The 1967 March on the Pentagon was a seminal event in the US antiwar movement - with 100,000 marching and over 600 arrested in the first mass civil disobedience against the war. We'll look back on that event and also at the peace movement's overall impact on public opinion and ending the US war in Indochina. Come and hear from people who were there and from current activists to share implications for today's resistance.
