The Collapse Process

The Collapse Process is the newest methodology in achieving lasting and loving presence. The term Collapse was extracted from the study of quantum physics. It represents a process of synthesis, where and when two appositely charged human emotions come together, join, transform, transcend and emerge as new forms of energy. - vitality, purpose and love." Created by Dr John Demartini, this powerful tool will be taught and practiced during the program.

Day Off

Based on the calendar, one day of the 8 day program, usually day 4 is a lay day. Yoga is held in the morning and the morning Destiny workshop is conducted until 11.00am. From then the day is free for bus trips to Ubud or shopping in Kuta.

Vision, Inspiration and life Purpose

During this retreat you will develop a deep and powerful sense of your own life purpose. The four elements of personal consciousness will be deepened and reinforced. Gratitude, Presence, Certainty and Love.

Vision is a powerful goal and an essential motivator. Inspiration is when the inner voice speaks louder than the outer voices. Life purpose is beyond them both. Life purpose is a commitment to excellence and a commitment to a purpose greater than the self. Instead of the fluctuations of transient goals and visions, life purpose creates a transportable theme for a life. Life purpose breaks dependency and provides the true freedom that every individual aspires to.
