One of the newest golf facilities in the Brisbane area, and another course from Graham Marsh's growing design portfolio, North Lakes Golf Club is a modern resort-style design that offers visitors a not-so-typical game of golf resort. The holes at North Lakes Golf Club are routed by round water hazards and well-placed bunkers as they are in many resort courses, but fairways - though aesthetically attractive and similar by many to acres of green carpet - are not as forgone as you would expect and move away from them will often result in a losing ball. Measuring a mighty 7100 yards from tiger tees, North Lakes was the first Australian course to incorporate the Tee/Eagle greens (in 2002) and these fast and true surfaces are invariably the most talked about feature of the course visiting golfers. Representing excellent value for money for those who want their golf on a pay-and-play basis, North Lakes is a trolley-only golf course that can get a little busy at times - even with the 10th in use as a starting hole - so golfers are advised to book in advance for a planned tee time. If the above article is inaccurate, please let us know by clicking here Very friendly staff, great course, fantastic presented. Value for money, the restaurant served a variety of food - from a simple burger - to a great curry, very worth the visit on its own. For locals they offer a Premium player club, for 899 members, which gives you a free game on birthday, plus discounts, and reduced play rates, a great deal! The Resort Golf Club featured Lomandra's restaurant, function rooms for rent, an impressive location for weddings and a bit of an expensive round of golf, some might say. The local community was informed of the pending sale to developers through leaflets fallen into mailboxes. The leaflets advised that a development group, Village Retirement Group, had serious plans to develop the land, although the land is not zoned for development and is in fact protected against future development by a council Development Control Plan. There was outrage within the Community, based on a wide range of issues this would present and a group of like-minded people came together and formed what is now known as Save North Lakes Golf Course or SNLGC. The reasons why selling advocates are on the line for Golf is a dying sport and The Club is not a profitable business, as much as many other locals worry that not enough has been done to attract customers and players in the first place and that its quiet neighborhood and wildlife refuge - you could in a public park with crime and garbage problems. What we do know is that The Village Retirement Group are proposing a massive 130,000sq2 development of retirement units, which is the same size from North Lakes Westfield, as well as a 100-bed, 3-level, nursing home to be built just over the top existing open space. With the balance of the land to potentially be used as a public park, to be known as North Lakes Common. But some questions need to be asked about this proposed public park: Who will finance the park being built? Who will keep the park? What will the park be maintained with? Will park land eventually build up as the golf course is currently threatened to be? Will the park become a criminal zone? Couple all this with the fact that the earth is made of mostly low-lying, food-prone areas. The golf course plays several roles for the Northern Lakes as it limits human impact and provides a large sanctuary for wildlife, great stormwater control, beautiful views, a lovely wedding venue, a large function center and a large local restaurant, all of which attracted people to build their home in the area, a Spokesperson for Save North Lakes Golf Club Group has said. A message on the North Lakes Resort Golf Club website reads: North Lakes Resort Golf Club and Lomandra's Restaurant are permanently closed for business. We would like to thank our members, customers and the wider golf community for their support over the past 17 years. We are forever grateful for our team of exceptional employees. Thank you for all the laughter and good memories, let's appreciate these and wish everyone happy golf. Many locals who support SNLGC are concerned that the council will not maintain the Development Control Plan, allowing the golf course's protected land to be subject to commercial development. Only time will tell how far SNLGC will be required and are willing to go, in order to protect the interests of their concerned local residents. Unfortunately, we have cancelled the entire 2020 season due to the situation and the rules of the pandemic. Many of the courses still honor our \$20.00 walking fee and its prevailing cart fee for those riding. Please note that only on Mondays and a tee time must be reserved. We hope we all survive this difficult time and prepare to play in 2021.
