Pspp Download Mac

Binaries

We do not distribute precompiled binaries of PSPP. Many operating systems provide such binaries, but these might not be the most up to date version. Refer to your operating system's instructions for details. Below is a list of some precompiled binary packages for various operating systems, of which we are aware. Please note these are prepared by third parties over whom we have no control. We make no assertions about the reliability of these packages.

- Gnewsense
    - Universe
- Fedora
    - Fedora
- Debian
    - Official Packages
- Ubuntu
    - Official Packages
    - Unofficial update
    - Another (later) unofficial package
- OpenSuSE
    - Official packages and unofficial packages.
- FreeBSD
    - Official Ports
- HP-UX
    - Binaries for version 0.6.1
- MS Windows
    - Mingw-based version (nl, fr, de, es, pt_BR), including both the most recent released version of PSPP and a snapshot of recent development activity
    - Another Mingw-based version (all downloadable files)
