## Breville pizzaiolo australia buy

Breville Global Design Group Breville Global Design Group Australia The Smart Oven® Pizzaiolo is the world's first indoor countertop pizza oven that, with a standard domestic power outlet, heats up to 400 oC unprecedented and cooks an authentic wood-fired pizza in two minutes. Watch website watch twitter Buy online Ask anyone and they will happily tell you what they think is the best pizza in the world. These answers, however, are likely to see a radical change in the coming months thanks to the Breville Smart Oven Pizzaiolo, the ultimate essential device for any home cooking, which gives you the power to slice exactly to your preference. The dream is very real, ladies and gentlemen. If the dream refers to having authentic wood-fired pizza a la carte style. Think about everyday applications. Breakfast... Lunch... second lunch... Dinner... Midnight aperitif... kick-ons. A material reality and everything possible within this elegantly compact product. Needless to say, an abundance of research and development has been carried out in order to replicate the same cooking method as your conventional tabletop ovens - even more so when you consider the fact that the Breville pizza oven is actually able to deliver authentic fire-style wood-fired pizzas in just two minutes. We are talking about years of researching heating techniques, testing prototype after prototype, modifying the existing Breville Element IQ system® to ensure that this could reach 400 oC, as well as the three types of heat generated by a brick furnace (conductor, radiant, convective). Historically, I've never been a man of science. But for the Pizzaiolo Smart Oven, I'm willing to become Marie curie. It could make an endless noise about technological innovation, algorithms, and even how this wonder machine, which fits on top of a damn kitchen bench, can intuitively adapt to all kinds of cuts, all kinds of darkness, all kinds of etc. Or I could just show you the Smart Oven Pizzaiolo in action coming through the mass products. (See real pizzas made in video below c. 3:57) The Breville pizza oven is now officially available in Australia. Learn more at [breville.com](http://breville.com). While you're at it, check out this portable kebab doner grill for those diy late-night foods. I'm in an orderly manner. The algorithms of our Element IQ system direct power where and when needed to achieve optimal cooking performance. Innovative cavity design using sensors, PID temperature control and optimized deflector technology - the system adjusts which heating elements are on and the power of one to ensure that your chosen pizza is cooked to perfection. The independently controlled, dynamic cover is designed to sit directly above sensitive incotoly heating elements. Natural cordierite stone heats up quickly and evenly to the right temperature, cooking the pizza base to the desired finish, with the right amount of char for the classic wood finish. Intense radiant heat is evenly controlled by Breville's patent-pending heating elements, so it is no longer necessary to rotate food while cooking. Heat-intensifying parabolic reflectors maximize the efficiency of superior heating elements by reflecting energy on the bark. The integrated roof-to-door design brings pizza closer to the elements and makes it easy to load and unload. For wood-burning and Neapolitan-style pizzas, the optimized baffle shield has been designed to protect its fragile coverages from intense heat while reflecting radiant heat to the crust to achieve leopard-spotted effect. For other pizza styles, dynamic switching of internal elements ensures that the ingredients, cheese and dough are evenly browned. The Pizzaiolo comes with a range of preset cooking features, including the authentic Wood Fired, the iconic New York, the deep and delicious Bread pizza, the Thin & Crispy bar style and even the Frozen pizza setting. Impress family and friends and create authentic homemade pizzas with recipe cards created by Breville to complement pizzaiolo. Fully customize how the oven works. Manual mode allows you to individually control the cover and maximum temperatures, and select which heating elements are in operation. Choose the ideal heat settings: Select Crust Only to achieve leopard spots on a Neapolitan-style pizza or Even Heat for other pizza styles where ingredients, cheese and dough are browned evenly. The combination of heat-resistant double panel front window and multi-material insulation surrounding the heat chamber ensures that extreme temperatures remain inside the furnace cavity while keeping the outer surfaces as cool as possible. Get a new replacement if your product suffers an eligible failure through our hassle-free support process, plus enjoy a range of benefits such as technical support and exclusive product care @ discounts. Discover all the benefits that Product Care® offers you: Safety When you purchase a Product Care Replacement Plan® if an evaluation finds that Your Product has suffered an Eligible Failure, we will ensure that you are provided with a new replacement product.
