Our Services

◆ Product registration

We can **take care of your products registration in your target from A to Z**. We build your dossier, submit and communicate with the authorities until your product is approved.

◆ CLP Classification

We can take care of your product's CLP classification in Europe.

◆ Chemical Testing

We can take care of your products chemical testing in EU approved laboratories.

Our commitment to open and transparent communication ensures you remain informed and in control—without the burden of day-to-day regulatory complexities.

Our Vision

To be the most trusted global partner in agricultural regulatory affairs—setting the standard for clarity, precision, and performance across diverse legislative environments.

Our Mission

To provide efficient, transparent, and science-driven regulatory solutions that empower our clients to bring agricultural input products to global markets with confidence and speed.
