

Back Office Bingo

presented by The Numbers Agency

B	I	N	G	O
Still print docs to sign	Manual data entry is your workflow	No one knows where that document is	Sticky notes = your system	Inventory tracked on paper
Monthly close takes <i>forever</i>	Reporting takes 3+ days	"Why doesn't this sync?"	Receipts live in a shoebox	Forgot payroll day (again)
Forgot your login	"We'll fix that later" – every week		Spreadsheet for everything	No one knows who owns what task
Reconciliations done by hand	Vendor info in 3 locations	You've duplicated data across systems	The system crashes during peak hours	You panic every tax season
Employee onboarding = email chaos	Invoices are done manually	Still using a legacy desktop app	Missed a deadline due to confusion	IT support = you, YouTube, and luck
