Lillebaby user manual

Lillebaby's full-season full-six carrier (!) carries the position, fits the babies through 45 pounds, and includes tons of features making it comfortable for both you and your baby. Made from making 100% cotton with mesh panel on the baby's back, it is soft and breathable. Here's what we love about Lillebaby: six carrying positions without having to insert a baby! 1) Baby ahead you 2) Baby ahead you 3) Baby forward 4) Toddler ahead you 5) Heap carry 6) Return carry. Lumbar support for the wearer increases comfort and minimizes waist pressure. The lumbar pad is removable. Enables the wearer to carry backpack style or with passing straps on the back. Double tuning arcs simplify breastfeeding and belt adjustments going on. The sleep hood is removable and highly customizable. It provides great head support for the baby stage and also provides more discrete nursing and sun protection if needed. The torso can be made taller than many other soft-structured carriers. It provides more back and neck support for your baby, is easier for them to sleep in, and also helps you feel more comfortable because it keeps the baby weighing over your hips rather than the baby pulling away from you more. Two pockets! Have a large zipped pocket to store your stuff and a small pocket to tuck the hood into. Shoulder straps and waist are wide and generously emptied. No additional baby placement needed for newborn babies! The baby's strap is included. Do you want to print or another color? We can order any Lillebaby product for you!!! To use the baby through 45 pounds. 100% cotton construction with mesh panel on the back of the carrier pocket. Lillebaby is widely tested for both voluntary and mandatory standards. Their products contain no lead, toxic dyes, phthalaates, flame retardants and are certified compatible with CPSIA and ASTM safety. Padding on shoulder pads is composed of non-toxic PE, a material often used in baby mattresses. Waist belts are also made of non-toxic PEVA substances. Many baby products (bibs etc.) are now considered using PEVA as it is greener and safer than PVC etc. How do I use it? Tips? Check out 6 position options! 1. Fetal position age: Baby to 3 months (minimum 7 lbs/3.2 kg). Use the wide seat setting. No additional insertion required. Benefits: The child is face-to-face with you and protected from the surroundings. You can see and hear the child, and participate in his comfort. Natural comfort: The baby is in the natural position of the newborn frog foot. Neck-adjusting support fully supports the baby's head and neck. Easily babysitter with easy adjustment buckle on the side. Privacy hood for nursing or sheltering from the sun and wind. Lumbar support for your added comfort. 2. Baby face in position: baby and top (minimum 7 lbs/3.2 kg). Use when the child is ready to sit with legs around his waist. Use a narrow seat adjustment. Benefits: Allows to wear your baby during the baby wearing a gap (when the baby has grown out of the fetal position, however too little to sit in the wide seat carrier with legs around the parents). Offers a carriage position that no longer carries a wide seat. A carry-on alternative to the fetal position. Ergonomic: The registered cupped chair keeps the ergonomic baby sitting in a wide seat position with good support from the back, buttocks and thighs, and with a natural rounded back. The child is face-to-face with you and protected from the surroundings. You can see and hear the child, and participate in his comfort. Neck-adjusting support fully supports the baby's head and neck. Easily babysitter with easy adjustment buckle on the side. Privacy hood for nursing or sheltering from the sun and wind. Lumbar support for your added comfort. 3. Front face of position: 6 months and up. Use when the child can strongly and independently support their head. Use a narrow seat adjustment. The neck supports china down and the forward carrier button. The baby's arms may lie on top of the back of the neck or rest from the carrier's sides. Benefits: Ideal for learning as the child can see and participate with the surroundings while safe and content, close to you. Increases interaction and bonding due to face-to-face closeness with siblings and family members. Speech and communication growth has increased: the baby is able to see and mimic facial expressions to communicate. Helps satisfy a child's natural curiosity. Ergonomic: The registered cupped chair keeps the ergonomic baby sitting in a wide seat position with good support from the back, buttocks and thighs, and with a natural rounded back. Lumbar support for your added comfort. 4. Toddler front face in position: 6 months and up. Use when the child can easily sit with his feet around his waist. Use the wide seat setting. Benefits: Baby face to face with you, protected from surroundings. Ideal for carrying tired babies or sleeping. The wide and deep seating ensures a natural sitting position. The long torso facilitates the baby's weight and keeps the child's gravity center inside the carrier. This is much easier compared to other brands where the baby appears to be hanging from the carrier. The wide seat helps improve the weight distribution between the thighs and shoulders, so you can easily carry for longer periods of time. The child is face-to-face with you and protected from the surroundings. You can see and hear the child and independently support their head and sit comfortably around your waist with his feet. Use the wide seat setting. Benefits: Carrying thighs feels natural for many parents. Allows the baby's weight to rest on his thigh, with less pressure on his waist. Ideal for communicating, learning and exploring together. The child can see your face and read your signs. Simple tasks that would otherwise be difficult with a baby on your front. The wide and deep chair ensures a natural sitting position for the baby. The wide seat helps improve the weight distributed between the thighs and shoulders so you can easily carry for longer periods of time. 6. Return age position: 6 months and up. Use when the child can strongly and independently support their head and sit comfortably around your waist with his feet. Use the wide seat setting. Benefits: Ideal for carrying heavier weight. Ideal for carrying the baby for longer periods of time. It puts less pressure on your back. The wide seat helps improve the weight distributed between the thighs and shoulders so you can easily carry for longer periods of time. Simple tasks that would otherwise be difficult with a baby on your front. The wide and deep chair ensures a natural sitting position for the baby. The long torso facilitates the baby's weight and keeps the child's gravity center inside the carrier. This is much easier compared to other brands where the baby appears to be hanging from the carrier. Easy to put in: Carrier design allows you to use the back position without assistance through an easy and safe technique. Neck-adjusting support fully supports the baby's head and neck. The hood provides additional support and shelters from the sun and wind. Car wash care with cold water in a gentle cycle with minimal detergent, dry line. Video unsure how to use your Lillebaby in a given position? Check out this great educational video for each carrying position! Product source: Made in China about Lillebaby the idea that functional and beautiful everyday objects should be available to all of us is a main theme in Scandinavian design. With a Scandinavian foundation, the LILLEbaby brand of its very own concept to these roots has been true and shown a warm passion for combining capabilities and style. Resonating with Scandinavian values of quality of life, honesty, and love of nature's beauty, LILLEbaby tries to make baby products that bring this functional style to parents, anywhere. We wish parents to achieve the simple luxury of keeping their baby close while making a natural bond, in complete comfort and style. Green Commitment: Becoming a parent reminds us that we pass the world on to our children. To that end, LILLEbaby is committed to minimizing our impact on the environment by bringing you environmentally responsible products and maximizing recycling in us packing and working day by day. Though organic and stable are absolutely buzzwords these days, they have been part of our company vocabulary from the start. We started with a lot of optimism almost 10 years ago, but little money, so conservation was vital - it became a way of life. But the biggest impact of our cycling is not to work or reuse print paper, but how we make our products. That's why we design our products to be the most stable versions we can make. Our packaging and ink are tested for their decomposability performance in landfill to ensure that they are not harmful to the environment. The materials we choose, the coloring we use, the manufacturing methods we use, and the factories we choose are where we make sure the products are healthy for our small customers, and where our green philosophy makes the biggest difference. Here's a list of links to online instructions for all of our slings and carriers (well all the ones we can find). You have a note of what your carrier is called in your copy of the Terms and Conditions, please scroll down to find yours... If you can't find what we're looking for or need more support, leave a message -) Soft ABC carrier structure unfortunately is not currently available, the library has paper instructions, please email us if you need this.
