Originally it was provided for the U.S. market, the brand is now sold in more than 70 countries around the world. The official date of birth of the new brand (not yet available at the time of the name), based on the production of luxury cars, is considered in August 1983 at a secret meeting of the board of directors of Toyota, its head Eiji Toyoda announced his decision that the corporation should create a representative class car, and it will be better products of leading automakers around. This decision was not spontaneous. In the early 1980s, the luxury car market, especially in North America, had slow but steady growth, and Toyota, which had good sales in the United States, could not stay away. According to numerous market studies, TMS management and decided to create a new brand. On the issue of brand name in two opinions there are manual corporations: Felt that a new name was needed to avoid any connection with the Toyota brand by producing generally inexpensive models; others were confident that the new car would only be sold Toyota's name is to enhance the brand's reputation and attract customers to lower-class models. However, American studies and surveys have shown that the first side of the assumptions was correct. In the U.S. called Toyota as it turned out, no longer associated with cars and pickups with common, because of the nature of advertising and marketing TMS. This fact plus the firm conviction of the staff of the group and the promotion of the brand is still usually the management of the company, namely Eiji Toyota to make their final choice in favor of the new name. In 1986, the advertising agency Saatchi and Saatchi, a long time service company Toyota, formed a special division Of Team One, the main function of which was the creation and development of a new premium brand for Toyota. At the request of the consulting firm Team One, Lippincott and Margulies formed a list of 219 names from which to choose the name of the new brand. The most preferred option in the end was the name alexis, but due to strong associations with the character Alexis Carrington in the popular 1980s TV series Dynasty it was decided to transform the name into Lexus. The origin of the Lexus name is often attributed to the combination of the words luxury (luxury) and elegance. According to another theory, Lexus is an acronym for export luxury to the United States. However, Team One argued that the Lexus brand doesn't really matter, and that the word Lexus just beautifully conveys the image of luxury and technology. The history of the Lexus car is presented in one of the chapters of the book of the famous Toyota historian Jeffrey Liker. CT 200h - Golf Class Hybrid Car. The HS 250h is a mid-range hybrid car. The GS 450h is the world's first business-class hybrid sedan. Lexus IS is a mid-range rear-wheel drive car also manufactured (in Japan) under the name Toyota Altezza.
