics with few or no threads;
2. Applicable size: 50cm>numbered side length>7.5cm, adjacent side length>15cm;
3. Applicable thickness: The total thickness of fabric that can be accommodated in a single marking job is <4cm;
4. Number printing speed: about 75 pieces can be printed per minute;
5. Automatic ink refill: 8,000 numbers can be printed with one refill of ink;
6. Automatic dialing: You can set the numbers to be dialed on the display screen;
7. Automatic reset: Click the reset button, and the dialing wheel can quickly jump to the initial value;
8. Automatic reset: Click the reset button, and the dialing wheel can quickly jump to the initial value;
9. Voltage and pressure: 220V single phase/0.6mpa.

细柱压缝机  
Fine Column Sewing Machine

It is suitable for pressing leather, leather material, elastic cloth, denim and other products. It is the best model for heel stitching of long women's riding boots.

**MS-Y1B**  
Bending Arm Sewing Machine

**MS-Y2BX**  
Inclined Column Sewing Machine

**MS-Y1BL**  
Upright Column Sewing Machine

**MS-Y1XH**  
细柱压条机  
Pine Column Sewing Machine

**Features**  
The machine is used for the integration of various processes such as PVC, PU, natural leather, artificial leather, and fabric material of various leather products such as shoe uppers, bags, and mobile phone cases to carry out sizing, pressure sewing and flattening. Through the operation of the machine can improve work efficiency, reduce the process, does not hurt the fabric and other advantages.  
The machine uses a computer to control the melt, the glue temperature and the glue flow, and the whole process is intelligent.  
1. It adopts hot melt adhesive to automatically sew, press-seal and flatten the integration, which can save artificial white glue, yellow glue, and oven time, and is in line with environmental protection;  
2. Use positioning electronic motor, easy operation, stable use.

**MS-B266C**  
全自动电脑圆刀削皮机  
Automatic Computerized Skiving Machine

**USE**  
This machine is suitable for edge skiving of various leather, artificial leather and rubber fabrics in leather product industry such as shoes and bags.

**CHARACTERS**

1. Adopt touch screen and PLC control to detect fault and display automatically; it's easy to operate and maintain;
2. There is no need to adjust by manual, five data sets in a group can be switched quickly.
3. Round knife speed can be setted, automatic feeding and pedal feeding can be selected, and the mode can be switched at will;
4. Equipped with a device for grinding the internal burrs of the round knife, and it is not necessary to manually grind the burrs generated by the friction between the grinding wheel and the round knife;
5. Equipped with a closed vacuum device which wind is adjustable.

Model	MS-B266C
Power	220V 50-60Hz
Power of motor	1.35kW
Package size	1200x550x1160mm
Gross weight/Net weight	175kg/135kg

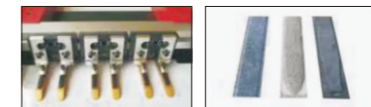

**MS-300JD**  
带刀片皮机  
Band Knife Splitting Machine

**USE**  
The machine is suitable for splitting various soft and hard materials under width of 300mm and thickness of 10mm in industries such as leather, luggage, footwear, clothing, rubber, etc. to the required thickness. getting higher product quality, finer workmanship, and stronger competitiveness

**CHARACTERS**

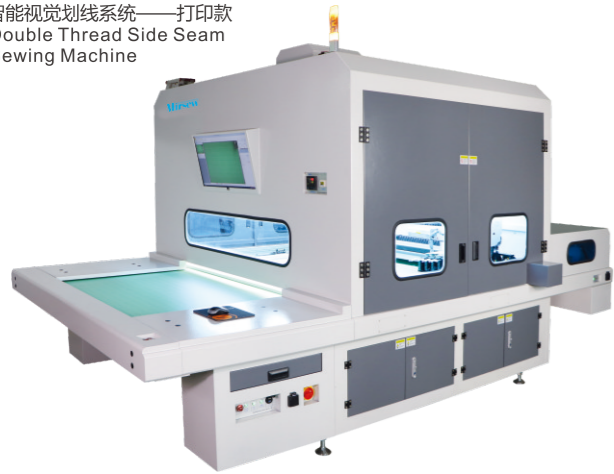

1. Splitting thickness displayed by plc LCD, the infinitely variable adjustment of feeding, accurate number counting function;
2. With automatic feed registration device, no need to adjust cutting tool;
3. With function of dropping out when it is splitting. Adjust the clearance of pressure pad and cutting tool automatically to make the splitting precision much higher;
4. Freestanding set of dust absorbing device, automatic detection system of electronic phase.

Model	MS-300JD
Max width of split	300mm
Min thickness of cutting	Adopt two feeding rollers 0.6-8mm Adopt feeding bar 0.2-8mm
Specification of band knife	2630x50x0.6mm
Power	3.5kW
Package size	1330x1130x1200mm
Gross weight/ Net weight	580kg/500kg

**MS-1209P**

智能视觉划线系统——打印款  
Double Thread Side Seam  
Sewing Machine

1. Adopt new industrial printheads, ore efficient for large area marking;
2. It is suitable for PU, microfiber, leather, fabric, mesh, flyweaving ect.
3. Adopt high temperature disappearing ink, fluorescent ink, ect for the customized demands of Client;
4. High-strength PVC conveyor belt and specialized high-precision servo drive roller cooperate with each other to provide power for drawing ;
5. To help execute the workflow of automatic material loading, drawing and collecting . and ensure the gun can work uninterruptedly for improving the production efficiency;
6. Specialized high strength pressed net to prevent material warping , running and deforming ect;
7. High-definition image system and intelligent recognition system always guarantee high integrity for each shape, size and color of material;
8. Recognize the shape and direction of the material , accurately locate and draw the line automatically , and can recognize more than 20 different pieces at the same time for meeting the customer's line drawing work;
9. The spray valve with built-in micron nozzle perfectly matched with imported spray valves for high precision and efficiency;
10. Run in an independent area 1200mm wide and 900mm long, Support maximize production and speed(1200mm/s);
11. Double-drive drying box speed up ink drying without waiting;
12. Intelligent stop sensing, the feeding system will stop working automatically when the system detects empty conveying and more two boards , which is convenient to finish all the collecting materials later;
13. The integrated collecting platform ensures that receiving and feeding are synchronized, one person, one machine

**MS-1209F**

智能视觉划线系统——喷墨款  
Double Thread Side Seam  
Sewing Machine

Maximum speed	1200X100MM
Working area	1200X900MM
Dimensions	4050X2350X2350MM
Pressure	0.5MPA, ≤8MPA
Voltage	AC220V
Power	7KW
Repetitive accuracy	±0.1mm
Data transmission	USB
Data format	PLT,HPGL,DXF,AX
Weight	1300KG
Receiving system	Tail end collection suction belt
Lighting function	UV lamp
Compatible ink	Fluorescent ink, water disappearing ink, never disappearing ink, oily ink, delayed disappearing ink

**MS-A600F**

磨具冲孔机  
Series Mold Punching Machine

1. High perforaiton recpision and easy change over thanks to the CNC-made moulds;
2. Servo motors ensure material feeding precision;
3. Material feeding is simply adjusted through touch screen, no mechanically adjustment;
4. Automatic paper rewinding;
5. The depth of the die punch can be easily adjusted by the handle.

Model	MS-A600	MS-A600F
Material type	Piece	Piece
Max.leather width(mm)	600	600
Max.punching speed (strokes/min)	180	180

Automatic Panching & Eyeletting Machine

**MS-778-1**

压机  
Pressing Machine

**MS-HHS**

鞋头冷热定型机  
Shoe Head Cold And Hot Shaping Machine

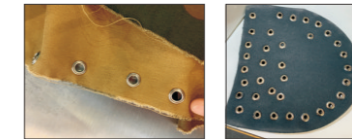

**USE**

This machine is suitable for riveting for single-side and double-side eyelets in industries such as shoes, clothing, leather goods, paper bagsetc. The punching and riveting works are completed in one time.

**CHARACTERS**

1. Adopt intelligent control. Main motor does not start up during standby which is energy saving;
2. Punching and riveting are completed in the same station one after another, which is fast and accurate and greatly improves yield;
3. Die and riveting molds are made of imported high-strength alloy material which is not easy to wear;
4. Laser positioning makes riveting easier;
5. Design of emergency shutdown system provides best safety protection for machine overhaul and maintenance.

This machine is suitable for pressure fixing of casual footwear and sole bonding. Features

1. The opening and closing of the lid is controlled by pneumatic, making the work easy and efficient;
2. Photoelectric induction device to prevent no-load startup Upside-down air bag pressure, manual or automatic, two options;

**USE**

Suitable for pre-soft shaping of general toe caps, shaping of everted shoes or Hong Kong treasure shaping of various materials.

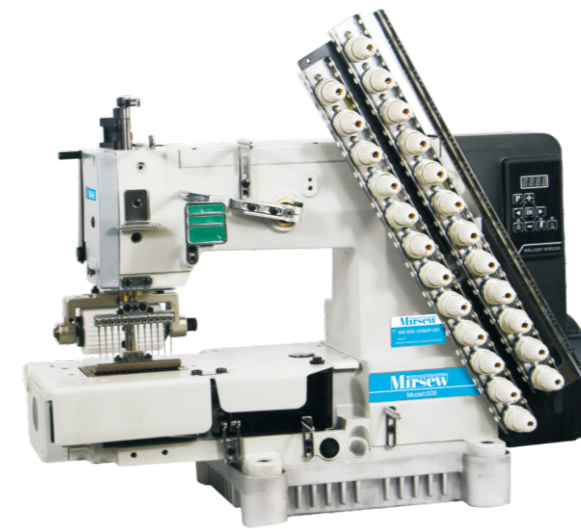

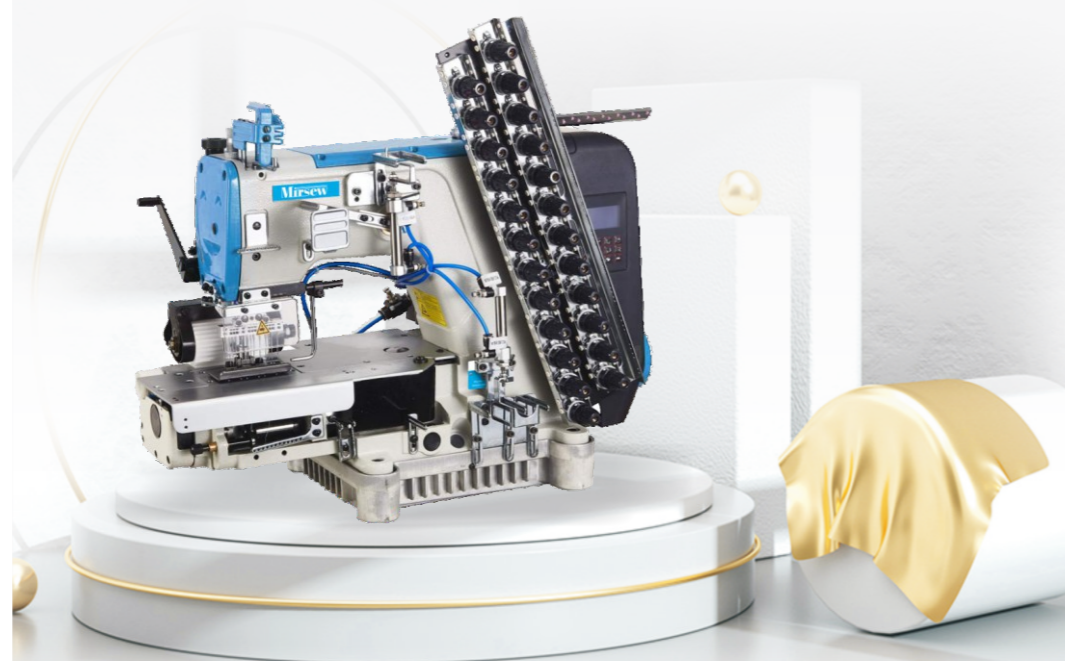

**MAIN FEATURE**

1. Suitable for shaping the toes of men's shoes, women's shoes and children's shoes. It can be applied to the method of pulling the top, pre-shaping the front toe, hand sewing method and general eversion shoe method;
2. The flat shoe upper diameter can be processed into a three-dimensional toe shape, and then other operations such as pulling the upper, front upper or eversion can be performed, which can save the upper materials and shoemaking costs;
3. The refrigeration system uses closed antifreeze liquid circulation cooling, the toe shaping speed is fast, and the refrigeration effect of the shoe mold is evenly distributed, resulting in a better and more stable shaping effect;
4. Equipped with an air-hydraulic positioning system, the pull-down speed can be adjusted and the pull-down stroke can be accurately calculated. The height of the toe side wall is consistent, simplifying the shaping technology, making the toe shape consistent and of better quality;
5. The hot mold is equipped with a steam system, which reduces the loss rate of setting the shape of genuine leather shoes, and the heating speed is faster than that of a general non steam system, and there will be no problems affecting the progress;
6. The mold is equipped with positioning adjustment, which can be adjusted arbitrarily according to the thickness of the shoe upper. It will not crush the shoe upper and can adapt to various shoe types.

# Multi-needle Sewing Machine Series

## 多针机系列

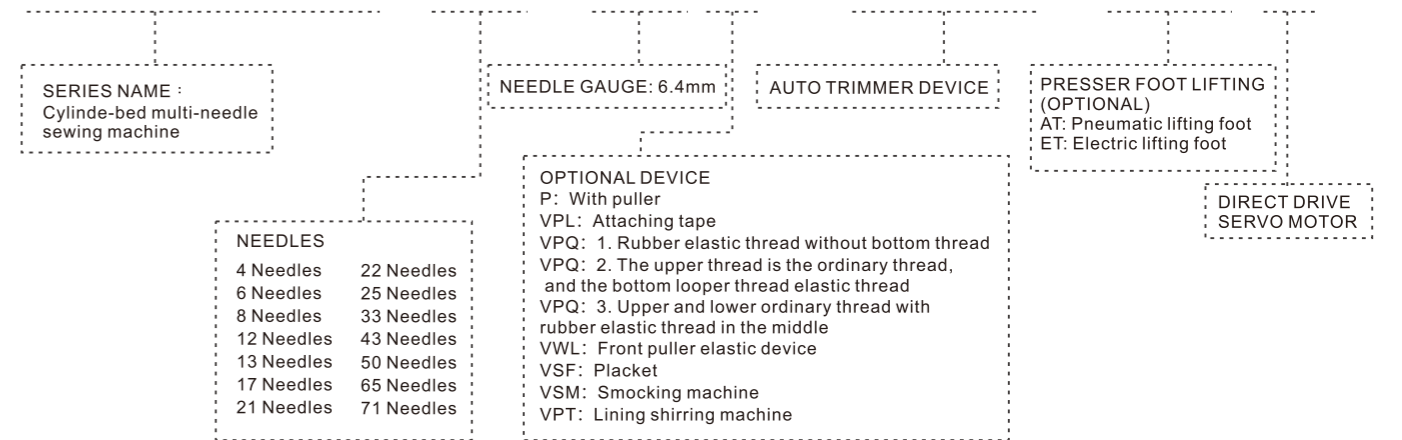

### MS-008-12064P-DD series

一体十二针半筒型双重环链式多针机  
12 Needle, Cylinder Bed, Double Chainstitch Machine

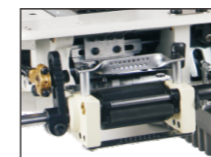

The 008 series is a cylinder bed multi-needles machines, with back and forth loopers driving mechanism, with 4-71 needle for your choice, suitable for decorative sewing on high quality dress or tubular goods. Application for: elastic, placket, rolling tape, waist, decoration, underwear, sportswear, indoor decoration.

差动麦夹机  
Direct-drive Crank Arm Type 4 Needles 6  
Threads Flat Seaming Machine Series

1. Suitable for thick fabric: Two or three needles can easily sewing 16 layers cloth;
2. Differential: Upper puller and differential feeding make sewing more smoothly.
3. Automation: Adopts a cylinder to control an presser foot lift, which makes sewing be easily;
4. Automatic fueling: Lower vibration and noise under high speed operation.
5. Application for jeans, casual pants, etc.

**MS-700BK/900BK**  
钢带机  
Band Knife Cutting Machine

1. According to different fabrics, the user can adjust various cutting speeds ;
2. It is attached with a special air-floated blowing device to reduce the excess resistance formed between the cutting sheet weight and cutting table. It makes easy move for cutting sheet and more precise cutting for small cutting shoots;
3. Extremely easy cutter removal;
4. It is attached with a grinding device to ensure constant sharp of the cutter;
5. Could be choose the belt safety protection device.

**MS-1200BK**  
钢带机  
Band Knife Cutting Machine

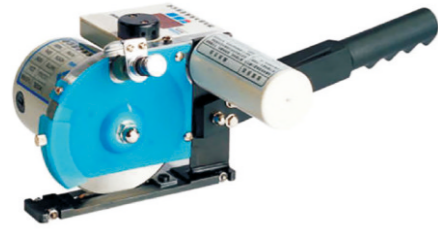

Band knife cutting series suitable for various fabric, woven / knitting / synthetic fiber( nylon, vinylon, acrylic ) / sponge / synthetic leather/ felt, etc

**Product Overview:**

- 1.Speed 3 level adjustable, for different material;
- 2.Easy to change the cutting knife;
- 3.With safety protection device;
- 4.Air-floated blowing table with small balls, easy to move;
- 5.With knife grinding device.

裁床系列  
Cutting Bed Series

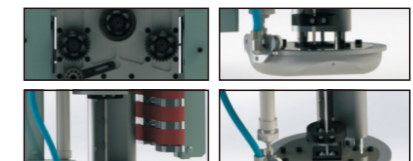

1. Through computer design, manual and automatic combination of computer can effectively improve the efficiency of nesting. As long as ordinary personnel are familiar with computer operation, they can also master nesting skills within a week;
2. The equipment can realize zero spacing cutting and effectively save raw materials;
3. Computer controlled automatic cutting can replace a large number of cutting workers and realize mass production;
4. Cutting bed control software supports multi-source data format, it can directly receive common clothing design and typesetting software;
5. The unique algorithm and motion control technology realize the seamless connection of straight line and arc line, and high cutting accuracy;
6. The equipment adopts automatic knife grinding technology, and the grinding time can be set according to the fabric characteristics effectively extending the service life of the cutter;
7. No need to print and keep the paper plate, which has high reuse rate and is convenient for plate making management;
8. The consumables are easy to be replaced and the replacement cost is low;
9. Variable frequency control: suction pressure can be set, effectively reducing the use cost of electric energy;
10. The conveyor belt in the picking area can be controlled independently or synchronously;
11. For special cutting window of rough brick, the blade can pierce into the surface at will without damage.

**MS-A888**

自动裁床系列  
Automatic Cutting Bed Series

1. **Cutter speed 6000r/min**  
High power motor combined with the new variable vibration box technology, the cutting power reaches the industry-leading level easily cutting all kinds of fabrics.
2. **Quick sharpening knife system**  
The sharpening mechanism of up to 15000r/min keeps the blade sharp at all times and improves cutting efficiency.
3. **Cutter cooling system**  
Specially designed double cold cutter, providing double cooling effect, combined with software algorithm, easy to deal with low melting point fabric, non-adhesion, cutting accuracy is higher.
4. **Play the linesman**  
The industry-leading global algorithm, combined with the top hardware, together constitute a full-time dynamic cutting technology to achieve real time cutting of fabrics through the window to greatly improve production efficiency, while reducing the fabric repeated adsorption bias and connection waste.
5. **Zero gap cutting**  
Different from software typesetting, excellent algorithms and high-precision cutting system can achieve zero gap cutting, saving more fabrics for users.
6. **Dynamic cutting speed**  
For adjacent cutting pieces and edge cutting pieces, the cutting head can dynamically adjust the cutting speed according to the actual cutting area to achieve the balance between cutting accuracy and efficiency.
7. **Tailoring job support system**  
The clipping path can be memorized in real time during clipping and can be clipped quickly after power recovery to improve efficiency.

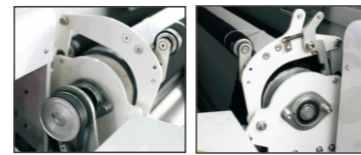

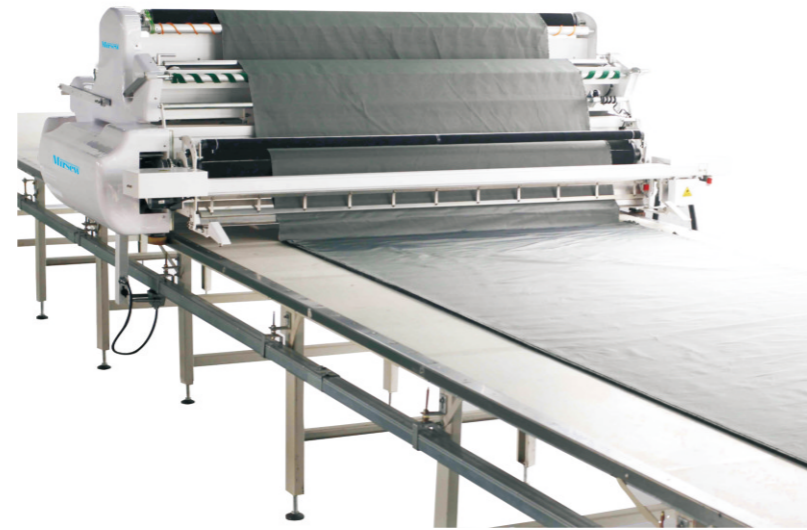

Model	Voltage	Pressure	Power	Cutting area	Cutting thickness	Weight	Dimension

**MS-1900**

智能铺布机  
Auri-tech Automatic Spreading Machine

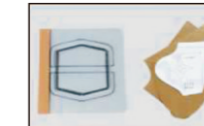

Automatic spreading machine, suitable for woven, knitted fabric. It suitable for woven and scaling properties of fabrics, it is equipped with PLC programmable computer control, adoption of the advanced touch screen operation, convenient to set the length, layer number of LABS, speed, and etc. Adopt the bucket cloth basket design, to facilitate loading large rolls of cloth. At the same time can also be in the process of lab for any response operation condition. Automatic deceleration function, can reduce the length of the settings, to prevent the accident.

1. Touch screen operation interface, real-time visualization, set up simple, operation easy;
2. Automatic edge functions in real time during the filibuster on the side, saving fabric;
3. No cloth shutdown, automatic drove back the origin, no tension raab, stream line operations, improve production efficiency;
4. Remote control emergency stop mode, real-time control, fast and safe;
5. Spreading machine speed variation by computer PLC control, stable and safe.

**MS-MC02**

服装模板切割机  
Garment Template Cutting Machine

1. Multi-tools for cutting both PVC board and cardboard;

2. Leading auto knife-depth adjustment function, easy to set the cutting depth;

3. Imported straight rail, with high cutting speed and high precision;

4. Free template design software, easy to design and work with machine

5. Divisional vacuum absorption;
6. Work with any CAD software in Garment industry, Shoes industry, Bag industry etc

Model	MS-MC02
Air pump specifications	1.5kwX2
Power	5kw
Effective cutting area(mm)	1500mmX900mm
Overall dimension	2100mm*1536mm*920mm
Cutting thickness	≤8mm
Max.spindle speed	60000r/min
Cutting speed	100-1200mm/s
Repeat precision	≤0.01mm
Software resolution	0.025mm
Voltage/power	Ac220v+10%,50hz
Fuse	6a/30a

**MS-MC03**

模板切割机  
Template Cutting Machine

Multi functional, quick switching of cardboard and PVC boards

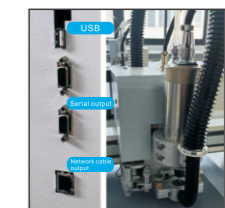

Quickly adjust cutting thickness

LCD display, Chinese/English operation panel

Pneumatic fixtures for more secure fixation

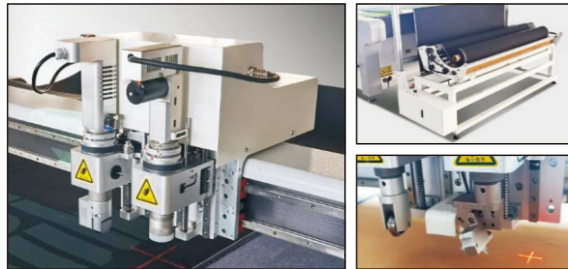

1. Multiple output methods
2. High speed / ultra high speed water-cooled machine head

Model	MS-MC03
Max area(LxW)	1500X900MM
Voltage/power	AC220v 50/60Hz/4.5kw
Working speed	0-100mm/s
Knife handle diameter	3.175mm 4mm
Machine size(LxWxH)	1980x1420x1080mm
Packing size(LxWxH)	2200x1520x1150mm
Machine weight	300kg

MS-1900	1600mm	190mm	80m/min	50kg	1830mm	700mm±30	220v/50-60hz	2.3kw	1500x2170x900mm

**MS-SC1209**

裁床之单片裁剪系列  
Cutting Bed Single Piece Cutting Series

**Control system:**

Equipped with an advanced multi axis high-speed motion control system, the system is easy to upgrade and maintain, with high reliability and low cost. It can easily customize special programs for personalized user needs and perform remote upgrades;

**Integrated control:**

The control card is integrated into the device, eliminating the need for a computer chassis to control the device, making maintenance more convenient;

**Head design:**

Adopting a replaceable tool head mode, the tool head is non fixed welded and integrated, allowing for convenient replacement and addition of different functional tool heads according to actual work needs and business scope expansion;

**Working mode:**

Using the He Fu motor to drive the screw control mode, it can be linked with the computer to preset the depth of the right storage knife according to different needs, making it convenient for digital fine-tuning;

**Body countertop:**

A high-strength body designed for mass production, with high-speed cutting and no shaking, the equipment operates more stably for a long time. It has a continuous rolling platform and is equipped with a multi-point adjustable keel style honeycomb aluminum plate tabletop, which is durable, not deformed, and even;

**Security protection:**

Install safety anti-collision and infrared blocking devices in the crossbeam work area to ensure personnel safety;

**Automatic edge finding:**

Can be configured with a top camera positioning system to automatically search for edges, cut or set the printing material;

**Software features:**

Compatible with mainstream CAD design software on the market, the control center software can set any cutting path energy: The diameter, starting and falling points of the cutting tool can be effectively improved and materials can be saved through the layout function;

**Reduction device:**

Adopting a high-end servo system with fast speed and high-performance deceleration device, high long-term accuracy;

**Other advantages:**

The rolling platform can achieve continuous cutting, with good splicing effect and time-saving and material saving: it adopts an overall air suction method (intelligent partitioning can be selected), which has stronger adsorption force.

Model	Cutting speed	Cutting thickness	Cutting accuracy	Power	Voltage	Scope of work	Size
MS-SC1209	≤2000mm/s	≤50mm	±0.1mm	6.5kw	220v±10%, 50Hz	1200x900mm	1960x1550x1380mm

Belt Cutting  
Machine Series  
切带机系列

## Model Differentiation

# MS-120HLR

Brand

### Products series

- 2200: Ultrasonic Cutting Machine
- 150: Automatic Multi-function Cutting Machine
- 130: Heavy-duty Auto-cutting Machine
- 120: Automatic Cutting Machine
- 110: Economical Auto-cutting Machine
- 817: Mechanical Cutting Machine

#### L: Cold Knife Cutter

It can cut a variety of different materials such as: nylon tape, cotton tape, soft plastic tube, computer cables etc, but only cold cutting without heat-sealing function.

#### LR: Cold & Hot Knife Cutter

If closing the heating switch, the machine will become a cold cutter and it can cut a variety materials same as "L". It can cut nylon materials with sealing the edge once open the heat switch except the thick and cotton materials.

#### H: Hot Knife Cutter

It can cutting variety of different materials same as "L". In addition to these, especially to sealing function is good at melting normally thick materials except cotton materials.

#### SH: Auto-label Hot Knife Cutter

This same as "H" function, it has color sensor device so it also can cutting variety of different lable materials.

#### HLR: Auto-label Cold & Hot Knife Cutter

This same as "LR" function, it has color sensor device so it also can cutting variety of different lable materials.

#### HL: Auto-label Cold Knife Cutter

This same as "L" function, it has color sensor device so it also can cutting variety of different lable materials.

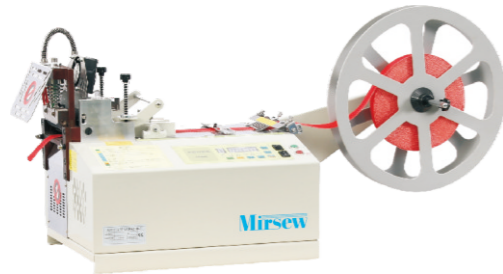

#### HX: Bevel & Straight Cutter

It is a bevel & straight cutting machine with hot knife to sealing the edge, do not change the knife and direct loosen the screw to change the knife angle to reached customers request.

#### R: Velcro Tape Round Shape Cutter

It is a velcro cutting machine, it can cutting many different shapes to reached customers request!

## 110 And 120 Series (Motor And Cylinder Models Are Optional)

**MS-110LR**  
电脑切带机 (冷、热)  
Economic Belt Loop Cutter(Cold & Hot)

**MS-110H**  
电脑切带机 (热刀)  
Economic Hot Knife Cutter

**MS-110L**  
电脑切带机 (冷刀)  
Economic Cold Knife Cutter

**MS-110HLR**  
电脑切带机 (冷、热红外)  
Economic Label Cutter(Cold & Hot)

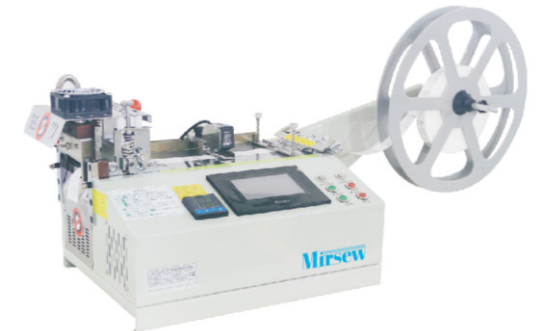

**MS-110R**  
电脑切带机 (圆角)  
Economic Velcro Tape Round Cutter

**MS-300M**  
电脑送带机  
Tape Feeder

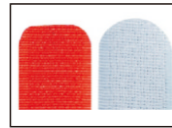

**MS-300S**  
电脑送带机  
Tape Feeder

**MS-815/817**  
切带机 (冷、热刀)  
Belt Cutter (Cold & Hot)

**Application:**  
Velcro tapes

**MS-818**  
切带机 (圆角)  
Velcro Tape Cutter(Round)

**MS-2100**  
超声波电脑切带机 (直角)  
Ultrasonic Cutting Machine(Right Angle)

**MS-2200**  
超声波电脑切带机 (直角/转角)  
Ultrasonic Cutting Machine(Right Angle/Bevel)

**Special features:**  
Feeding machine, this device is for multi-purpose pre-feeding, easy operation. It support the use for cutting machine, sewing machine etc. Adopt micro switch device, could according to the main machine working speed to working feeding function automatically. It suitable for different type width and thickness woven belt, elastic belts, labels etc. The anti intertwist device for make the belt untie and twisting.

**MS-150LR**  
多功能电脑切带机 (冷、热刀)  
Auto-cutting Machine  
(Multi-function Cold & Hot Cutter)

- 1.High speed: It can cut 150 pcs per minute. (e.p. 50 mm long, it include collecting device);
  - 2.Accuracy: Cut-length is accurate owing to a stepping motor;
  - 3.Collecting Function: Setting the quantity, it will be collecting automatically, so that clients can be easily packed;
  - 4.Punching Device: According to the needs of user, it can punch different size of the diameter of the holes;
  - 5.Cutting Type: The blade is made of high quality steel. Hot cutter can cut ribbon, thin woven belt and the hot knife melts the end of the tape, cutting is sealed neatly, smoothly without fraying;
  - 6Automatic operation: It works automatically only by setting length and quantity. it stops automatically if materials runout dunnig operation;
  - 7.Computerised: Automatic work, stop. The special fault by self-diagnosis, direct show the fault problem on the screen, it will easy for you to find clear way to repair;
  - 8Automatic stopper: It stops automatically if materials run out during operation;
  - 9.Memory: Set-length, set quantity & set speed are not erased even if power off & on;
- Applications: All kinds of woven belt, velcro, shoelace, plastic soft tube, computer cable, label etc.

**MS-150L** (Cold Cutter)

**MS-150HX** (Bevel Cutter)

**MS-130LR**  
电脑切带机 (冷、热刀)  
Heavy-Duty(Cold & Hot) Knife Cutter

- Special features:**  
**High speed:** It can cut 150 pcs per minute. (e.p. 50 mm long)  
**Accuracy:** Cut-length is accurate owing to a stepping motor.  
**Cutting Type:** Melting & cutting by hot knife, woven label is cut neatly without fraying but not for heavy materials and installed with anti-static electricity device.  
**Automatic operation:** It works automatically only by setting length and quantity.  
**Automatic stopper:** It stops automatically if materials run out during operation.  
**Memory:** Set-length, set quantity & set speed are not erased even if power off&on.  
**Applications:**Woven tapes, strip tapes, bag band etc.

**MS-130H** (Hot Cutter)

**MS-130L** (Cold Cutter)

# Household Sewing Machine Series

## 家用缝纫机系列

**MS-ES6**  
家用电脑绣花机  
Household Computer Embroidery Machine

- 1.7 inch color touch screen;
- Patterns, colors, sizes, directions can be edited freely;
- Embroidery status can be monitored in real time;
- Easy to use, one will learn;
- Sewing stitches can be edited in combination;
- Multiple buttonhole.

- Max Embroidery area:235\*100mm
- With LED display screen
- With auto thread cutter
- With auto bobbin winding
- With thread break alarm
- Embroidery file format: DST
- Operation software support: XP/Win7/Win8/Win10

# Ironing Machine Series

整烫系列

**MS-G4040Q/5040Q/6040Q**

单工位旋转式气动烫画机(特氟龙发热板)  
Swing-away Pneumatic Heat Press Machine  
With Slide-out Base (Teflon Heating Plate)

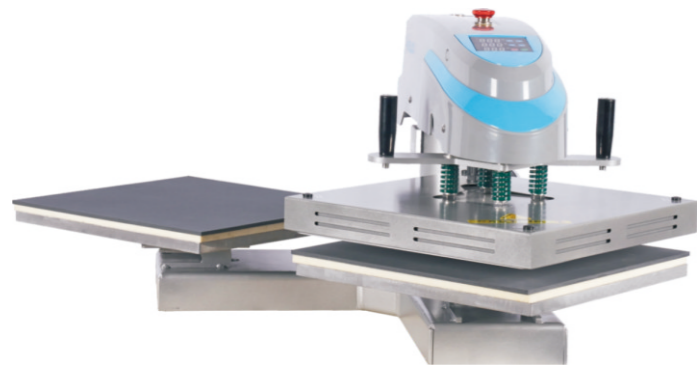

1. Slide-out base;
2. 12 heating coils in 2.5cm thick aluminum plate;
3. Head rotation 90/145/180 degrees;
4. Heating plate triple thermal protection;
5. Insert T-shirt(ready-to-wear clothing);
6. Heating plate and nuts are two layers protection against high temperature;
7. Heating plate falls automatically when the heating plate overlaps with the lower plate, higher efficient.

Heating plate size	Voltage	Power	Temperature range	Time range	Weight	Packing size
30x20/12x8	220/110v	1/0.8kw	0-299°C	0-999s	45kg	80x53x60cm
40x30/16x12	220/110v	1.3/1kw	0-299°C	0-999s	50kg	80x53x60cm

**MS-2020/2525/2030/1535/4040-YD2 4050/4060-QD2**

双工位旋转式气动烫画机(特氟龙发热板)  
Swing-away Pneumatic Double-station Heat Press Machine(Teflo Heating Plate)

1. Twin station for higher efficiency;
2. 12 heating coils in 2.5cm thick aluminum plate;
3. Head rotation 180 degrees;
4. Heating plate triple thermal protection;
5. Insert T-shirt(ready-to-wear clothing);
6. Heating plate and nuts are two layers protection against high temperature;
7. Gas cylinder can adjust the pressure, pressure is more stable;
8. Emergency stop button can rise heating plate and stop to work in case of emergency;
9. Heating plate falls automatically when the heating plate overlaps with the lower plate, higher efficient;
10. Lower plate protector cover (high temperature cover).

Heating plate size	Voltage	Power	Temperature range	Time range	Weight	Packing size

- 1.It is mainly used for formal clothes such as suits and shirts, etc., clothing is flat knit after ironing;
- 2.Mainly divided into steam ironing and electric ironino. accordina to the material and thickness of diferent tyes of machines can be selected;
- 3.According to the different parts of the clothing to make a different mold, each part of the special stereotypes;
- 4.Steam ironing: only by steam spraying and pressure on the upper and lower mold to set;
- 5.Electric heating iron: only on electric heating and upper and lower mould pressure to finalize the design;
- 6.Permanent ironing: both gush steam and electricity heating and upper and lower mould pressure to finalize the design.

Model	Power(KW/V)	Compressed air pressure(MPA)	Packing Size(cm)	Weight (kg)

自动调偏型粘合机 (无缝带)  
Auto-Belt Adjustment Fusing Machine (Seamless Belt)

1. It is equipped with automatic snake correction device;
2. The upper and lowerbelts adopt Cam Direct deviation adjusting device to keep the belt in a stable position;
3. Open design is adopted on one side, which can be partially bonded. The driving roller is improved into a rubber shaft;
4. MS standard assembly has rotary stripping device.

**MS-H400/H500/H600/H800**

强制防偏型粘合机 (有缝带)  
Forced Anti-Deviation Fusing Machine (With Seam Belt)

1. It is equipped with forced correction device;
2. With imported seam conveyor belt , the motor has high horsepower and the working efficiency is twice as high as that of similar machines;
3. With up and down heating temperature control regulator (optional), can bear bitrarily adjusted in the range of 0-220 C;
4. Double and single side pressing lining (optional);
5. Unique electronic temperature regulation and direct sensor can control tiny temperature difference;
6. It has automatic temperature shutdown function and hand-operated power cut mechanism.

**MS-H900/H1000/H1200**

强制防偏型粘合机 (有缝带)  
Forced Anti-Deviation Fusing Machine (With Seam Belt)

It can be widely used in various non-flammable agents contain fabric collar, chest, cuffs, placket, waist top fabric and adhesive products smooth stiff and resistant to washing, easy trend, it applicable to all resins collar lining.

单探头检针机系列  
Single Probes Anti-Jamming Needle Detector

1. With advanced CPU program master control system, it can automatically control the size of induction model;
2. CPU make scor responding actions (alarms) according to the testing standards required by customers;
3. It has the function of printing and output in English in the test report;
4. The tape of EPSON printing head of Weihuang printer can be printed, and the data can be saved for along time (optional);
5. It has the function of timely clock and automatic shutdown without checked objects in 10 minutes under automatic condition, so as to achieve the function of power saving and safety protection;
6. In the integrated chip part, the famous foreign company brand chips are used to ensure that the machine works steadily fora long time;
7. Intelligent counter digital display, automatically record the number of qualified and unqualified items.

充棉机系列  
Intelligent Down & Cotton Filling Machine Series

1. With a triple weighing system used, the speed of down-filling machine is 2-4 times faster than that of manual method; Down-filling is no longer needed skilled workers;
2. Non-contact weighing method is used;
3. According to given target gram weight the actual down gram weight will be automatically increased or reduced as necessary during filling;
4. The patented design of down outlet resolves the filling problems of airtight fabrics and special soft fabrics;
5. The range of single time\*0.2-32q, capable of filling both large and small lattice panels;
6. The user friendly touch screen design, can be stored at any time, can be called at any time to change the data.

Filling Speed : 1g/s~8g/s(adjustable)  
Single Down Loading Volume : 8kg~15kg approximately(duck down)  
Filling Requirement: 90, 80, 70, 60 down, dry  
Machine Accuracy : 2%(90 down under standard environment testing)

Upper Computer Inkjet Plotter

45 double inkjet printer, using the world's 45 type ink cartridge, the nozzle is disposable ink cartridge. High performance ARM processor is adopted, which is fast in calculation. Combined with the special high-speed motor drive control system, the whole process closed-loop positioning has high control precision, fast running speed, high resolution, and is not affected by complicated and simple graphics lines, and the speed is uniform. Automatic online automatic printing, real-time monitoring of various operating conditions. With independent output management system, it can connect various CAD software standard files.

Vertical Inkjet And Cutting Plotter

Schmidt jet cutting machine is a multifunction machine with marks, frames and samples. It adopts hp45 type ink cartridge which is universal in the world. The ink head is disposable and does not need special maintenance. It has intelligent electronic spring cutter control system, precise cutting, smooth cutting, special circuit and motor drive system, which ensures stable continuous operation, large screen ICD display, Chinese panel, real-time operation. Simple and precise operation.

Vltage:220VAC  
Power:0.2KW  
Machine size:L1220xW950xH900cm  
Air pressure: 0.5-0.7Mpa  
Packaging speed:<400 Pieces/hour

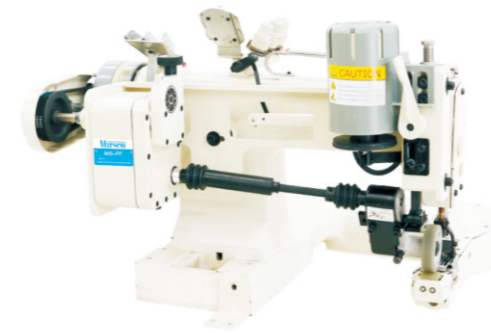

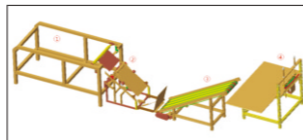

**MS-GM100**

自动折叠衣服包装机  
Automatic Folding Clothes Packaging Machine

**MS-GM200**

自动服装折叠&装袋机  
Automatic Garment Folding & Baging Machine

**MS-PF**

曲腕机专用  
For Feed-Off Arm Machine

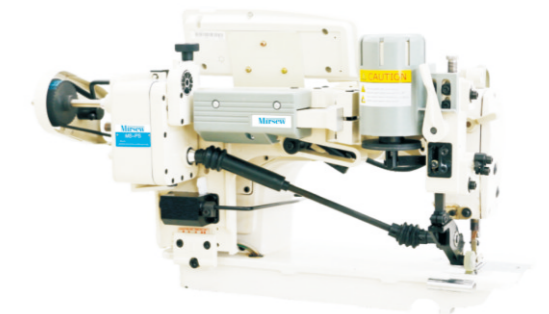

**MS-PF-HB**

曲腕机专用(履带式)  
For Feed-Off Arm Machine

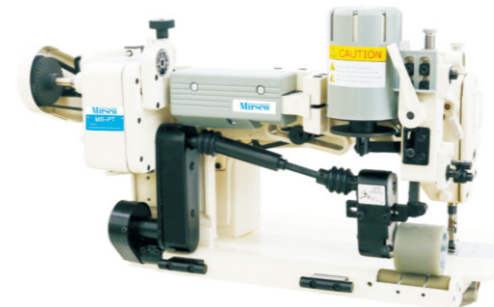

**MS-PK**

包缝机专用  
For Overlock Machine

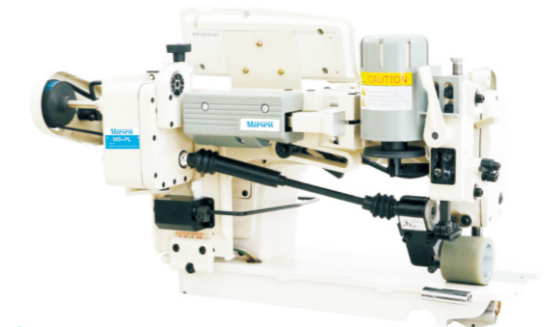

**MS-PS**

单/双针专业直径(25mm,宽10mm)  
For Single/Double Needle Machine(Diameter 25mm,Width 10mm)

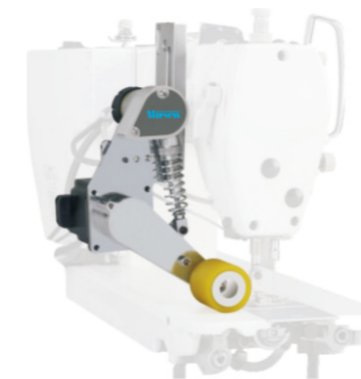

**MS-PT**

单双针专用(上拖轮)  
For Single/Double Needle Machine(Top Puller)

**MS-PL**

单/双针专业直径55mm,宽15/35/50mm  
For Single/Double Needle Machine(Diameter 55mm,Width 15/35/50mm)

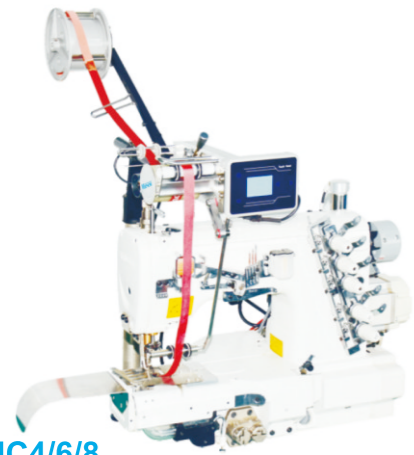

**MS-6G**

电子拖轮  
Electronic Pulley

**MS-MC-QF**

微电脑文胸接耳仔装置  
Micro-Computer Bra Swan-Woock Attachment Device

**MS-MC4/6/8**  
微电脑触摸屏送带机 (4、6、8段)  
Micro-Computer All-Round Metering Device(4/6/8 Sections)

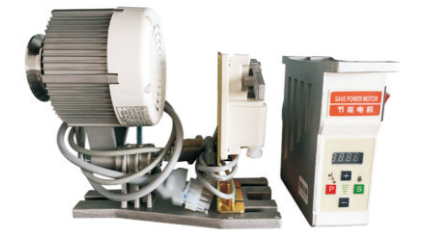

**MS-MC2-U**  
辅助装置  
Assisting Device

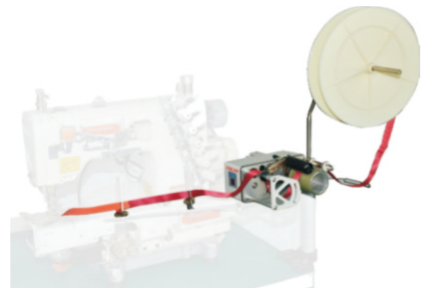

**MS-120/135**  
电机  
Phase Clutch Motor

**MS-550S**  
伺服下挂电机  
Electronic Adjustable-Speed Servo Motor

**MS-550/750N**  
伺服下挂电机  
Electronic Adjustable-Speed Servo Motor

**MS-MC2-S**  
数码同步送带装置  
Digital Synchronous Metering Device

**MS-MC-20K**  
微电脑送切带控制装置  
Computer Cutting & Re-insert Elastic Control Device

**MS-DD1**  
平缝机直驱电机  
Single Direct Drive Motor For Industrial Sewing Machine

**MS-T05**  
平缝机多功能直驱电机  
Electronic Full Function Servo Motor

**MS-WR595**  
多功能平缝机电机  
Electronic Full Function Servo Motor

**MS-MDK61**  
包缝机同步装置 (专用型)  
For Special Overlock Machine

**MS-MDK60**  
包缝机同步装置 (通用型)  
For General Overlock Machine

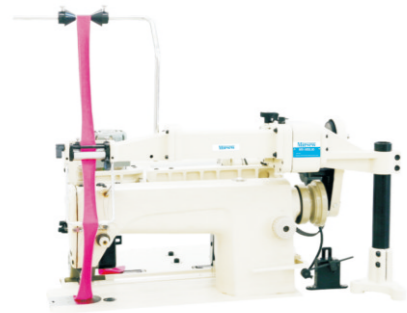

**MS-M1N**  
包缝机直驱电机  
Direct Drive Motor For Overlock Sewing Machine

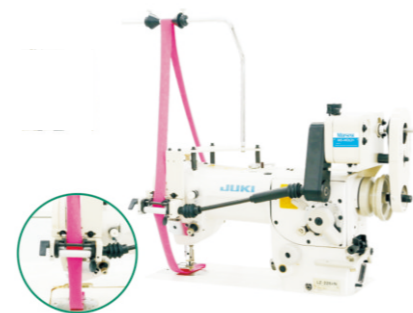

**MS-M25**  
包缝机多功能直驱电机  
Multifunctional Direct Drive Motor For Overlock Sewing Machine

**MS-35**  
细缝机多功能直驱电机  
Multifunctional Direct Drive Motor For Interlock Sewing Machine

**MS-MDL30**  
平车、双针、绷机用  
For Single, Double Needle, Coverstitch, Special Machine

**MS-MDL31**  
高速曲折缝车专用  
Meteeing Device For Zigzag Machine

**MS-S3-M3**  
直驱伺服电机 (多功能型)  
Multi-Function Direct Drive Servo Motor

**MS-SD85-KD300**  
伺服电机 (特厚料专用)  
Servo Motor (Special For Extra Thick Materials)

**MS-H600**  
伺服电机  
Servo Motor
