

Congratulations Horse Owner,

Microchips

Your Veterinarian has microchipped your horse with a Datamars Equine Slim Chip. The microchip has been implanted on the left side of your horse's neck between the poll and the withers.

The Datamars Equine Slim microchip comes with an optional registration. USEF and many breed organizations require registering the microchip in their database, but you can also register your microchip in PetLink.net.

The benefits of registering in PetLink.net include:

Reunification during natural catastrophes. Floods and fires can happen anywhere. By registering with PetLink.net you will be called when your horse is found and scanned.

Proof of ownership. Horses can look alike. By registering with PetLink.net you can verify horse identification and ownership.

Registration is easy! Simply go to PetLink.net to get started. A one time charge of \$29.99 will apply.
