Don't forget to put your child's first and last name on each item! Originally published as Parent magazine's September 2015 issue. Free school supplies can ease the burden of back-to-school costs that many families face. With the cost of school supplies rising and the number of supplies needed from schools rising, it is increasingly rising to buy school supplies each year. If you have some school-age children then your costs can easily reach hundreds of dollars each year. Whether you're a parent who can't find money in your budget to buy school supplies this year, or you're trying to stretch your budget, look below to find some ways you can get free school supplies for your kids this year. Your first step to getting free school supplies should be by contacting your child's school. Schools will often purchase additional supplies each year they can provide to families unable to buy them. Sometimes the teachers themselves will use part of their class budget to buy more supplies for their students. If you're unlucky with your child's personal school, you want to contact your school district. Many school districts have programs where the community can donate school supplies that they can give to families who need them. If they don't have a definite plan, they'll likely have information about city programs that give away free school supplies. Getting to the community should be your next step in bringing free school supplies. All kinds of organizations set up programs to give school supplies, you just need to find out who they are in your community. Guests can contact their local news stations and newspapers. That's who organizations that give away school supplies get in touch when they want to get the word out about their program. If your local media isn't aware of any plans, it's likely to be able to do the footwork to find out where those programs are. Other places for bureaus to set up free school supply programs include local universities, churches and charities such as Volunteer America and United Road. If you're a military family, Operation Homefront partners with Dollar Tree annually to give backpacks and school supplies for free. You can sign up for the back-to-school takeout division Of this fantastic program. If you want to stretch your back to your school budget, watching free after-refund deals will help you get quite a bit of free school supplies. Many shops offer free deals after respite on school supplies, and you'll need your Sunday circles to see if there are any deals for the week. Staples has a program called Easy Rebates that makes it really easy to get free school supplies during July and August. Free items can then make money in stores because so many people forget to send the proof. Be sure to file your refund so you get your money back or your school supplies won't be free after all. Don't hesitate to take advantage of the school's after-respite free supplies that aren't on your child's supply list this year. Put that aside for next year or better, donate it. Back to school shopping is big business for shops and they are looking to get you in and spend money. They'll often have doorbusters to get you in the door. They're hoping you'll buy all your school supplies there, but that doesn't mean you have to. OfficeMax/Office Depot Staples often has school supplies on sale for 1c, 10c, 50c, and \$1. Sometimes they also have coupons in their ads to help you save even more money. If you're like most parents, you have a drawer or even a closet full of school supplies you've bought before, but which you probably won't need again. Consider hosting a supply exchange for the school where parents in your school district or neighborhood bring the school supplies they don't need and exchange them for the ones they do. If you can't get free school supplies you can definitely get them cheap. To do this you'll need to buy more than one place, watch ads and use coupons. If you go to one place and get all the school supplies you need, you'll pay a lot more money than you need. You'd better start watching the newspaper ads in July and start visiting every store to pick up just the really good deals. Pay particular attention to Walmart, Kmart, Big Luge, Target, Walgreens and grocery ads back to school sales. These stores will have some items that are a particularly good deal every week. If you don't receive a newspaper, you can subscribe to all of these ads online. Coupons are a big help in saving on school supplies as well. Watch your Sunday newspaper coupons and visit Coupons.com often to see if any coupons are popping up for school supplies. Combine these with a sale and you really save some cash. Another way to save on school supplies is to take advantage of tax-free weekends that many states need to help ease the cost of school supplies and other back-to-school items. Now is the time to get next year's free school supplies. Your child will always be required to bring basic supplies like pencils, crayons, and notebooks like some of their school supplies Year. When you see a good deal, buy some extras you can use next year. One of the best ways to succeed in high school is to have a full set of study items at hand. Not only will you be ready for almost any task, but you'll also avoid long-last-minute trips to the store. Some of the equipment is needed to get year after year, no matter what grade you're in. Just before his new stay begins, invest in these items and you'll be back. You don't have to spend a lot of money to have a full inventory of supplies. Many of these items can be found in US dollars and other discount stores. A laptop with a pressing keyboard will allow you to do your job anywhere. Smartphone: While your teachers are unlikely to allow classroom phones, smartphone access will allow you to use plenty of education-related apps and websites. Printer/scanner: Although you can print your work to your school printers, home printing is much more convenient – and it'll make it easier to check your work. Be sure to get one with scanning capabilities. Scanners can be used to create tutorials from your books to help you with everything from preparing for tests to writing a dissertation. Post-It™ Surfaces: This item is useful for brainstorming, especially in a study group environment. It's basically a cushion of giant post-it notes that you can fill with ideas and list items and then stick to a wall or any other surface. Smartpen by Livescribe: This is a favorite tool for math students, who can get it during a classroom lecture, but then lose it when they sit down to work out the problems themselves. The Smartpen will allow you to record a lecture when taking notes, and then place the tip of the pen on each word or drawing and listen to the part of the lecture that took place when those notes were recorded. Recorded.
