If you ever lose access to your Android device, you don't need to wait. Download FonePaw .apk file and get back deleted files.Q: how to change html content with jquery ajax I want to change the content of an html page with ajax. It works, but it is not changing the html. I mean after the ajax call the html stays the same... Here is the code: // change html with ajax \$("#submit").click(function(){ var name = \$("#name").val(); \$.ajax({ url: "test2.php", type: "GET", dataType: "html", success: function(data){ \$(data).html("hay"); }, error: function(data){ alert('error'); data: {name: name} }); }); \$("#test2").html("hay"); data 520fdb1ae7
