Hand Driven (101) Self Driven (67) 4 stars or higher (65) Still unrated (65) Mowers, blowers and other important tools of trade issue Author vnephologist TLF supports Posts: 311 Joined: Friday August 04, 2017 16:51 Location: Richmond, VA Grass Type: Barserati, Mazama KBG Lawn Size: 2150 Mower: 21 Rotary Post by vnephologist » Thu September 14, 2017 5:53 pm Jayhawk made me think of a battery-powered blower, so I started looking if I could use the same battery for a blower. Of course, I took it a step further and looked for an electric coil. Well, it looks like Gardena's doing one! It only has a 15-inch cut so definitely on for small yards, but it looks like it will make some cool mini stripes with its back roller. Maybe it's time to start the mini reel's low club. Does anyone have any experience with this thing? . 965863701/ Renovations 2019 - Front: Mazama KBG (Supervised), Raptor 3 TTTF (Supervised) 2018 - Front: Barserati KBG (Mono), 4th Millennium TTTF (Mono) 2018 - Back: Blue Space HGT KBG M311att Posts: 245 Joined: Sunday May 21, 2017 19:11 Location: Memphis Grass Type: Bermuda Post by M311att » Thu September 14, 2017 19:26 Wish there was an electric mini writer who was 6-8 inches wide because my Jacobsen couldn't get close to the wall. A landscape blade from Royama is what you're looking for. This should be your theme song stogie1020 Posts: 154 Joined: C September 10, 2019 13:15 Location: Phoenix, AZ Grass Type: Bermuda Lawn Size: 900SqFt Mower: Scott's 20in Push Coil Post by stogie1020 » Friday January 03, 2020 13:44 It looks like 380 me no longer sold in the US. Does anyone know why you're here? For my little lawn it would be perfect and it looked just below the \$500 electric coil mower that can cut below 1 HOC. Can they still be bought anywhere in the U.S.? Gilley11 Posts: 1278 Joined: Sunday November 03, 2019 11:31AM Location: Charlotte, NC Grass Type: Zoysia Lawn Size: 2k zoj, 1.5k Rye Mower: California Trimmer 20 Post by Gilley11 » Friday January 03, 2020 15:07 Not safe, but if your lawn is only 900ft2, would you consider a model that is cable? Depending on how useful you are, I'm sure it'll be a fun project. Cable coil mower to power battery using components from rotary battery mower. avionics12 TLF supports posts: 124 Joined: B July 02, 2018 06:50 Location: SE Tennessee Lawn Type: Bermuda Lawn Size: 10,000 Mower: Tru-Cut C27 Post by Avisonia12 » Friday January 03, 2020 16:10 I used a 380Li on a Zoysia lawn over 6-7 years. I had 750 square feet which took about 30 minutes to mow. The first crossing will be a north/south cut, followed by an east/west cut. I loved the lawnmower so much I was kept on a wish list on Amazon. I bought an extra battery to replace any other incision. The cutting quality was very good, the battery was quite powerful as was the propulsion engine itself. I never sharpened or squirted in it as I didn't know (at the time) it was necessary. It's still well cut for three years. The only reason I don't have it now is because the buyer of this house really wanted it and I thought I could get another one easily on Amazon. I wanted another gardena to make a low cut close in my current home and live again on the almost quiet days. I was pretty disappointed when I saw the badge not currently available on Amazon. I did a search in North America and found out, as you know now, Gardena chose to exit this market. That's too bad. The saving grace will be Sowardman Electra. At 10 times the price of gardena, and worth every penny I'm sure. hsvtoofool Posts: 542 Joined: B July 23, 2018 16:29 Location: Huntsville Lawn Type: Tifton 419 Lawn Size: 14K Mower: Ego 21 + Ryobi 38 E-Rider Post by hsvtoofool » Sunday 05 January 2020 8:24 What Ward said: The most beautifully low precision Edgar is the Maruyama Landscape Blade. Mine's about to take out a bunch of old, multi-year-old flower stalks. I'm not sure what you all mean by mower fight, but the right side of my Sverdman Electra mows down inside about 1/2 of artifacts and sidewalks. So I always mow counterclockwise for my border crossings. It's a very smart design and saves me tons of time. I'll definitely consider the wire, if I can find one that cuts at 1/2. The Sun Joe only drops to 1, which I get with the scotts' 20th manual reel. Without Gardena, my best bet is probably a state/American manual coil, because they're assigned to 1/2... An electric cage mower with hardened quality steel if you don't have a lot of storage space, but you have a large lawn, so this 380 EC electric power is ideal. Because it is. By battery, it's easy to push the Gardena cylinder mower forward without much effort. The coil medd has a contactless cutting technique, which means no friction and therefore also saves power. In addition, it ensures that the 380 EC cage mower is a silent whisperer! The cutting height specifications is adjustable at any desired level between 12 and 42 millimeters. The grass was cut neatly by high quality steel. The coil mower has a power of 400 volts and weighs 11.9kg. That makes the electric cage mower Gardena maneuverable. The larger wheels also contribute to this, which is equipped with a special profile, resulting in more traction. To make it even easier to store the lawnmower, you can shrink the handlebars and move it through less than the handle. Read more Read less
